**Mousepads, Shoe Leather, and Hope** Zephyr Teachout,Thomas Streeter,2015-12-03 Howard Dean's campaign for president changed the way in which campaigns are run today. With an unlikely collection of highly talented and motivated staffers drawn from a variety of backgrounds, the Dean campaign transformed the way in which money was raised and supporters galvanized by using the Internet. Surprisingly, many of the campaign staff members were neither computer whizzes nor practiced political operatives, even though that is how some of them are identified today. This book allows key individuals in the campaign the chance to tell their stories with an eye to documenting the Internet campaign revolution and providing lessons to future campaigns. Howard Dean's inspirational statement of what it took for his campaign to get as far as it did—mousepads, shoe leather, and hope—holds great wisdom for anyone campaigning today, especially the 2008 presidential candidates.

**Taking Our Country Back** Daniel Kreiss,2012-08-06 Taking Our Country Back presents the previously untold history of the uptake of new media in Democratic electoral campaigning over the last decade. Drawing on interviews with more than sixty political staffers, fieldwork during the 2008 primaries and general election, and archival research, Daniel Kreiss shows how a group of young, technically-skilled Internet staffers came together on the Howard Dean campaign and created a series of innovations in organization, tools, and practice that have changed the elections game. He charts how these individuals carried their innovations across Democratic politics, contributing to a number of electoral victories, including Barack Obama's historic bid for the presidency. In revealing this history, the book provides a rich empirical look at the communication tools, practices, and infrastructure that shape contemporary online campaigning. Taking Our Country Back is a serious and vital analysis, both on-the-ground and theoretical, of how a small group of visionary people transformed what campaigning means today and how technical and cultural work coordinates collective action.

**Here Comes Everybody** Clay Shirky, 2008 Discusses and uses examples of how digital networks transform the ability of humans to gather and cooperate with one another.

*The Networked Citizen* Giovanni Navarria, 2019-10-28 This book investigates the changing meanings of power and politics in the Internet age and questions whether the political category of the citizen still has a meaningful role to play in the highly-mediated dynamics of an increasingly networked world. To answer such questions, the book analyses and compares the impact of the Internet on the relationship between state, citizens, and politics in three countries: the USA, Italy, and China. The book’s journey starts in the mid-90s and ends in 2016. It pays particular attention to Obama 2008 and Trump 2016 presidential campaigns, the ascendance to power in Italy of the anti-establishment Five Star Movement, and to the enduring Chinese government’s struggle to control the Internet public opinion. The book challenges the traditional understanding of power through which the strong typically prevails over the weak. This leads to a clearer understanding of the wider role citizens can play (and must play) in a networked political sphere, while it also warns the reader on the many risks citizens face in a post-truth world. The book challenges the traditional understanding of power through which the strong typically prevails over the weak. This leads to a clearer understanding of the wider role citizens can play (and must play) in a networked political sphere.
