Life on Mars 3 Michael G. Hunter, 2013-08-28 Michael G. Hunter is a student of many fields. A licensed California architect and certified astrologer, he studies anthropology, astronomy, archaeology, paleontology, and mysteries of all sorts. Looking at what others have overlooked, he explores and reveals answers to unsolved mysteries, by simply observing and analyzing available material.

Life on Mars 2 Michael G. Hunter, 2013-02-07 Life on Mars showed that there is indeed, life on the fourth planet from the Sun. This second book digs even deeper into the animal and human life on the red planet, uncovering and demonstrating further evidence, analysis, and knowledge, from NASA's Mars photos. This book is a must read for anyone, ages teen and up, including amateur stargazers, ufologists, doomsday preppers, survivalists, geeks and nerds, and students of science, astronomy, life forms, archaeology, anthropology, and ancient history.

The Mariner 6 and 7 Pictures of Mars Stewart A. Collins, 1971 The present volume presents the results of the Mariner VI and VII missions, in a more finished form that has been issued hitherto. Greatest interest attaches to the 200-odd television images which the world first viewed in their crude form as they were received on Earth. To most fully utilize this television data, NASA has sponsored extensive post-flyby computer processing and analysis of these pictures. The purpose of this book is to make available high-quality reproductions of the final, computer-processed pictures. The text serves only to explain the genesis and unique characteristics of the pictures, to point out interesting features in them, and to provide some indication of their significance in the history of Mars investigations. Detailed analysis has been avoided in this volume.--p. v, vii.

Seeing Like a Rover Janet Vertesi, 2015-04-22 In the years since the Mars Exploration Rover Spirit and Opportunity first began transmitting images from the surface of Mars, we have become familiar with the harsh, rocky, rusty-red Martian landscape. But those images are much less straightforward than they may seem to a layperson: each one is the result of a complicated set of decisions and processes involving the large team behind the Rovers. With *Seeing Like a Rover*, Janet Vertesi takes us behind the scenes to reveal the work that goes into creating our knowledge of Mars. Every photograph that the Rovers take, she shows, must be processed, manipulated, and interpreted—and all that comes after team members negotiate with each other about what they should even be taking photographs of in the first place. Vertesi's account of the inspiringly successful Rover project reveals science in action, a world where digital processing uncovers scientific truths, where images are used to craft consensus, and where team members develop an uncanny intimacy with the sensory apparatus of a robot that is millions of miles away. Ultimately, Vertesi shows, every image taken by the Mars Rovers is not merely a picture of Mars—it's a portrait of the whole Rover team, as well.

MARS AS ART SERIES: STORIES AND IMAGES FROM THE MARS RECONNAISSANCE ORBITER (MRO) AND THE SPIRIT ROVER, 2018-01-12 Spirit (MER-A) – USA Mars Rover – 185 kg - (June 10, 2003) As part of the Mars Exploration Rover (MER) Mission, Spirit, also known as MER-A, was launched on June 10, 2003 and successfully arrived on Mars on January 3, 2004. The last communication with Spirit occurred on March 22, 2010. JPL ended attempts to re-establish contact on May 25, 2011. The rover likely lost power due to excessively cold internal temperatures. Opportunity (MER-B) – USA Mars Rover – 185 kg - (July 7, 2003) Opportunity, also known as MER-B, was launched on July 7, 2003 and successfully arrived on Mars on January 24, 2004. Click here for more information on the MER mission. Mars Reconnaissance Orbiter – USA Mars Orbiter - 1,031 kg - (August 12, 2005) The Mars Reconnaissance Orbiter (MRO) was launched on August 12, 2005 for a seven month voyage to Mars. MRO reached Mars in March 10, 2006 and began its scientific mission in November 2006. Click here for more information. Mars Science Laboratory – USA Mars Rover – 750 kg - (November 26, 2011) The Mars Science Laboratory was launched on November 26, 2011. With its rover named Curiosity, NASA's Mars Science Laboratory mission is designed to assess whether Mars ever had an environment able to support small life forms called microbes. Curiosity landed successfully in Gale Crater at 1:31 am EDT on August 6, 2012. Click here for more information from the NASA JPL site.

SECRET MARS M. J. Craig, 2020-01-01 Why has NASA not announced to the world the greatest scientific discovery ever made in the history of space exploration? Do you want to know what has really been discovered by the orbiters and rovers on the planet Mars? While scientists spend billions of dollars confirming that microbes live in the Martian soil, people sitting at home on their computers studying the Mars images are making far more astounding discoveries... they have found the possible archaeological remains of an extraterrestrial civilization. Hard to believe? Well, this challenging book invites you to take a look at the astounding pictures yourself and make up your own mind. Secret Mars presents over 160 incredible images taken by American and European spacecraft that reveal possible evidence of a civilization that once lived and may still live, on the planet Mars... powerful evidence that scientists are ignoring! This is the complete revised edition from the original 2013 publication in Britain. A visual and fascinating book!

