GET THERE BE LITE - eBook [ePub] PROF. MARVIN L. CHANEY, 2012-09-01 For many, understanding the difference between Zephaniah and Zechariah or Micah and Malachi is difficult. This book uses humor and simple poetry in the familiar form of limericks to help students grasp and remember basic facts and concepts of the Hebrew Bible. Relevant biblical passages are noted in the book margins. Here’s a sample: If a text is an answer of sorts, common sense to a query exhorts With a homely suggestion: What on earth was the question? For the text with that question comports. In the Bible, the history’s systemic, and the literature there is polemic. If you grasp those two truths, it the way truly smoothes for all else, be it etic or emic.

MEASURING AND MONITORING BIOLOGICAL DIVERSITY RONALD HEYER, MAUREEN A. DONNELLY, MERCEDES FOSTER, ROY MCDIARMID, 2014-12-16 Measuring and monitoring biological diversity is the first book to provide comprehensive coverage of standard methods for biodiversity sampling of amphibians, with information on analyzing and using data that will interest biologists in general. In this manual, nearly fifty herpetologists recommend ten standard sampling procedures for measuring and monitoring amphibian and many other populations. The contributors discuss each procedure, along with the circumstances for its appropriate use. In addition, they provide a detailed protocol for each procedure’s implementation, a list of necessary equipment and personnel, and suggestions for analyzing the data. The data obtained using these standard methods are comparable across sites and through time and, as a result, are extremely useful for making decisions about habitat protection, sustained use, and restoration—decisions that are particularly relevant for threatened amphibian populations.

EVALUATION OF CONSTRUCTION-ZONE PAVEMENT MARKING MATERIALS KENNETH R. AGENT, JERRY G. PIGMAN, 1987 The objectives of this study were to evaluate available foil-back and removable tapes as well as construction-zone raised pavement markers and to recommend materials that should be included on approved lists for use by the Kentucky Department of Highways. Tapes and markers were placed on transverse test sections and the reflectivity, durability, and appearance were observed. Tapes to be included on the approved lists for foil-back and removable tapes were recommended. Tapes manufactured by 3M, Flex-O-Lite, Cataphote, and Swarolite were included on the list of acceptable foil-back tapes. Recommended removable tapes were the 3M and Cataphote removable tapes. Stimsonite 66 and Flex-O-Lite construction-zone markers were included on the approved list for construction-zone raised pavement markers. More specific guidelines were developed to use in future evaluations of construction-zone preformed tape and markers.

GREEN-LITE G. BRUCE DOERN, GRAEME AULD, CHRISTOPHER STONEY, 2015-11-01 Anchored in the core literature on natural resources, energy production, and environmental analysis, Green-Lite is a critical examination of Canadian environmental policy, governance, and politics drawing out key policy and governance patterns to show that the Canadian story is one of complexity and often weak performance. Making a compelling argument for deeper historical analysis of environmental policy and situating environmental concerns within political and fiscal agendas, the authors provide extended discussions on three relatively new features of environmental policy: the federal-cities and urban sustainability regime, the federal-municipal infrastructure regime, and the regime of agreements with NGOs and businesses that often relegate governments to observing participants rather than being policy leaders. They probe the Harper era’s muzzling of environmental science and scientists, Canada’s oil sands energy and resource economy, and the government’s core Alberta and Western Canadian political base. The first book to provide an integrated, historical, and conceptual examination of Canadian environmental policy over many decades, Green-Lite captures complex notions of what environmental policy and green agendas seek to achieve in a business-dominated economy of diverse energy producing technologies, and their pollution harms and risks.
