Sport in the African World John Nauright,Mahfoud

Amara,2018-05-16 Sport has been a component of African cultural life for several hundred years. In today's globalized world, Africans and Africa have become a vital part of the international sporting landscape. This is the first book to attempt to survey the historical, contemporary and geographical breadth of that landscape, drawing on multidisciplinary scholarship from around the world. To gain an understanding of sport in Africa and its contributions to the global sports world, one must first consider the ways in which sport itself is a terrain of conflict and represents another symbolic territory to conquer. Addressing key themes such as colonialism, globalization, migration, apartheid, politics and international relations, sports media and broadcasting, ethnobranding, sports tourism and the African diaspora in Europe and the United States, this collection of original scholarship offers a significant contribution to this burgeoning field of research. Sport in the African World is fascinating reading for all students and scholars with an interest in sport studies, sport history, African history or African culture.

Transnational Television and Latinx Diasporic Audiences

Catherine L. Benamou,2022-12-16 This book is based on a mixed-method, longitudinal study of the transmission, production, and

reception of Spanish- and Portuguese-language television in four global cities with expanding Latinx diasporic populations. The author tracks and analyzes the production practices of Spanish-language broadcasters, the highlights of news and cultural affairs coverage, changes in the shooting locations and sociocultural discourses of telenovelas (both imported from Latin America and domestically produced), the presence of SLTV in the national political sphere, and the modes of media access and opinions of over 400 viewers in Detroit, Los Angeles, Miami, and Madrid. The possibilities created by SLTV and PLTV for achieving a sense of enfranchisement are explored. Intended for a general, as well as academic reading audience.

Orchestrating and Automating Security for the Internet of Things Anthony Sabella, Rik Irons-Mclean, Marcelo

Yannuzzi, 2018-06-04 Master powerful techniques and approaches for securing IoT systems of all kinds—current and emerging Internet of Things (IoT) technology adoption is accelerating, but IoT presents complex new security challenges. Fortunately, IoT standards and standardized architectures are emerging to help technical professionals systematically harden their IoT environments. In *Orchestrating and Automating Security for the Internet of Things*, three Cisco experts show how to safeguard current and future IoT systems by delivering security through new NFV and SDN architectures and related IoT security standards. The authors first review the current state of IoT networks and architectures, identifying key security risks associated with nonstandardized early deployments and showing how early adopters have attempted to respond. Next, they introduce more mature architectures built around NFV and SDN. You'll discover why these lend themselves well to IoT and IoT security, and master advanced approaches for protecting them. Finally, the authors preview future approaches to improving IoT security and present real-world use case examples. This is an indispensable resource for all technical and security professionals, business

security and risk managers, and consultants who are responsible for systems that incorporate or utilize IoT devices, or expect to be responsible for them. · Understand the challenges involved in securing current IoT networks and architectures · Master IoT security fundamentals, standards, and modern best practices · Systematically plan for IoT security · Leverage Software-Defined Networking (SDN) and Network Function Virtualization (NFV) to harden IoT networks · Deploy the advanced IoT platform, and use MANO to manage and orchestrate virtualized network functions · Implement platform security services including identity, authentication, authorization, and accounting · Detect threats and protect data in IoT environments · Secure IoT in the context of remote access and VPNs · Safeguard the IoT platform itself · Explore use cases ranging from smart cities and advanced energy systems to the connected car · Preview evolving concepts that will shape the future of IoT security

Jesus and the Manosphere Paul Treacy, 2023-09-13 Ever since the mid-twentieth century, life has generally been better in western nations for the huge majority of the subsequent generations, born thereafter. This, most notably, in terms of better standards of living and healthcare. However, the traditional family unit has also come under great attack, during this same time, with far more divorces, break ups, along with higher rates of single parenthood and loneliness, than ever before, thus creating a

domino effect, leading to a whole array of challenging social issues, further down the line. How has this happened? What, if anything, can be done to reverse this tide? The 'manosphere' movement, which regularly comes under huge criticism, seeks to explore these often troubling and complex issues, more often than not, with a 'no holds barred' approach. Numerous bloggers have gained large and growing fanbases from countless men and boys, the entire world over. Is it totally absurd to place much of the blame on modern feminism? Are those involved in the movement, just a bunch of heartless and misogynist thugs? Or are they genuinely concerned men, telling very uncomfortable truths and who, deep down, actually want the best for women, via tough love? And the biggest question of all is - What would Jesus himself, make of all of this?
