Time, Love, Memory Jonathan Weiner, 2000-04-04 The story of Nobel Prize-winning discoveries regarding the molecular mechanisms controlling the body's circadian rhythm. How much of our fate is decided before we are born? Which of our characteristics is inscribed in our DNA? Weiner brings us into Benzer's Fly Rooms at the California Institute of Technology, where Benzer, and his associates are in the process of finding answers, often astonishing ones, to these questions. Part biography, part thrilling scientific detective story, *Time, Love, Memory* forcefully demonstrates how Benzer's studies are changing our world view--and even our lives. Jonathan Weiner, winner of the Pulitzer Prize for *The Beak of the Finch*, brings his brilliant reporting skills to the story of Seymour Benzer, the Brooklyn-born maverick scientist whose study of genetics and experiments with fruit fly genes has helped revolutionize our knowledge of the connections between DNA and behavior both animal and human.

Basic and Applied Memory Research Douglas J. Herrmann, Chris Hertzog, Cathy McEvoy, Paula Hertel, Marcia K. Johnson, 2013-11-19 Basic researchers unlock the secrets of nature; applied researchers unlock the means by which those secrets of nature can change people's lives. Neither basic nor applied research has an independent impact. These volumes examine the convergence of basic and applied research in the field of memory. Volume 1: Theory and Context, focuses on the methods for understanding and applying basic memory theory, while Volume 2: Practical Applications, expands the understanding of practical memory research by providing in-depth research examples and findings. If the science of memory is to make a significant contribution to society, coordinating our basic and applied efforts and determining how they complement each other become of paramount importance. These volumes will help in this regard--both as textbooks demonstrating how to investigate memory and apply basic memory theory, and as reference sources leading to a better

understanding of certain problems in basic and applied memory research. Readers of these volumes will gain a thorough grasp of the way major themes relate to basic and applied research collaboration, how programmatic basic and applied research can be conducted on particular memory problems, and the manner in which basic and applied work in major problem areas has been incorporated into the field of memory. Both volumes present important information that will be indispensable to researchers and students alike.

Memory and Survival the French Cinema of Krzysztof Kieslowski Emma Wilson, 2017-12-02 Kieslowski's last films have indelibly marked the past decade. His cinema has renewed the representation of the human subject and emotion in film: space and luminous surface reveal the finest, most fragile impressions of states of mind and human consciousness. This study is the first to offer specific focus on Kies'lowski's last films, on his French-language cinema and its place within the broader context of French film-making. Engaging with Deleuze's discussions of the time-image, and recent work in trauma theory, Emma Wilson offers radical insights into the innovation in Kies'lowski's explorations of memory, temporality, loss and desire. A charged defence of Kies'lowski's work, *Memory and Survival* offers new readings of this cinema of blind chance and fleeting beauty.

Superior Memory Elizabeth Valentine, John Wilding, 2013-06-20 This book examines the nature and causal antecedents of superior memory performance. The main theme is that such performance may depend on either specific memory techniques or natural superiority in the efficiency of one or more memory processes. Chapter 2 surveys current views about the structure of memory and discusses whether common processes can be identified which might underlie general variation in memory ability, or whether distinct memory subsystems

exist, the efficiency of which varies independently of each other. Chapter 3 provides a comprehensive survey of existing evidence on superior memory performance. It examines techniques which underlie many examples of unusual memory performance, and concludes that not all this evidence is explicable in terms of such techniques. Relations between memory ability and other cognitive processes are also discussed. The remainder of the book describes the authors' own studies of a dozen memory experts, employing a wide variety of short- and long-term memory tasks. These studies provide a much larger body of data than previously available from studies of single individuals, usually restricted to a narrow range of tasks and rarely involving any systematic study of long-term retention. The authors argue that in some cases unusual memory ability is not dependent on the use of special techniques. They develop some objective criteria for distinguishing between subjects who demonstrate natural superiority and those strategists who depend on techniques. Natural superiority was characterised by superior performance on a wider range of tasks and better long-term retention. The existence of a general memory ability was further supported by a factor analysis of data from all subjects, omitting those who described highly-practised techniques. This analysis also demonstrated the independence of initial encoding and retention processes. The monograph raises many interesting questions concerning the existence and nature of individual differences in memory ability (a previously neglected topic), their relation to other cognitive processes and implications for theories concerning the structure of memory.

Psalms Bible Study Guide plus Streaming Video Sandra L. Richter, 2021-06-22
Experience fresh connections to contemporary worship and devotional practices in this eight-session video-based study of Psalms with Bible scholar Sandra Richter (streaming video included). The book of Psalms is well-known and well-worn. It is the Old Testament book most often quoted in the New Testament, and its quotations can be found everywhere from John Milton to Star Trek to Congressional speeches. Why so much attention? The Church Father Athanasius said it best—most of Scripture speaks to us, but the Book of Psalms speaks for us. This study guide has everything you need for a full Bible study experience, including: An individual access code to stream all eight video sessions online (you don't need to buy a DVD!). The study guide itself—with discussion and reflection questions, video notes, and study sections. Illuminated manuscript activities. In-depth breakdown of specific

psalms. The Book of Psalms Study (part of the Epic of Eden series) will open up the poetry and prayers of Scripture in a whole new and deeply sensitive way. Learning from Professor Richter's crystal-clear teaching, you'll discover: How you can trust God with all your emotions: grief, anger, praise, fear, and hope. How and why the people of Israel used the Psalms in worship. Why the book of Psalms is critical in our devotional lives today. How the Psalms can deepen your prayer life. Streaming video access code included. Access code subject to expiration after 12/31/2027. Code may be redeemed only by the recipient of this package. Code may not be transferred or sold separately from this package. Internet connection required. Void where prohibited, taxed, or restricted by law. Additional offer details inside.
