**Feedback That Works: How to Build and Deliver Your Message**, First Edition Sloan R.

Weitzel,2018-05-01 This is the first edition of this title. A revised edition has now been released (9781604919219). Effective feedback, whether it's meant for your boss, your peers, or your direct reports, is built around three ideas. One, focus on the situation. Two, describe the other person's behavior you observed in that situation. And third, describe the impact that behavior had on you. The result is a message that is clear and that can inspire action and productive change

**Designing Embedded Internet Devices** Dan Eisenreich,Brian DeMuth,2003 Embedded internet and

internet appliances are the focus of great attention in the computing industry, as they are seen as the future of computing. The design of such devices presents many technical challenges. This book is the first guide available that describes how to design internet access and communications capabilities into embedded systems. It takes an integrated hardware/software approach using the Java programming language and industry-standard microcontrollers. Numerous illustrations and code examples enliven the text. This book shows how to build various sensors and control devices that connect to the TINI interfaces, explains how to write programs that control them in Java, and then ties them all together in practical applications. Included is a discussion on how these technologies work, where to get detailed specifications, and ideas for the reader to pursue beyond the book. The first guide to designing internet access and communications capabilities into embedded systems Takes an integrated hardware/software approach using the Java programming language an industry-standard

**U. S. Army Armored Division 1943-1945** Yves J. Bellanger,2010-06-01 The author presents an extremely detailed record of the organization, doctrine, and equipment of the Armored Division of September 1943. He examines each unit of the division. A chapter is dedicated to the Tank Battalion, Armored Infantry Battalion, but also Maintenance and Medical Battalions. The author examines the organization and tactical doctrine of each unit and studies the doctrine of employment of the unit, as well as the duties of key personnel. Each sub-unit is presented by lists of personnel, weapons, vehicles, and equipment. The book includes 146 charts depicting the organization of all units. In each chapter, a special paragraph examines the modifications made in the field by armored divisionâ

units, as found in unit reports, and histories, and veterans recollections. This is an essential reference for re-enactors, modellers, wargamers, researchers, and all those who require a detailed guide to the U.S. Armored Division during WWII.

**Soul Communication** Zhi Gang Sha,2008-10-14 Shares insights into the author's work as an integrative medicine practitioner, explaining how the applications of certain spiritual principles and laws can enable healing benefits in all areas of a life.

**Between Self and Community** Junehui Ahn,2023-07-14 Between Self and Community investigates the early childhood socialization process in a rapidly changing, globalizing South Korea. Based on long-term ethnographic fieldwork in a South Korean preschool, it shows how both children and teachers interactively navigate, construct, and reconstruct their own multifaceted and sometimes conflicting models of what makes “a good child” amid Korea’s shifting educational and social contexts.

Junehui Ahn details the conflicting and competing ways in which the ideologies of new personhood are enacted in actual everyday socialization contexts and reveals the confusions, dilemmas, and ruptures that occur when globally dominant ideals of childhood development are superimposed onto local experiences. *Between Self and Community* pays special attention to the way children, as active agents of socialization, create, construe, and sustain their own meanings of their personhood, thereby highlighting the dynamism children and their culturally rich peer world create in South Korea's shifting socialization terrain.
