**Big Data Science and Analytics for Smart Sustainable Urbanism** Simon Elias  
Bibri, 2019-05-30 We are living at the dawn of what has been termed 'the fourth paradigm of science,' a scientific revolution that is marked by both the emergence of big data science and analytics, and by the increasing adoption of the underlying technologies in scientific and scholarly research practices. Everything about science development or knowledge production is fundamentally changing thanks to the ever-increasing deluge of data. This is the primary fuel of the new age, which powerful computational processes or analytics algorithms are using to generate valuable knowledge for enhanced decision-making, and deep insights pertaining to a wide variety of practical uses and applications. This book addresses the complex interplay of the scientific, technological, and social dimensions of the city, and what it entails in terms of the systemic implications for smart sustainable urbanism. In concrete terms, it explores the interdisciplinary and transdisciplinary field of smart sustainable urbanism and the unprecedented paradigmatic shifts and practical advances it is undergoing in light of big data science and analytics. This new era of science and technology embodies an unprecedentedly transformative and constitutive power—manifested not only in the form of revolutionizing science and transforming knowledge, but also in advancing social practices, producing new discourses, catalyzing major shifts, and fostering societal transitions. Of particular relevance, it is instigating a massive change in the way both smart cities and sustainable cities are studied and understood, and in how they are planned, designed, operated, managed, and governed in the face of urbanization. This relates to what has been dubbed data-driven smart sustainable urbanism, an emerging approach based on a computational understanding of city systems and processes that reduces urban life to logical and algorithmic rules and procedures, while also harnessing urban big data to provide a more holistic and integrated view or synoptic intelligence of the city. This is increasingly being directed towards improving, advancing, and maintaining the contribution of both sustainable cities and smart cities to the goals of sustainable development. This timely and multifaceted book is aimed at a broad readership. As such, it will appeal to urban scientists, data scientists, urbanists, planners, engineers, designers, policymakers, philosophers of science, and futurists, as well as all readers interested in an overview of the pivotal role of big data science and analytics in advancing every academic discipline and social practice concerned with data-intensive science and its application, particularly in relation to sustainability.

**The Death of Expertise** Tom Nichols, 2024 In the early 1990s, a small group of AIDS denialists, including a University of California professor named Peter Duesberg, argued against virtually the entire medical establishment's consensus that the human immunodeficiency virus (HIV) was the cause of Acquired Immune Deficiency Syndrome. Science thrives on such counterintuitive challenges, but there was no evidence for Duesberg's beliefs, which turned out to be baseless. Once researchers found HIV, doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission--

*What Do Artists Know?* James Elkins, 2015-06-26 Each of the five volumes in the Stone Art Theory Institutes series, and the seminars on which they are based, brings together a range of scholars who are not always directly familiar with one another's work. The outcome of each of these convergences is an extensive and "unpredictable conversation" on knotty and provocative issues about art. This third volume in the series, *What Do Artists Know?*, is about the education of artists. The MFA degree is notoriously poorly conceptualized, and now it is giving way to the PhD in art

practice. Meanwhile, conversations on freshman courses in studio art continue to be bogged down by conflicting agendas. This book is about the theories that underwrite art education at all levels, the pertinent history of art education, and the most promising current conceptualizations. The contributors are Areti Adamopoulou, Glenn Adamson, Rina Arya, Louisa Avgita, Jan Baetens, Su Baker, Ciarán Benson, Andrew Blackley, Jeroen Boomgaard, Brad Buckley, William Conger, John Conomos, Christopher Csikszentmihályi, Anders Dahlgren, Jonathan Dronsfield, Marta Edling, Laurie Fendrich, Michael Fotiadis, Christopher Frayling, Miguel González Virgen, R.E.H. Gordon, Charles Green, Vanalyne Green, Barbara Jaffee, Tom McGuirk, William Marotti, Robert Nelson, Håkan Nilsson, Saul Ostrow, Daniel Palmer, Peter Plagens, Stephan Schmidt-Wulffen, Howard Singerman, Henk Slager, George Smith, Martin Søbørg, Ann Sobiech Munson, Roy Sorensen, Bert Taken, Hilde Van Gelder, Frank Vigneron, Janneke Wesseling, Frances Whitehead, Gary Willis, and Yeung Yang.

**The Age of Social Democracy** Francis Sejersted, 2011-01-31 A history of how Norway and Sweden became the envy of the modern world This is the history of how two countries on the northern edge of Europe built societies in the twentieth century that became objects of inspiration and envy around the world. Francis Sejersted, one of Scandinavia's leading historians, tells how Norway and Sweden achieved a rare feat by realizing grand visions of societies that combine stability, prosperity, and social welfare. It is a history that holds many valuable lessons today, at a time of renewed interest in the Scandinavian model. The book tells the story of social democracy from the separation of Norway and Sweden in 1905 through the end of the century, tracing its development from revolutionary beginnings through postwar triumph, as it became a hegemonic social order that left its stamp on every sector of society, the economy, welfare, culture, education, and family. The book also tells how in the 1980s, partly in reaction to the strong state, a freedom and rights revolution led to a partial erosion of social democracy. Yet despite the fracturing of consensus and the many economic and social challenges facing Norway and Sweden today, the achievement of their welfare states remains largely intact.

