Color Theory for the Makeup Artist Katie Middleton,2018-06-12 Color Theory for the Make-up Artist: Understanding Color and Light for Beauty and Special Effects analyzes and explains traditional color theory for fine artists and applies it to the make-up artist. This book is suitable for both professionals and beginners who wish to train their eye further to understand and recognize distinctions in color. It explains why we see color, how to categorize and identify color, relationships between colors, and it relates these concepts to beauty and special effects make-up. The book teaches the reader how to mix flesh tones by using only primary colors, and explains how these colors in paints and make-up are sourced and created. It also discusses the reason for variations in skin colors and undertones, and how to identify and match these using make-up, while choosing flattering colors for the eyes, lips, and cheeks. Colors found inside the body are explained for special effects make-up, like why we bruise, bleed, or appear sick. Ideas and techniques are also described for painting prosthetics, in addition to using color as inspiration in make-up designs. The book also discusses how lighting affects color on film, television, theater, and photography sets, and how to properly light a workspace for successful applications.

Whether you are a newly graduated PMU artist or a seasoned cosmetic tattooist wanting to further understand your trade, this book provides the base knowledge required to build upon your use of color and pigments. Although many cosmetic tattooing courses address this topic, the fundamentals of choosing pigments for certain skin types and diagnosis of color issues is often an area where training falls short. You simply cannot develop the depth of understanding required in a standard five-day foundation course to operate effectively. Color Theory for Cosmetic Tattooists provides a blueprint of fundamentals to expand upon and details: How you can use the principles of color theory in practice to excel your business How to avoid angry clients with unexpected tattoo color changes How to pick a pigment line and the red flags to avoid in a brand Why cosmetic tattoos change color and how to diagnose the true cause so you can correct issues Key precautions when performing pigment skin tests to avoid adverse reactions How to accurately assess client skin tone without mistaking a cool for a warm type How to take the guesswork out of using pigment modifiers What you absolutely shouldn't do when combining a pigment mixture What the best pigments are for ombre brows, microblading, eyeliner and lip tattoos When you should and shouldn't attempt color corrections and alternative approaches The hidden client factors you need to know to avoid stressful complaints Key mistakes to avoid that will impact healed color and results Color Theory for Cosmetic Tattooists was written to address the lack of color focused texts available for permanent make-up practitioners. Ensuring that a pigment mixture is right and having the assurance that tattoos will heal as planned is a key concern in this industry. While this book is not intended to replace quality practical training, it aims to provide tattooists with fundamental concepts to build experience upon.
