Handbook for Rooftop Solar Development in Asia
Asian Development Bank, 2015-01-01 Drawing on the Asian Development Bank's experience installing the rooftop solar photovoltaic system at its headquarters, the Handbook for Rooftop Solar Development in Asia hopes to demystify the process of developing solar photovoltaic projects in urban areas. The handbook provides detailed descriptions and guidance for all stages of development, including initial prefeasibility assessment, design, financing, procurement, and operations and maintenance. The Asian Development Bank hopes that entities looking to take advantage of the benefits of solar photovoltaic systems would find the development process made transparent and streamlined, and that this handbook would encourage the spread of solar photovoltaic systems in cities throughout developing Asia and the Pacific.

Cost-Benefit Analysis for Development Asian Development Bank, 2013-01-01 The Asian Development Bank (ADB) has been continuously undertaking measures to enhance the effectiveness of its operations. To improve projects both at the preparation and implementation stages, ADB issued the Guidelines for Economic Analysis of Projects in 1997 as a means to enhancing project quality at entry. The conduct of proper economic analysis helps ensure the efficient use of development funds and public resources and thereby increase aid effectiveness. This practical guide is a supplement to the Guidelines for the Economic Analysis of Projects. It provides an overview of

recent methodological developments in cost-benefit analysis as well as suggested improvements in the economic analysis of projects in selected sectors through case studies. These case studies illustrate the application of suggested methodologies, taking into account sector-specific needs, as well as difficulties faced by practitioners in terms of data and time constraints during project processing. It also aims to contribute to ADB's capacity building initiatives as this will be the main reference material for conduct of economic analysis.

Innovative Infrastructure Financing Through Value Capture in Indonesia Asian Development Bank, 2021-05-25 This report proposes a new method to increase infrastructure investment based on the concept of value capture in Indonesia. Indonesia needs significant additional infrastructure investment to sustain its economic growth. However, the COVID-19 pandemic has further limited the fiscal space of the government. The report studies how Indonesia's existing policies and regulations can be used to build a value capture framework that ensures the maximization of the social, economic, and environmental value of infrastructure investments. The framework focuses on strategies to deliver infrastructure projects that create greater value and, at the same time, generate funding for up-front investment.

Disaster Health Management Gerry FitzGerald, Mike Tarrant, Peter Aitken, Marie Fredriksen, 2016-09-13 Disaster health is an emerging field that focuses on developing prevention, preparation, response and recovery systems for dealing with health

problems that result from a disaster. As disasters worldwide differ in their nature, scope and cultural context, a thorough understanding of the fundamental tenets of sound disaster health management is essential for both students and practitioners to participate confidently and effectively in the field. Disaster Health Management is the first comprehensive textbook to provide a standard guide to terminology and management systems across the entire spectrum of disaster health. Authored by experienced educators, researchers and practitioners in disaster health management, this textbook provides an authoritative overview of: The conceptual basis for disaster management Systems and structures for disaster management Managing disasters through the continuum of preparedness, response and recovery The variations associated with both natural and technological disasters The strategic considerations associated with leadership, research, education and future directions. Using Australasian systems and structures as examples of generic principles which will find application globally, Disaster Health Management is an essential text for both undergraduate and postgraduate students, as well as for professionals involved in all aspects of disaster management.

Poverty, Inequality and Development Alain de Janvry, Ravi Kanbur, 2006-06-09 This collection of essays honors a remarkable man and his work. Erik

Thorbecke has made significant contributions to the microeconomic and the macroeconomic analysis of poverty, inequality and development, ranging from theory to empirics and policy. The essays in this volume display the same range. As a collection they make the fundamental point that deep understanding of these phenomena requires both the micro and the macro perspectives together, utilizing the strengths of each but also the special insights that come when the two are linked together. After an overview section which contains the introductory chapter and a chapter examining the historical roots of Erik Thorbecke's motivations, the essays in this volume are grouped into four parts, each part identifying a major strand of Erik's work—Measurement of Poverty and Inequality, Micro Behavior and Market Failure, SAMs and CGEs, and Institutions and Development. The range of topics covered in the essays, written by leading authorities in their own areas, highlight the extraordinary depth and breadth of Erik Thorbecke's influence in research and policy on poverty, inequality and development.

Acknowledgements These papers were presented at a conference in honor of Erik Thorbecke held at Cornell University on October 10-11, 2003. The conference was supported by the funds of the H. E. Babcock Chair in Food, Nutrition and Public Policy, and the T. H. Lee Chair in World Affairs at Cornell University.

