Richard R. Hobbs

How to Read a Nautical Chart Nigel Calder, 2008

Marine Navigation 1 : Piloting Richard R.

Hobbs, 2012-12-06 Throughout the history of warfare at sea, navigation has been an important basic determinant of victory. Occasionally, new members of the fraternity of the sea will look upon navigation as a chore to be tolerated only as long as it takes to find someone else to assume the responsibility. In my experience, such individuals never make good naval officers. Commander Hobbs has succeeded in bringing together the information and practical skills required for that individual who would take the first step down the road toward becoming a competent marine navigator. At the outset of this book, the author stresses the necessity for safe navigation, but there is another basic tenet of sea warfare that this book serves. The best weapons system man has ever devised cannot function effectively unless it knows where it is in relation to the real world, where it is in relation to the enemy, and where the enemy is in relation to the real world. Not all defeats can be attributed to this lack of information, but no victories have been won by those who did not know where they were.

Personal Narrative of Travels to the Equinoctial Regions of the New Continent During the Years 1799-1804 Alexander von Humboldt, Aimé Bonpland, 1814 Alexander von Humboldt's account of his monumental scientific expedition to South America and Cuba. Originally published in French between 1814 and 1825, this is the first edition in English ... This classic of scientific exploration was based on the researches of Humboldt and his companion, Aimé Bonpland, during their five-year excursion in South and Central America from 1799 to 1804. The volumes describe the voyage from Spain and the stop in the Canaries; Tobago and the first steps in South America; explorations along the Orinoco; Colombia and the area around Caracas; explorations in the northern Andes; and a visit to Cuba. Humboldt and

Bonpland traveled widely through South and Central America, studying meteorological phenomena and exploring wild and uninhabited country. At Callao, Humboldt measured the temperatures of the ocean current which came to bear his name ...--Hill.

Chart No. 1 Nima,2010 Chart Number One is essential to correct and accurate use of nautical charts. More than a chart, it is a book that defines the symbols, abbreviations and terms used on charts. It also provides important information about buoys, light visibility (range) and aids to navigation. This new and improved edition from Paradise Cay is a complete and accurate high quality reproduction of information provided by NOAA and NIMA.
