*Handbook of Research on Decision-Making Capabilities Improvement With Serious Games* Correia, Anacleto, Simões-Marques, Mário, 2023-07-10 How can a group be empowered to improve their ability to make decisions while also reinforcing the group's intended values, beliefs, and behaviors? Like positive reinforcement, which introduces a desirable or pleasant stimulus after a behavior has been completed and has been found to be effective for reinforcing such behavior, serious games introduce the behavior as a pleasant experience through engagement and entertainment. Where positive reinforcement relies heavily on the willpower of the subject to complete the behavior on their own, serious games introduce a motivational factor from the beginning of the behavior. Serious games are designed for purposes other than entertainment, such as training, learning, creating awareness, or behavior transformation through the introduction of content, topics, narratives, rules, and goals. They are immersive, engaging, and enjoyable, which enhances motivation and learning. The development of serious games is grounded in theoretical backgrounds, such as motivation, constructivism, flow experience, problem-based learning, and learning by doing. This method has been used in a variety of industries, including education, healthcare, military, policy analysis, and business functions such as marketing or financial purposes. They facilitate problem solving through challenges and rewards and use entertainment and engagement components. Serious games can address specific skills for many domains, foster collaboration, provide risk-free environments, and be used as analytical tools for educational research. They reinforce intended values, beliefs, and behaviors of players while conveying knowledge, skills, and attitudes, providing an integrated and effective approach to the

transformation of an individual, group, or organization. The Handbook of Research on Decision-Making Capabilities Improvement With Serious Games discusses the use of advanced technologies including extended and immersive reality, digital twins, augmented reality (AR), virtual reality (VR), mixed reality (MR), and IoT sensors to improve decision-making skills and learning through serious games. This book discusses user engagement, game adaptation, content adaptation, and sensor technology. It showcases how to increase decision-making skills in individuals and organizations and incorporates the latest developments in artificial intelligence and machine learning. Led by experts with over 20 years of experience and covering topics such as serious game design, intelligent content adaptation, and machine learning algorithms. This book is designed for professionals in education, instructional designers, curriculum developers, program developers, administrators, educational software developers, policymakers, researchers, training professionals, privacy practitioners, government officials, consultants, IT researchers, academicians, and students.

*Building Executive Function* Nancy Sulla,2017-09-27 Educators clamor to provide top-notch lessons and resources for students, but if students lack executive function, even the best materials won't produce the desired results. If students haven't developed the brain-based skills to focus, catch and correct errors, identify cause-and-effect relationships, and more, they can't make sense of lessons. Executive function is the missing link to student achievement. But how can you develop this in the classroom? In this new book, bestselling author Nancy Sulla has the answers. She explains how building executive function requires a combination of activities, structures, and teacher

facilitation strategies aimed at six increasingly complex life skills that should be the goal of any school: conscious control, engagement, collaboration, empowerment, efficacy, and leadership. She also offers a variety of examples, activities, and structures fit for every grade level and subject area. With the book's practical strategies and tools, you will be inspired, armed, and ready to establish a clear framework for building executive function in all your students.

What's the Buzz? Mark Le Messurier, Madhavi Nawana Parker, 2011-03-28  
Some children and young adolescents find it much harder to learn and flexibly use social skills. They can struggle with making friends, joining in, reading others' feelings, bouncing back constructively following an upset, coping with put-downs or just dealing appropriately with day to day frustrations. What's the Buzz? is an easy-to-implement, 16 lesson play-based social skills training program that will improve student confidence, relationships and reduce conflict. Written for teachers who support children and adolescents who may struggle with life for a variety of reasons, this book will help them to: expand their socialisation skills, for example, 'how-to' meet people and be friendly, gain attention in positive ways, follow instructions, give compliments and maintain conversations; understand their feelings and develop an emotional resiliency to better cope with the inevitable emotional highs and lows life offers; learn 'how-to' read the feelings of others and appropriately respond to their needs; value positive thinking, for example, how-to stay calm under pressure, deal with worry, handle disappointment and best respond to put-downs and bullying; and, participate in play-based activities and games, so that they acquire skills incidentally. Designed for use in schools by

teachers, school counsellors, special needs co-ordinators, teaching assistants, parents and allied health professionals, the role plays, games and team building activities presented in each lesson will help to build class unity and cohesion, whilst the template format allows students to experience success, feel confident and be ready to develop more complex skills.

*Indoor Games That Teach (ENHANCED eBook)* Robynne

Eagan,1996-03-01 This resource shows you how to use active, indoor fun to stimulate young learners with a cross section of hands-on and educational games for indoor settings. Children will master the basics (and more!) by engaging their skills in board games, problem-solving challenges, fact-finding and review activities, math-based golf and marble games, paper folding and even square dancing! The games will motivate young learners, bring subject matter to life and keep children active - even indoors!

**Things That Go Inc. Price Stern Sloan,1998-09-01**

Combining the classic game of memory with the favorite Crazy Games format, Match-Ups is a new activity series for young children that helps build visual recall and concentration skills while teaching simple subjects. Players begin by shuffling the 12 pairs of game cards, then deal them out facedown. The object is to match up the pairs by finding and turning over the matching images. A colorful information sheet also provides entertaining facts about the objects featured, for real learn-and-play fun! Kids can rev up their concentration by matching up race cars, sailboats, trains, hot-air balloons, and more!

