Conflicts and Conciliations Geoffrey Ribbans,1997 Between 1881 and 1897, Benito Pérez Galdós, generally acknowledged as Spain's greatest nineteenth-century novelist, composed some twenty contemporary novels, which Geoffrey Ribbans characterizes as the peak of his achievement. This monumental study traces the evolution of the many strands that make up one of them: the long and complex novel *Fortunata y Jacinta*. Ribbans examines the various stages of composition, not only the earlier, reconstructed Alpha version but also subsequent revisions in the much corrected handwritten text and in the printer's galleys. He treats these tentative drafts as part of the process of reaching out toward the coherent definitive text. Ribbans's analysis of such devices as the ambiguous role of the narrator, the use of free indirect style and direct dialogue, and the construction of distinctive ideolects leads to the heart of his study, the development of Galdós's characters.

Mobile Game Engines Jason Brownlee,2012-07-31 This book contains a total of 38 must-read interviews on the making of mobile games using 15 modern game engines. In this book you'll hear how hired guns and indie game developers alike build games and get them to market using off-the-shelf mobile game engines. There is no abstracting or watering down of their experiences. You will read about what they did, in their own words. The

interviews were designed to collect wisdom from game developers around the problems of choosing and working with off-the-shelf mobile game engines, and you will agree that this objective was far exceeded. You will get a snapshot into the thoughts and processes from a diverse and successful collection of mobile game developers from around the world. You will feel recharged and will be reinvigorated in your own game development efforts. The sage advice in these interviews will be useful in navigating, selecting and working with the tidal wave of promising mobile game engines available. Reading these interviews will help you find and best use the perfect engine for your mobile game and get it into the hands of an audience that loves it just as much as you.

Reduced Parenthetical Clauses as Mitigators Stefan Schneider,2007-01-01 While parentheticals attract constant attention, they very rarely constitute the main subject of monographs. This book provides a comprehensive account of reduced parenthetical clauses (RPCs) in three Romance languages. Typical French RPCs are *je crois*, *disons*, *je dirais*, *je pense*, *je sais pas*, and *je trouve*. The research draws on 22 corpora of spoken French, Italian, and Spanish comprising a total amount of 3,975,500 words. Its results consist in a typology of the relevant expressions in the three languages, in the understanding of their pragmatic function and of the factors influencing their use, and in the description of their syntactic and prosodic properties. Other findings are that RPCs are not restricted to statements but also occur in questions and that belief verbs are not as frequent as commonly assumed. Although the book is about Romance parentheticals, its conclusions are relevant for other languages.