Landscapes of Mars Gregory L. Vogt, 2008-07-31 Containing beautiful and exiting images that will spark the imagination, this is essentially a picture book providing a visual tour of Mars. All the major regions and topographical features are shown and supplemented with chapter introductions and extended captions. In a way, think of the book as a visual tourist guide. Other topics covered include Martian uplands, Giant volcanoes, the Grand Canyon of Mars, and much more. At the end of the book is an exciting gallery of the best 3D images of Mars making the book a perfect tool for understanding Mars and its place in the solar system.

Mars Rover Danielle Smith-Llera, 2017-07-01 Weighing as much as a small car, a rover named Curiosity rolls quietly around Mars. Scientific instruments pack its body and cluster at the end of a mechanical arm. An arrangement of lenses and instruments tops its mast, like a face. To the many NASA workers involved in Curiosity's mission on Mars, the rover is not simply a robot, but an astronaut bravely exploring an alien place. Curiosity's instruments collect data and its cameras take images of the Mars landscape, including self-portraits, in vivid color and detail. As it roams and explores, Curiosity will help find the answers to such age-old questions as has there ever been life on Mars? Could there be one day?

Images of Mars Michael H. Carr, Nancy Evans, 1980

Mars Alfred S. McEwen, Candice Hansen-Koharcheck, Ari Espinoza, 2017-06-06 HiRISE is the most powerful camera ever sent to another planet, showing us Mars in astonishing detail. Featuring an outstanding and never-before-published collection of HiRISE high-resolution color images with explanatory captions in twenty-four languages, this book offers a unique volume produced from an active NASA mission. Mars enthusiasts will appreciate these perfect snapshots of our current understanding of Mars, with soon-to-be classic pictures that have come to define our vision of the Red Planet. These images and their interpretations will be held as a yardstick for future

exploration as we learn more about the surface and geologic processes of the fourth planet from the Sun. With tantalizing and artistic glimpses at actively eroding slopes, impact craters, strange polar landscapes, avalanches, and even spectacular descent pictures of probes like the Phoenix Lander and the Mars Science Laboratory, we see what researchers are seeing. Through vivid and beautiful images, this book underscores the need for such a camera on future orbiters, especially as more landing missions are planned. *Mars: The Pristine Beauty of the Red Planet* provides a stunning keepsake of one of humanity's greatest accomplishments in space travel.

Magnificent Mars Ken Croswell, 2003-10-21 Mars has long offered the prospect of another living world near Earth. Although NASA's first spacecraft dashed visions of little green men tending canals, recent voyages have painted a picture of an intriguing planet that may have once resembled Earth, with warmth, water, and possibly life. Mars may answer the great question Are we alone?; for if Mars, like Earth, gave rise to life, then trillions of other worlds throughout the universe have surely done the same. Harvard-trained astronomer Ken Croswell set the standard for elegance and eloquence with his stunning photographic triumph, *Magnificent Universe*. Now, with insightful prose and astonishing images, he presents the red planet's full glory in *Magnificent Mars*, showing volcanoes taller than Mount Everest, spiral-shaped polar caps of ice, and a canyon system that could stretch from Ohio to California. Here is a concise synthesis of the latest research on Mars, accompanied with the very best full-color images, expertly reprocessed to look even better than NASA's own versions, from the Hubble Space Telescope, Viking, Pathfinder, Mars Global Surveyor, Mars Odyssey, and other spacecraft. Highlights include a foldout panorama of the Martian surface; a never-before-published, rainbow-colored topographic map; and a sequence showing a full rotation of Mars, courtesy of the Hubble Space Telescope. Many of these images have never appeared in a book before. Few have ever looked so good. In lyrical prose, Dr. Croswell weaves these stupendous images into a virtual tour of Mars by organizing them around the four elements -- Earth, Air, Fire, and Water. From the northern plains of Vastitas Borealis to the towering Olympus Mons and other volcanoes of the Tharsis bulge, we explore the red planet's geology, topography, and surface. From the frigid climate to the massive dust storms that can engulf the entire globe, we examine the thin Martian atmosphere and the clues it preserves to the planet's wetter past. And, from the flood channels that spill into Chryse Planitia to the vast potential lakebed of ancient Hellas, we see stunning images of ancient rivers and floods, triggering speculation that a warm, wet Mars may have given rise to life that survives to this day. The tour concludes with a voyage to the planet's two potato-shaped moons, Phobos and Deimos, complete with rainbow-colored topographic maps. Unique color-coded tables on Mars, its atmosphere, its life history, its moons, and NASA missions to the planets appear in a useful reference section, along with a glossary and suggestions for further reading. With its large format, superb images, and compelling text, *Magnificent Mars* is the next best thing to standing on the red planet itself. In future years NASA will launch numerous missions to Mars, and *Magnificent Mars* is the definitive guide to what these spacecraft will see. Indeed, the first human explorers to Mars may want to take a copy of *Magnificent Mars* aboard their spaceship.