*High-Dimensional Probability* Roman Vershynin,2018-09-30

High-dimensional probability offers insight into the behavior of random vectors, random matrices, random subspaces, and objects used to quantify uncertainty in high dimensions. Drawing on ideas from probability, analysis, and geometry, it lends itself to applications in mathematics, statistics, theoretical computer science, signal processing, optimization, and more. It is the first to integrate theory, key tools, and modern applications of high-dimensional probability. Concentration inequalities form the core, and it covers both classical results such as Hoeffding's and Chernoff's inequalities and modern developments such as the matrix Bernstein's inequality. It then introduces the powerful methods based on stochastic processes, including such tools as Slepian's, Sudakov's, and Dudley's inequalities, as well as generic

chaining and bounds based on VC dimension. A broad range of illustrations is embedded throughout, including classical and modern results for covariance estimation, clustering, networks, semidefinite programming, coding, dimension reduction, matrix completion, machine learning, compressed sensing, and sparse regression.

*Targeting Language Delays* Caroline Lee, 2020-04-15

Targeting Language Delays: Language and Reading IEP Goals provides sequential steps in programming to meet more than 100 IEP\* goals in the areas of receptive and expressive language, listening and whole word reading for verbal and non-verbal school-age students who have communication difficulties in association with development challenges such as Down Syndrome, Autism, neurological delay and hearing impairment. This manual is for: Speech-Language Pathologists, parents, teachers, and support personnel. Speech-Language Pathologists using this manual will be able to:

- develop an appropriate IEP for students
- plan therapy sessions
- provide instruction for support personnel
- track students' progress allowing for seamless carryover of programming from one school year to the next and over changes of support personnel.

Parents, teachers and support personnel will easily be able to follow the steps in language and reading stimulation through structured activities, games and home carryover. Part 1 offers background and tips on teaching language skills. Part 2 contains goals, activities, games and carryover in key receptive and expressive language areas, as well as printable vocabulary lists and tracking forms. Targeted Goals:

- Following directions
- "Yes/no" and negative "no/not"
- Vocabulary development (nouns and verbs)
- Classification and categorization
- Descriptors
- Concepts
- "Wh" questions
- Listening skills (discrimination, memory and processing)
- Word and sentence structure
- Whole Word reading

Each goal is broken down into multiple sequential steps ensuring that underlying skills are targeted before addressing more complex

goals. \*Individualized Education Program/Individual Education Plan

Little People, BIG DREAMS Matching Game Isabel Sanchez Vergara, 2018-11-27 Featuring 20 outstanding women from the internationally best-selling Little People, BIG DREAMS series—including famous scientists, writers, activists, artists, and adventurers—this stylishly illustrated matching game is an entertaining way to inspire and sharpen the minds of little dreamers everywhere. Discover inspiring female role models by matching the famous faces of: Maya Angelou, Jane Austen, Josephine Baker, Coco Chanel, Agatha Christie, Marie Curie, Simone de Beauvoir, Amelia Earhart, Ella Fitzgerald, Anne Frank, Jane Goodall, Audrey Hepburn, Frida Kahlo, Ada Lovelace, Lucy Maud Montgomery, Georgia O'Keefe, Emmeline Pankhurst, Rosa Parks, Mother Theresa, and Harriet Tubman. Written by the best-selling Little People, BIG DREAMS author M<sup>a</sup> Isabel Sánchez Vergara, this remarkable matching game includes: A beautifully designed 9.5" × 9.5" box 20 pairs of cards to match A 9" × 9" educational biography card that provides a synopsis of each role model's life and achievements, including the dates that they lived. With three different ways to play, this game offers endless hours of fun and learning. With two or more players, lay the cards in row and, for each turn, turn two over and look for a match. You'll need to use your observation, concentration, and memory skills to win! You can also use them in a storytelling memory game, where one person begins a story using any card, then the players take turns repeating the story and then adding new characters elements with each turn. You can also play on your own by mixing the cards up and looking for matches, or use the cards as storytelling prompts. Little People, BIG DREAMS is a best-selling series of books and educational games that explore the lives of outstanding people, from designers and artists to scientists and activists. All of them achieved incredible things, yet each began life as a child with a dream. This empowering series offers

inspiring messages to children of all ages, in a range of formats. The board books are told in simple sentences, perfect for reading aloud to babies and toddlers. The hardcover versions present expanded stories for beginning readers. Boxed gift sets allow you to collect a selection of the books by theme. Paper dolls, learning cards, matching games, and other fun learning tools provide even more ways to make the lives of these role models accessible to children. Inspire the next generation of outstanding people who will change the world with Little People, BIG DREAMS!

**Early Visual Skills** Diana Williams, 2019-10-10 Now in a revised and updated second edition, Early Visual Skills is a practical manual for use with children and young people who have underdeveloped visual perceptual skills. Twelve clear and easy-to-follow sections, focusing on skills such as attention, discrimination, sequencing, concentration and memory, are filled with carefully designed activities to stimulate visual attention and discrimination skills in children with a range of developmental levels and abilities. Features include: A wide range of activities suited to both the early years and home settings Links to the Early Years Foundation Stage (EYFS) framework and topics reflecting the EYFS and the Key Stage 1 curriculum Photocopiable materials designed to document the child's development over time As most of the activities are non-verbal, they are well suited for children with limited spoken language, including EAL (English as an Additional Language) learners, the deaf, sensory impaired, or those with autism or learning difficulties. Whilst primarily designed for early years practitioners, SENCOs (Special Educational Needs Coordinator), specialist teachers, therapists and other professionals, there are

activity sheets and guidance for parents to provide them practical advice on how to stimulate visual perceptual skills at home, turning their child's everyday routines into opportunities to stimulate visual awareness.
