**Supergatory** Patrick M. Robbins,2014-09-09 In a distant corner of the cosmos, on an advanced planet known as Newel, a hero is created using super science. This hero is named Gar-A and his destiny is driven by a freak occurrence with a black hole. He finds himself seemingly stranded on a distant planet called Earth, a strange place that exists in a parallel dimension away from his home world. Newelians look like humans, but this is where the similarities end. Made of an incredibly dense molecular structure, they are gifted with incredible strength and durability. Their superior mental capacities and half-millennium life span make them astonishingly powerful. On Earth, Gar-A becomes known as Major Alpha, the premier costumed hero of his age. He follows his heart, and soon, he and his human wife, Kate, build a life and family together. Their son, Mik, lives a life most fanboys can only dream of in their four-color fantasies. Mik, considered a “power-normal”, dreams of glory as he strives to make the most of his small portion of Newelian abilities. A tragic first outing opens young Mik’s eyes to a series of revelations about his father’s legacy, as his dream of being a superhero becomes a twisted nightmare. If he is to realize his fate, Mik must find the courage to escape the dark shadow of his father. As he makes new allies and enemies, he finds himself forced to pursue his own path toward a greater destiny.

**Touchdown Jesus** T.D. Hogan,2003-01-23 VERY GOOD! BookReview.com Featuring Yes, My Best Friend Was a Dreamer- Narrator David Horton recounts a powerful love-hate relationship with his own personal superhero, and in the process outlines the suspicious circumstances surrounding the hero's life and recent disappearance. (In these three novellas) the author demonstrates the inner makings of being male. [This] is good writing. BookReview.com [This novella] is clearly a man's book, or maybe... a glimpse into the world of man for women. BookReview.com

**R-CALCULUS: A Logic of Belief Revision** Wei Li,Yuefei Sui,2021-11-01 This book introduces new models based on R-calculus and theories of belief revision for dealing with large and changing data. It extends R-calculus from first-order logic to propositional logic, description logics, modal logic and logic programming, and from minimal change semantics to subset minimal change, pseudo-subformula minimal change and deduction-based minimal change (the last two minimal changes are newly defined). And it proves soundness and completeness theorems with respect to the minimal changes in these logics. To make R-calculus computable, an approximate R-calculus is given which uses finite injury priority method in recursion theory. Moreover, two applications of R-calculus are given to default theory and semantic inheritance networks. This book offers a rich blend of theory and practice. It is suitable for students, researchers and practitioners in the field of logic. Also it is very useful for all those who are interested in data, digitization and correctness and consistency of information, in modal logics, non monotonic logics, decidable/undecidable logics,

logic programming, description logics, default logics and semantic inheritance networks.

**VIGO** Lowell Emerson Bennett, 2020-12-22 A deliberative Cane Corso mastiff and his human pack resist a dysfunctional police state at the community level in near-future America. More: A largely sardonic speculative fiction novel on near-future police state America and escalating societal and environmental breakdown. The story is told partly from the perspective of a few resisting individuals, partly from the perspective of cynical government operators, and partly from the perspective of a canine, a 'particularly stout and sturdy Cane Corso', Vigo. Some minor sci-fi elements, twists and action.
