**Power Sharing** Elizabeth Lillian Keating, 1998 What allows certain individuals and groups to maintain control over the actions and lives of others? Linguistic anthropologist Elizabeth Keating went to the island of Pohnpei, in Micronesia, and studied how people use language and other semiotic codes to reproduce and manipulate status differences. The result is this inside view of how language works to create power and social inequality. This book challenges widely held theories on the nature of social stratification, including women’s roles in creating hierarchy.

**Stories, Visions and Values in Voluntary Organisations** Christina Schwabenland, 2016-04-01 Christina Schwabenland’s book is based on extensive research into stories told by people working in voluntary organizations in the UK and in India. With a view to social change, the author employs hermeneutic methods to explore how stories create and sustain meaning and how storytelling contributes to the making and remaking of our social world. Specific topics addressed in the book include the role of storytelling in starting a new organization, managing hope and despair, empowering participatory leadership, and stimulating creativity and innovation. **Becoming of Two Minds about Liberalism** Dwight R. Boyd, 2015-12-22 Integrating scholarly essays and personal reflections, *Becoming of Two Minds* chronicles a unique philosophical odyssey, a developmental journey of coming to recognize the inadequacy of liberalism in the face of some egregious social problems such as racism, while also appreciating its strengths. A Personal Prologue describing the main intellectual influences on the author locates the origins of the journey and functions as a backdrop for its interpretation. Fifteen chronologically organized essays, divided into three parts, identify significant positions of contrast between the two minds, establishing the direction of the journey and indications of change. Essays in Part I reflect early allegiance to liberalism and explore its core ideas as they should be interpreted to guide moral education. Those in Part II express disaffection with that allegiance, taking a distinctly critical stance toward liberalism. Part III then consists of essays that represent attempts to come to terms with the becoming of two minds exemplified in the tension between the ideas about liberalism expressed in Parts I and II. A Personal Preface also introduces each of the fifteen essays. These Prefaces address questions such as why the problem of the essay was chosen, why it was approached in a particular way, and what place the essay assumes in the direction the author’s journey takes.

**Engenderings** Naomi Scheman, 2014-02-25 Naomi Scheman argues that the concerns of philosophy emerge not from the universal human condition but from conditions of privilege. Her book represents a powerful challenge to the notion that gender makes no difference in the construction of philosophical reasoning. At the same time, it criticizes the narrow focus of most feminist theorizing and calls for a more inclusive form of inquiry.

**Transformative Approaches to Social Justice Education** Nana Osei-Kofi, Bradley Boovy, Kali Furman, 2021-08-04 Transformative Approaches to Social Justice Education is a book for anyone with an interest in teaching and learning in higher education from a social justice perspective and with a commitment to teaching all students. This text offers a breadth of disciplinary perspectives on how to center difference, power, and systemic oppression in pedagogical practice, arguing that these elements are essential to knowledge formation and to teaching. Transformative Approaches to Social Justice Education is structured as an ongoing conversation among educators who believe that teaching from a social justice perspective is about much more than the type of readings and assignments found on course syllabi. Drawing on the broadest possible definition of curriculum transformation, the volume demonstrates that social justice education is about both educators’ social locations and about course content. It is also about knowing students and teaching beyond the traditional classroom to meaningfully include local communities, social movements, archives, and colleagues in student and academic affairs. Premised on the notion that continuous learning and growth is critical to educators with deep commitments to fostering critical consciousness through their teaching, Transformative Approaches to Social Justice Education offers interdisciplinary and innovative collaborative approaches to curriculum transformation that build on and extend existing scholarship on social justice education. Newly committed and established social justice pedagogues share their experiences taking up the many difficult

questions pertaining to what it means for all of us to participate in shaping a more just, shared future.

**The Confidence Map** Peter Atwater,2023-07-25 A groundbreaking framework for making better decisions by understanding – and mastering – confidence. What does our desire for certainty and control have to do with our decision-making? According to behavioral economics pioneer Peter Atwater, the answer is simple: everything. In The Confidence Map, Atwater explores the hidden role of confidence in the choices we make, and why events described as being unprecedented are often entirely predictable—if we know what to look for. Using compelling stories from the past and present, Atwater shows readers how to apply the same tools he teaches the world's leading institutional investors, corporations, and policymakers to help them make sense of complex situations and optimize strategy. You will learn: • How psychological distance consistently affects the choices we make • Why Me-Here-Now decision-making is such a powerful force • What happens at confidence peaks that leads to our downfall • The five ways we respond to extreme vulnerability • When consumers' feelings of certainty and control - not price - drive demand The Confidence Map is a book about why we do what we do, where we can and cannot trust our natural instincts, and how we can make sense of a world that too often feels senseless. Whether you're investing in technology stocks, designing menu items for a fast-food franchise, or running an emergency room, Atwater offers an all-weather guide to avoid psychological traps, spot opportunities, and navigate the road ahead with clarity and purpose.

**The Shared World** Axel Seemann,2019-05-07 A novel treatment of the capacity for shared attention, joint action, and perceptual common knowledge. In The Shared World, Axel Seemann offers a new treatment of the capacity to perceive, act on, and know about the world together with others. Seemann argues that creatures capable of joint attention stand in a unique perceptual and epistemic relation to their surroundings; they operate in an environment that they, through their communication with their fellow perceivers, help constitute. Seemann shows that this relation can be marshaled to address a range of questions about the social aspect of the mind and its perceptual and cognitive capacities. Seemann begins with a conceptual question about a complex kind of sociocognitive phenomenon—perceptual common knowledge—and develops an empirically informed account of the spatial structure of the environment in and about which such knowledge is possible. In the course of his argument, he addresses such topics as demonstrative reference in communication, common knowledge about jointly perceived objects, and spatial awareness in joint perception and action.

**Jesus and the Peasants** Douglas E. Oakman,2008-01-01 While some of the chapters focus on systemic issues, others probe the depths of individual Gospel passages. The author's keen eye for textual detail, archaeological data, comparative materials, and systemic overviews make this volume a joy for anyone interested in understanding Jesus in his own context. The volume is organized into three interrelated parts: 1) political economy and the peasant values of Jesus, 2) the Jesus traditions within peasant realities, and 3) the peasant aims of Jesus.

**Critical Methods in Terrorism Studies** Priya Dixit,Jacob L. Stump,2015-06-26 This book shows how to use a range of critical approaches to conduct research on terrorism. Featuring the work of researchers who have already utilized these methods to study terrorism, it includes a diverse range of critical methodological approaches – including discourse analysis, feminist, postcolonial, ethnographic, critical theory, and visual analysis of terrorism. The main objectives of the book are to assist researchers in adopting and applying various critical approaches to the study of terrorism. This goal is achieved by bringing together a number of different scholars working on the topic of terrorism from a range of non-variables-based approaches. Their individual chapters discuss explicitly the research methods used and methodological commitments made by the authors, while also illustrating the application of their particular critical perspective to the topic of terrorism. The authors of each chapter will discuss (1) why they chose their specific critical method; (2) how they justified their methodological stance; (3) how they conduct their research; (4) and, finally, an example of the research. This book will be essential reading for students of terrorism studies and critical terrorism studies, and highly recommended for students of political violence, security studies and IR.
