Policing, Mental Illness and Media Katrina Clifford, 2021-02-26 This book examines the complexities of the relationship between policing and mental health – in Australia especially – including the circumstances that lead to police use of force, and the ways in which news media typically report deaths resulting from police contact with people in mental health crisis. When a vulnerable member of society is killed by the police, it is only natural that questions are asked about the behaviour and actions of those involved. Police are, after all, meant to be the 'protectors of society'. By virtue of these circumstances, fatal encounters between police and mentally ill individuals in crisis often attract heightened media and legal attention, as well as public debate. Drawing together research interviews and extensive case study analysis, the book explores the conditions for the production of this news media coverage, the ways in which it can shape public perceptions of police-involved mental health crisis interventions, and the potential impacts on those involved in and affected by such events. The implications for police agencies are also considered in the context of how they respond to vulnerable people in the community, while being in the media spotlight. This book will appeal to students, scholars and practitioners in journalism, media studies, policing, criminology, sociology, and mental health as well as those interested in learning about the relationship between policing, mental illness, and media representation.

The Essential Guide to the Internet for Health Professionals Sydney Chellen, 2015-05-11 First published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

The Essential Guide to the Internet for Health Professionals Sydney. S. Chellen, 2022-02-14 There is a wealth of health information on the Internet. Today's students of health studies and all health care professionals must be able to use this valuable resource and extract from it what is most relevant and useful. In order for them to do this purposefully and skilfully, they need to have a thorough understanding of how the system works and have the ability to navigate their way around it with ease. The Essential Guide to the Internet for Health Professionals is a superb photocopyable resource for lecturers and a self instructional guide for students. It shows students how to: get online; navigate the World Wide Web; find health information on the Internet; communicate with other health professionals; access free health and medical resources; publish on the web; use online help with health studies assignments; search for jobs. Each unit contains easy-to-follow activities and photocopyable worksheets.

The Well-Being Project Jean Campbell, Ron Schraiber, In 1987 a groundbreaking survey called The Well-Being Project was conducted by the California Network of Mental Health Clients under contract to the Office of Prevention of the California Department of Mental Health to explore what factors promote or deter the well-being of those diagnosed/labeled as "mentally ill." Initially, it had been assumed that the analysis of the survey data as well as the final written report would be awarded to a university or other professional research group. Much to the surprise of some, and in the spirit of the disability rights movement rallying cry of "nothing about us without us," the successful proposal was written by mental health client researchers Jean Campbell and Ron Schraiber on behalf of the California Network of Mental Health Clients. The study became known as The

Well-Being Project: Mental Health Clients Speak for Themselves, and was published in 1989; additionally, an award winning documentary "People Say I'm Crazy" based on the study's findings was produced as well as a compendium book to the video with the same title.

The Essential Guide to the Internet Sydney S. Chellen, 2000 The Essential Guide to the Internet for Health Professionals is a superb photocopiable resource for lecturers. Each chapter contains easy-to-follow activities and photocopiable worksheets.

American Psychiatry After World War II (1944-1994) Roy W. Menninger, John C. Nemiah, 2008-11-01 The history of psychiatry is complex, reflecting diverse origins in mythology, cult beliefs, astrology, early medicine, law religion, philosophy, and politics. This complexity has generated considerable debate and an increasing outflow of historical scholarship, ranging from the enthusiastic meliorism of pre-World War II histories, to the iconoclastic revisionism of the 1960s, to more focused studies, such as the history of asylums and the validity and efficacy of Freudian theory. This volume, intended as a successor to the centennial history of American psychiatry published by the American Psychiatric Association in 1944, summarizes the significant events and processes of the half-century following World War II. Most of this history is written by clinicians who were central figures in it. In broad terms, the history of psychiatry after the war can be viewed as the story of a cycling sequence, shifting from a predominantly biological to a psychodynamic perspective and back again -- all presumably en route to an ultimate view that is truly integrated -- and interacting all the while with public perceptions, expectations, exasperations, and disappointments. In six sections, Drs. Roy Menninger and John Nemiah and their colleagues cover both the continuities and the dramatic changes of this period. The first four sections of the book are roughly chronological. The first section focuses on the war and its impact on psychiatry; the second reviews postwar growth of the field (psychoanalysis and psychotherapy, psychiatric education, and psychosomatic medicine); the third recounts the rise of scientific empiricism (biological psychiatry and nosology); and the fourth discusses public attitudes and perceptions of public mental health policy, deinstitutionalization, antipsychiatry, the consumer movement, and managed care. The fifth section examines the development of specialization and differentiation, exemplified by child and adolescent psychiatry, geriatric psychiatry, addiction psychiatry, and forensic psychiatry. The concluding section examines ethics, and women and minorities in psychiatry. Anyone interested in psychiatry will find this book a fascinating read.