Thinking Through Things Amiria Henare, Martin Holbraad, Sari Wastell, 2007-01-24 Drawing upon the work of some of the most influential theorists in the field, Thinking Through Things demonstrates

the quiet revolution growing in anthropology and its related disciplines, shifting its philosophical foundations. The first text to offer a direct and provocative challenge to disciplinary fragmentation - arguing for the futility of segregating the study of artefacts and society - this collection expands on the concerns about the place of objects and materiality in analytical strategies, and the obligation of ethnographers to question their assumptions and approaches. The team of leading contributors put forward a positive programme for future research in this highly original and invaluable guide to recent developments in mainstream anthropological theory.

Poverty in the Philippines Asian Development Bank, 2009-12-01 Against the backdrop of the global financial crisis and rising food, fuel, and commodity prices, addressing poverty and inequality in the Philippines remains a challenge. The proportion of households living below the official poverty line has declined slowly and unevenly in the past four decades, and poverty reduction has been much slower than in neighboring countries such as the People's Republic of China, Indonesia, Thailand, and Viet Nam. Economic growth has gone through boom and bust cycles, and recent episodes of moderate economic expansion have had limited impact on the poor. Great inequality across income brackets, regions, and sectors, as well as unmanaged population growth, are considered some of the key factors constraining poverty reduction efforts. This publication analyzes the causes of poverty and recommends ways to accelerate poverty reduction and achieve more

inclusive growth. it also provides an overview of current government responses, strategies, and achievements in the fight against poverty and identifies and prioritizes future needs and interventions. The analysis is based on current literature and the latest available data, including the 2006 Family Income and Expenditure Survey.

Subversive Lives Susan F. Quimpo,Nathan Gilbert Quimpo,2016-07-29 From the 1960s to the 1990s, seven members of the Quimpo family dedicated themselves to the anti-Marcos resistance in the Philippines, sometimes at profound personal cost. In this unprecedented memoir, eight siblings (plus one by marriage) tell their remarkable stories in individually authored chapters that comprise a family saga of revolution, persistence, and, ultimately, vindication, even as easy resolution eluded their struggles. *Subversive Lives* tells of attempts to smuggle weapons for the New People's Army (the armed branch of the Communist Party of the Philippines); of heady times organizing uprisings and strikes; of the cruel discovery of one brother's death and the inexplicable disappearance of another (now believed to be dead); and of imprisonment and torture by the

military. These stories show the sacrifices and daily heroism of those in the movement. But they also reveal its messy legacies: sons alienated from their father; daughters abused by the military; friends betrayed; and revolutionary affection soured by intractable ideological differences. The rich and distinctive contributions span the martial law years of Ferdinand Marcos's rule. *Subversive Lives* is a riveting and accessible primer for those unfamiliar with the era, and a resonant history for those with a personal connection to what it meant to be Filipino at that time, or for anyone who has fought political repression.

From Hand to Mouth Michael C. Corballis, 2002
Writing with wit and eloquence, Corballis makes nimble reference to literature, mythology, natural history, sports, and contemporary politics as he explains in fascinating detail what is now known about the evolution of language. Line illustrations.

Sustainable Dwelling Gérald Ledent, Chloé Salembier, Damien Vanneste, 2020-01-23
This book examines the social and spatial dimensions of dwelling from the perspective of sustainability. This publication avoids the traditional energy and technological dimensions of sustainability to position the notion of sustainable dwelling at the crossroads of spatial polyvalence and residents' empowerment. In the field of housing, this publication identifies the recurrent properties of 'sustainable space' and the variety of the socio-cultural practices that can embody them. Its purpose is to comprehend how the concept of

sustainability is reflected in housing spaces as well as to analyse how inhabitants put those spaces to the test.

The Making of the Philippines Frank

Senauth, 2012-03-13 THE MAKING OF THE PHILIPPINES
BY FRANK SENAUTH The Filipino people are a friendly lot of people and in their country of the Philippines, they are very poor. Their great object is to immigrate to other countries that will have them. If they are accepted in another country, they really work hard in their new country. The majority of the Filipino people are of Malay stock descendents of Indonesians stocks who migrate to the islands long before the Christian era. The most significant ethnic minority group is the Chinese, who have played an important role in commerce since the ninth century, when they first came to the islands to trade. As a result of intermarriage and many Filipinos have some Chinese and Spanish ancestry, and Americans and Spaniards constitute the next largest alien minorities in the country. Bless all the Filipinos who made it to another countries, and they are helping their families financially. They know what it is to survive and most of them would start their own business in another country. They are hard working and would do anything in their power to make life more enjoyable. The present President Benigno Aquino III is the first president to up-lift his people, just like his late mother Corazon Aquino did, when she used her magic wand to up-lift her people. She may be long gone, but she still left a lot of goodness behind. Bless her soul!