Travels with Curiosity Charles J. Byrne, 2020-09-28 The Mars Curiosity Rover is the most sophisticated mobile laboratory ever deployed on a planet. For over seven years, scores of investigators have planned its daily route and activities, poring over the overwhelming images and data and revising our understanding of planetary surfaces, geology, and potential habitability. This book takes readers right down to the surface of Mars, chronicling Curiosity's physical and scientific journey across the planet's Earth-like, yet strikingly alien vistas. Through dozens of images and descriptive accounts of the surface, you will gain a deeper knowledge of the Martian landscape, from the floor of Gale Crater up to the cliffs of Mount Sharp. Presented at the end of each chapter are the results and revelations from the science team spearheading the mission. Like any cross-country road trip, the rover has hit some unexpected hitches along the way. The book describes the obstacles faced by the rover and its scientists over the years and the difficult decisions and careful experimentation it took to solve them.

The Photographic Story of Mars Earl C. Slipher, 1962

Martian Pictures O'Brien Stanley, Nicki L. Michalski, Lane "Doc" Roth, 2018-07-09 Mars has long served as a blank canvas for illustrating society's aspirations and anxieties--a science fiction setting for exploring our future history. Covering a wide array of films from Soviet propaganda to Hollywood blockbusters, the authors examine a range of themes and concepts in motion pictures about Mars--attitudes about women, fear of government, environmental issues--and how these depictions changed over time. A complete filmography provides a concise summary of each film discussed.

The Monuments of Mars Richard C. Hoagland, 1987 In 1976, NASA sent four Viking spacecraft to Mars to photograph the planet and test for the presence of life. One of the orbiters photographed a mile-long mesa that uncannily resembled a human face. Hoagland takes readers step by step through the NASA images and evidence that a former civilization may have lived on Mars. Photos, maps, and charts.

The Mariner 6 and 7 Pictures of Mars Stewart A. Collins, 1971

Postcards from Mars Jim Bell, 2010 The most fantastic of all journeys--the Spirit and Opportunity mobile robot missions to the surface of Mars--produced over 150,000 astonishing photographs. While the images were made available on low-resolution computer screens as they were sent back across millions of space miles, no one until now has done the painstaking work of editing, cropping, and processing these massive (often larger than 100 megabytes) images. The person to do it is Jim Bell, the scientist and photographer who led the photography team on this historic expedition. With his unique perspective, these photographs take us from the brave launches of these robots, to the alien landscape they discovered and the mysteries of the planet that they have helped to solve. Over 150 lavish full-color-process prints bring the colors and textures of Mars to vivid life on the page. Four of the most impressive pictures are presented in their entirety as gatefold images--which extend over three feet in width--providing a view of the surface of another planet unprecedented in its detail and clarity. *Postcards from Mars* is the perfect gift to give readers who have their feet on the ground and their eyes on the heavens.

Earth and Mars Stephen E. Strom, Bradford A. Smith, 2015-10-22 Nearly five billion years ago, Earth and Mars were born together as planetary siblings orbiting a young, emerging Sun. Yet today, one planet is water rich and life bearing, while the other is seemingly cold, dry, and forbidding. *Earth and Mars* is a fusion of art and science, a blend of images and essays celebrating the successful creation of our life-sustaining planet and the beauty and mystery of Mars. Through images of terrestrial landscapes and photographs selected from recent NASA and European Space Agency missions to Mars, *Earth and Mars* reveals the profound beauty resulting from the action of volcanism, wind, and water. The accompanying text provides a context for appreciating the role of these elemental forces in shaping the surfaces of each planet, as well as the divergent evolutionary paths that led to an Earth that is teeming with life, and Mars that is seemingly lifeless. *Earth and Mars* inspires reflection on the extraordinarily

delicate balance of forces that has resulted in our good fortune: to be alive and sentient on a bountiful blue world.

Selfies From Mars Katie L. Carroll,2023-02-13 From evidence of water to stunning images, Mars rover Opportunity allowed humans to experience the Red Planet as never before. Ride along on the 15-year mission Selfies From Mars: The True Story of Opportunity is a heartfelt narrative of the Mars Exploration Rover mission that explores the scientific findings of Opportunity and Spirit and the team of scientists and engineers behind the robot rovers. Perfect for STEM education topics, the pages features full-color photographs from the NASA mission and text features with bonus factual information, including Fact Files presented by the adorable cartoon rover Oppy.
