Governing Europe's Marine Environment Michael Gilek, 2016-03-03 Governing Europe's Marine Environment is a coherent up-to-date multidisciplinary analysis of current approaches and challenges to the sustainable governance of Europe's marine environment. Structured in three parts, Part 1 outlines general theoretical ideas about governance, governing, and governability and serves as a starting point for analysing the development of marine governance in Europe from the perspective of different disciplines. Part 2 includes studies of EU marine governance. Part 3 focuses on Europe's regional seas, namely the Baltic Sea, the North Sea, the Black Sea, and the Mediterranean Sea. This book presents a better understanding of the fragmented governance of marine governance in Europe and in particular the tension between the Europeanization of regional seas and the regionalization of EU policies.

Risks at Sea Frank C. Spooner, 2002-07-04 This book places the marine insurance business of Amsterdam in the wider context of the political economy of Europe during the second half of the eighteenth century. The analysis is based on the simultaneous quotations of premiums for the twenty-two groups of destinations which formed a major part of the commercial matrix of the Netherlands. It considers the operation of the market at two levels. On the one hand, the provision of insurance responded to risk uncertainties in the market: in the 1760s and 1770s, Amsterdam experienced three serious upheavals, in the form of the financial crises of 1763 and 1772-73 and the hostilities leading to American independence and the Fourth Anglo-Dutch War. On the other hand, underwriters accepted risks in situations of structural uncertainty. The book is fully illustrated with graphs and maps and uses a wide range of original documents drawn from archives and libraries in Europe. An appendix provides the basic data of premiums quoted in the price-lists of the market.

The Maritime Law of Europe Domenico Alberto Azuni, 1806

Marine Science Frontiers for Europe Gerold Wefer, Frank Lamy, Fauzi Mantoura, 2012-12-06 Europe is a continent with a high coast-to-surface ratio, and European seas encompass a broad range of settings and regimes. The sustainable development of living and non-living marine resources, the protection of the marine environment and the provision of marine-based services are critical to economic prosperity and to the quality of life of European citizens. Addressing these concerns, marine-science researchers conducted a workshop reviewing major topics of European marine research. This publication contains overview and thematic background papers, as well as reports and recommendations for future research covering topics such as ocean-climate coupling, biogeochemistry, coastal and shelf processes, and ecosystem functioning/biodiversity.

A Different War U. S. Marine Corps (Ret.) Edwards, Harry W. Edwards, 2013-12 Shortly after the United States entered World War II, the Allies agreed that the European Theater would have priority in the war over the Pacific Theater. The Marine Corps' war was in the Pacific and all war plans regarding the employment of Marines reflected that. Nevertheless, because the Marine Corps was part of the naval establishment, it had responsibility also for furnishing men to parts of the Navy assigned to the European and Mediterranean theaters and to the operations conducted there. These were not large Marine formations, but were, for the most part, individual Marines and small detachments assigned to guard duty at the barracks and naval operating bases established in the United Kingdom, or men assigned as sea-going Marines in the detachments of the large fighting ships. Another category was filled by those intrepid Marines who volunteered for duty with the Office of Strategic Services (OSS), to undertake covert operations with the underground against the Nazis in the occupied countries of Europe and North Africa.

Maritime Safety in Europe Justyna Nawrot, Zuzanna Pełowska-Dąbrowska, 2020-12-23 The book is concerned with the harmonisation of maritime safety legal systems in Europe. It describes maritime safety legal systems in selected European countries as well as maritime safety issues from the perspective of the International Maritime Organisation, European Union, and European Free Trade Association. Distinguished scholars from Europe's

leading maritime law academic centres present national perspectives of maritime safety systems, questioning whether the adopted national solutions guarantee the compatibility with IMO and EU legal regime, as well as assessing the global and EU system. Moreover, the book seeks to provide some answers as to whether the IMO goals on maritime safety are adequate in light of current safety challenges and how to achieve higher level of enforcement of internationally-recognised maritime safety standards. It will be of great assistance to those readers who need to familiarize themselves with current problems inherent in maritime safety, whether that be lawyers, scholars, professional mariners, or national institutions. Chapter 14 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Europe, Small Navies and Maritime Security Robert McCabe, Deborah Sanders, Ian Speller, 2019-09-16 This book seeks to identify and address gaps in our understanding of maritime security and the role of small navies in Europe. The majority of Europe's navies are small, yet they are often called upon to address a complex array of traditional and non-traditional threats. This volume examines the role of small navies within the European security architecture, by discussing areas of commonality and difference between navies, and arguing that it is not possible to fully understand either maritime strategy or European security without taking into account the actions of small navies. It contains a number of case studies that provide an opportunity to explore how different European states view the current security environment and how naval policy has undergone significant changes within the lifetime of the existing naval assets. In addition, the book examines how maritime security and naval development in Europe might evolve, given that economic forecasts will likely limit the potential procurement of 'larger' naval assets in the future, which means that European states will increasingly have to do more with less in the maritime domain. This book will be of much interest to students of maritime strategy, naval power, strategic studies, European politics and international relations in general.
