*Nursing Log* Harmony Fitzgerald, 2020 Nursing, also known as breastfeeding, is the feeding of babies and young children with milk from a woman's breast. Health and medical professionals recommend breastfeeding begin within the first hour of a baby's life and continue as often and as much as the baby wants. During the first two to three weeks of life, babies may nurse roughly every

two to three hours, and the duration of a feeding is usually ten to fifteen minutes on each breast. Older children feed less often. Mothers may pump milk so that it can be used later when breastfeeding is not possible. Breastfeeding has a number of benefits to both mother and baby, which infant formula lacks. Keeping track of the feedings is a must for parents as the first few weeks and months can be extremely hectic and information can be easily forgotten. A must-have breastfeeding logbook for new moms or even experienced ones who want to track their baby's breastfeeding schedule, and left/right duration, bottle feeding, sleep / activity, as well as diaper pee and poop changes. Several lines at the bottom of each page makes it easy to write extra notes and every other page is there for you to write lengthier notes. Keeping a log can help if you need to make any adjustments or to discuss your baby's progress with your family pediatrician. Features: Makes a great baby shower gift A good resource for babysitters to follow your baby's feeding schedule Glossy paperback cover 6x9 inches - convenient size to toss in your diaper bag, backpack, purse, or pocket. 124 pages Perfect baby shower gift.