Face Reading in Chinese Medicine - E-Book Lillian Bridges, 2012-07-10 An exciting new, full-colour edition of Face Reading in Chinese Medicine featuring over 200 colour photographs and practical instructions on how to conduct a face reading! Face reading has been part of Traditional Chinese Medicine for many centuries, and Professor Lillian Bridges is a popular academic and international lecturer on the subject who gained her fascinating knowledge through her family line of Master Face Readers in China. Based on an understanding of the shapes, markings and features of a face, practitioners can learn about the health and life of a patient relating to the principles of Chinese medicine. In addition to understanding how the body's internal functions - physical, psychological and emotional - can be seen on a face, practitioners can also learn how to evaluate Shen to understand non-verbal expressions. Technical and detailed information is presented in an upbeat, insightful and highly readable manner. This was the first book to focus on the deeper aspects of face reading and diagnosis, this edition includes ancient Taoist knowledge regarding the Original Face and Facial Jing and Qi markers which have previously only been taught through the oral tradition. Clear discussions demonstrate how this technique can be used as a supplement to other diagnostic tools in Traditional Chinese Medicine. Social Support and Health in the Digital Age Nichole Egbert, Kevin B Wright, 2019-12-16 Social Support and Health in the Digital Age discusses how the information age has revolutionized nearly every facet of human communication--from the ways in which people purchase products to how they meet and fall in love. These exciting new communication technologies can both unite and divide us. People who are separated by great distances can now communicate with each other in real time, whereas parents often find themselves competing with smartphones and tablets for their children's attention. This book explores the many ways that digital communication media, such as online forums, social networking sites, and mobile applications, enhance and constrain social support in health-related contexts. We already know a great deal about how the Internet has altered how people search for health information, but less about how people seek and receive social support in this new age of information, which is critical for maintaining our physical, mental, and emotional wellbeing.

OverSuccess Jim Rubens, James M. Rubens, 2008 Why are one in three American

adults pervasively dissatisfied with their lives? Why is major depression seven times more likely among those born after 1970 than their grandparents? Why are one in four of us addicted to at least one substance or behavior? Why is America drowning in record personal and public debt? Why did over 100,000 people humiliate themselves this year auditioning for Fox's American Idol? Why are 80 percent of women unhappy with their bodies? What is it about contemporary America that connects the swelling incidence of depression, behavioral addictions, eating disorders, debt, materialism, sleep deprivation, family breakdown, rudeness, fame fixation, ethical collapse, mistrust, and monstrous acts of personal violence? Drawing from emerging science in several fields and insights about our transformed social lives, Rubens explains how genes, commercial culture, and global hyper-competition have locked tens of millions of Americans into an unwinnable success benchmarks race and unleashed an epidemic of status defeat. OverSuccess shows how and why the resulting social and psychological pathologies are different for baby boomers, men, and women. Offering hope for our future, Rubens outlines 20 ways that individuals, businesses, and voluntary organizations can satisfy the American drive for recognition and personal achievement without the toxic burdens of OverSuccess. These cures range from holding the door for strangers and somatic cell gene therapy, to responsible displays of wealth and building village-scale social and business organizations.
