Business Recovery in Difficult Times Mike Wolf, 2020-12-21 If you own a business with one to 30 employees, or are thinking of being in business, you're uncomfortable with money talk, and just want to do what you are passionate about, this book is for you. Profit is critical or you have a hobby. Profit is fundamental or you created a job for yourself and might earn more working for someone else. But, if you are serious about having a business for years to come, you would do yourself a great disservice by not reading this book. The information in this book is unavailable anywhere else. Not in business schools. Not learned on the job. Not passed down from others.

It was gleaned from over a half century of working with global corporations. No one company provided all the material. Executives from seventy-two global companies went the distance to help Mike Wolf prove the outcome of Kanketa.

Cost Management Leslie G. Eldenburg, Liang-Hsuan Chen, Susan K. Wolcott, Gail Cook, 2016-03-28 *Cost Management: Measuring, Monitoring, and Motivating Performance*, Third Canadian Edition was written to help students learn to appropriately apply cost accounting methods in a variety of organizational settings. To achieve this goal, students must also develop professional competencies, such as strategic/critical thinking, risk analysis, decision making, ethical reasoning and communication. This is in line with the CPA curriculum and the content of this edition and the problem materials is mapped to the CPA. Many students fail to recognize the assumptions, limitations, behavioural implications, and qualitative factors that influence managerial decision making. The textbook is written in an engaging step-by-step style that is accessible to students. The authors are proactive about addressing the challenges that instructors and students face in their teaching and learning endeavors. They utilize features such as realistic examples, real ethical dilemmas, self-study problems and unique problem material structured to encourage students to think about accounting problems and problem-solving more complexly.
