**From Alliance to Union** Joseph A.  
Kéchichian, 2016-05-24 After the conservative Arab  
Gulf Monarchies - Bahrain, Kuwait, Oman, Qatar,  
Saudi Arabia and the United Arab Emirates (UAE) -  
joined forces on 25 May 1981 within the Gulf Co-  
operation Council (GCC), few fathomed that  
security requirements on and around the Arabian  
Peninsula would be so precarious and for so long.  
To answer their search for permanent stability,  
Arab Gulf rulers erected a regional alliance that  
sought to integrate internal and regional  
defences, as well as strengthen their existing  
socio-economic ties. Several of the monarchies  
even hoped that co-ordination on foreign policy  
issues over which near unanimity existed could,  
eventually, lead to a full-fledged union as  
envisaged in the organisation's founding charter.  
Between 1981 and 2015 these Arab Gulf monarchies  
experienced major socio-political transformations  
resulting from upheavals throughout the Arab and  
Muslim worlds. The perceived necessity to bring  
about a full-fledged union has come into conflict  
with entrenched viewpoints from regimes that value  
traditional military/political roles and norms. In  
this new study, Joseph A. Kechichian provides an  
evaluation of GCC States' military institutions to  
better evaluate whether a stable alliance is  
capable of enduring over the next few decades, and

how civilian leaders perceive the role and influence of their military officers for the task. Kechichian raises fundamental questions over internal, regional and international threats, including an existential challenge emanating from the Islamic revolutionary government of Iran, and assesses how GCC professionals may be preparing to tackle them. He further elucidates on the best methods to meet security challenges not only to secure political survival but also to determine whether conservative Arab Gulf regimes can flourish outside an effective alliance. The volume concludes with an examination of evolving civil-military relations in the GCC States.

Nautical Charts G. R. Putnam, 2022-06-13 Nautical Charts is a work by George Rockwell Putnam. Essentially a set of lectures, it provides the maritime student with information on how nautical charts are drawn and studied in a straightforward manner.

*Understanding a Nautical Chart* Paul Boissier, 2018-01-09 We all rely on charts to navigate at sea – but are we missing essential information? A mass of data is included on each chart and deciphering the many symbols and abbreviations can be complicated. The accuracy of some charted depths can be trusted entirely while others should be treated with caution. This book will tell you where to find and how to understand this vital knowledge. This updated second edition explains how charts are compiled before guiding you through the elements that make up these vital navigational tools. Improve your understanding of charts and you will navigate with increased safety

and confidence. Understanding a Nautical Chart offers superb value as, in addition to a wealth of practical advice, there is a key to all the recently updated chart symbols and abbreviations from Symbols and Abbreviations Used on Admiralty Charts (5011). It includes information on electronic charts, explains how to update a chart and how to establish the accuracy of each chart. It is ideal for professional mariners and leisure sailors.

Protecting the Gulf's Marine Ecosystems from Pollution Abdulaziz H. Abuzinada, Hans-Jörg Barth, Friedhelm Krupp, Benno Böer, Thabit Zahran Al Abdessalaam, 2008-03-05 This volume reviews present sources and levels of pollution in The Gulf, assesses their causes and effects on biota and ecosystems, and identifies preventive and remedial measures reducing levels of pollution and mitigating adverse impacts. It is supported by UNESCO, Doha.

*Seafaring in the Arabian Gulf and Oman* Dionisius A. Agius, 2012-12-06 This book is a study of the seafaring communities of the Arabian Gulf and Oman in the past 150 years. It analyses the significance of the dhow and how coastal communities interacted throughout their long tradition of seafaring. In addition to archival material, the work is based on extensive field research in which the voices of seamen were

recorded in over 200 interviews. The book provides an integrated study of dhow activity in the area concerned and examines the consciousness of belonging to the wider culture of the Indian ocean as it is expressed in boat-building traditions, navigational techniques, crew organisation and port towns. People of the Dhow brings together the different measures of time past, the sea, its people and their material culture. The Arabian Gulf and Oman have traditionally shared a common destiny within the Western Indian Ocean. The seasonal monsoonal winds were fundamental to the physical and human unities of the seafaring communities, producing a way of life in harmony with the natural world, a world which was abruptly changed with the discovery of oil. What remains is memories of a seafaring past, a history of traditions and customs recorded here in the recollections of a dying generation and in the rich artistic heritage of the region.

*Ships and the Development of Maritime Technology on the Indian Ocean* Ruth Barnes, David

Parkin, 2015-12-22 Recognising the fundamental role both of shipping communities and the technologies crafted and shared by them, this book explores the types of ships, methods of navigation and modes of water-borne trade in the Indian Ocean region and the way they affected the development of distinctive settlements against a changing but strong sense of regional consciousness and identity.
