**2 Kinds of People** João Rocha,2017-07-11 It takes all kinds of people to make a world, the expression goes. But maybe it really takes only two kinds. People who put ketchup on their fries, and people who put the ketchup on the side. People who squeeze gently from the bottom, and people who manhandle the toothpaste tube. 2 Kinds of People is the interactive visual personality quiz that’s as much fun as a game. It works by showing two illustrations side by side. If you and your partner pick the same one, score it on the foldout wheel in the back, and move to the next. At the end, the number of matches determines where you fall on the Scale of Compatibility, ranging from mortal enemies to soul mates. There are 85 pairs in all, covering food, home, technology, travel, and more. It’s the perfect icebreaker, a clever way to find out if you and your best friend/date/coworker and/or person you just met in a bar are compatible. Cup or cone? Cash or plastic? Shower or bath? Escalator or stairs? Toilet paper over, or toilet paper under? Like they say, it’s the little things in life that really count.

**Attached** Amir Levine,Rachel Heller,2012-01-05 “Over a decade after its publication, one book on dating has people firmly in its grip.” —The New York Times We already rely on science to tell us what to eat, when to exercise, and how long to sleep. Why not use science to help us improve our relationships? In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and Rachel Heller scientifically explain why why some people seem to navigate relationships effortlessly, while others struggle. Discover how an understanding of adult attachment—the most advanced relationship science in existence today—can help us find and sustain love. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that each of us behaves in relationships in one of three distinct ways: • Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back • Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness. • Secure people feel comfortable with intimacy and are usually warm and loving. Attached guides readers in determining what attachment style they and their mate (or potential mate) follow, offering a road map for building stronger, more fulfilling connections with the people they love.