**Implementing Evidence-informed Practice** Wes Shera, Katharine Dill, 2012 Examines developing strategies to integrate knowledge into policy and practice in order to determine if interventions will have the desired effect, ensure that public money is spent efficiently, and increase the likelihood that practitioners are intervening in the lives of others on the basis of the best available evidence.

**SWEDEN: NEOLIBERALISM AS EFFICIENT POLITICAL SYSTEM FOR SWEDES** Dr Ley G. Ikpo, 2022-08-22 regarded as being economically and politically stable, Sweden as one of the North European countries through the overall human management personal number system is considered a perfect nordic model. Regardless of the Swedish financial stability, the government during the last two terms (2014-2018 & 2018-2022) was then confronted to the unemployment and security problems. By being aware of these issues for many years, these remain the focal priorities for the Moderates. For an extended bright future, this political party shows the greatest interest in being present, ready and dedicated, at the 2022 votes, and for being elected on behalf of Swedes for these problems to be solved from today onwards. Once Moderates in power in 2022, people and corporate taxes will be lowered once again and with better prerequisite of effective safety. For increasing employment, security and economic growth, voters (natives and foreigners) may make the right choice in casting a vote for the Moderate party on Sunday, September 11, 2022.

**Product-Focused Software Process Improvement** Regine Kadgien, Andreas Jedlitschka, Andrea Janes, Valentina Lenarduzzi, Xiaozhou Li, 2024-01-02 This book constitutes the refereed proceedings of the 24th International Conference on Product-Focused Software Process Improvement, PROFES 2023, which took place in Dornbirn, Austria, in December 2023. The 21 full technical papers, 8 short papers, and 1 poster paper presented in this volume were carefully

reviewed and selected from 82 submissions. The book also contains one tutorial paper, 12 and workshop papers and 3 doctoral symposium papers. The contributions were organized in topical sections as follows: Part I: Software development and project management; machine learning and data science; software analysis and tools; software testing and quality assurance; security, vulnerabilities, and human factors; Part II: Posters; Tutorials; 2nd Workshop on Computational Intelligence and Software Engineering (CISE 2023); 2nd Workshop on Engineering Processes and Practices for Quantum Software (PPQS' 23); doctoral symposium.

**Scandinavian Conference on Artificial Intelligence-93** Erik Sandewall, Carl Gustaf Jansson, 1993 The Nordic countries are traditionally strong in the application of new computer technology. This work represents the state of the art in some of the artificial intelligence areas currently subject to active R&D. International researchers present 24 papers in the following areas: automated reasoning; qualitative reasoning; machine learning; neural networks; and knowledge-based systems. Both basic and applied AI research are represented.

*Sweden in the Eighteenth-Century World* Göran Rydén, 2016-03-09 Eighteenth-century Sweden was deeply involved in the process of globalisation: ships leaving Sweden's central ports exported bar iron that would drive the Industrial Revolution, whilst arriving ships would bring not only exotic goods and commodities to Swedish consumers, but also new ideas and cultural practices with them. At the same time, Sweden was an agricultural country to a large extent governed by self-subsistence, and - for most - wealth was created within this structure. This volume brings together a group of scholars from a range of disciplinary backgrounds who seek to present a more nuanced and elaborated picture of the Swedish cosmopolitan eighteenth century. Together they paint a picture of Sweden that is more like the one eighteenth-century intellectuals imagined, and help to situate Sweden in histories of cosmopolitanism of the wider world.

**Marine Insurance** Merkin, Rob, 2021-11-30 This authoritative work forms a comprehensive examination of the legal and historical context of marine insurance, providing a detailed overview of the events and factors leading to its codification in the Marine Insurance Act 1906. It investigates the development of the legal principles and case law that underpin the Act to reveal how successful this codification truly was, and to demonstrate how these historical precedents remain relevant to marine insurance law to this day.

## **MEDINFO 2017: Precision Healthcare Through Informatics** A.V. Gundlapalli,M.-C.

Jaulent,D. Zhao,2018-01-31 Medical informatics is a field which continues to evolve with developments and improvements in foundational methods, applications, and technology, constantly offering opportunities for supporting the customization of healthcare to individual patients. This book presents the proceedings of the 16th World Congress of Medical and Health Informatics (MedInfo2017), held in Hangzhou, China, in August 2017, which also marked the 50th anniversary of the International Medical Informatics Association (IMIA). The central theme of MedInfo2017 was Precision Healthcare through Informatics, and the scientific program was divided into five tracks: connected and digital health; human data science; human, organizational, and social aspects; knowledge management and quality; and safety and patient outcomes. The 249 accepted papers and 168 posters included here span the breadth and depth of sub-disciplines in biomedical and health informatics, such as clinical informatics; nursing informatics; consumer health informatics; public health informatics; human factors in healthcare; bioinformatics; translational informatics; quality and safety; research at the intersection of biomedical and health informatics; and precision medicine. The book will be of interest to all those who wish to keep pace with advances in the science, education, and practice of biomedical and health informatics worldwide.
