Agreeable News from Persia D.T. Potts,2022-09-06 Eighteenth and nineteenth century European, British and American newspapers constitute a rich and largely untapped source of contemporary, often eyewitness accounts of historical events and opinions concerning Iran from the late Safavid (1712) through the Qajar (c. 1797-1920) period. This study collects and annotates thousands of articles published in the Colonial and early Republican American newspapers, from the first mention of events in Persia in the American press (1712) to the death of Mohammad Shah (1848), unlocking for the first time a wealth of information on Iran and its place in the world during the 18th and early 19th century.

American Legion Baseball William E. Akin,2021-11-22 In the wake of the 1919 White Sox scandal and the suspension for life of eight players, baseball saw a precipitous decline in popularity, especially among America's youth. To combat this, a group of World War I veterans who were members of the newly formed American Legion created an organization to promote teenage interest in baseball. Led by John L. Griffith, who became the first commissioner of the Big Ten Conference, the Legion undertook the revival of baseball. In the 1920s and through the Great Depression and World War II, Legion baseball grew steadily. By 1950 it had become the principal training ground for major league players, boasting at its peak more than 16,000 teams across the country. Tracing the long history of this uniquely American institution, this work details each year's American Legion World Series and the ups and downs of participation over nearly a century.

Southern Ohio Legends & Lore James A. Willis,2022-08-15 Scary, mysterious & just plain weird stories from Southern Ohio The southern portion of the Buckeye State has long attracted its fair share of colorful characters and odd occurrences. Infamous bootlegger George Remus rose to power shortly after moving to Cincinnati. Roy Rogers, King of the Cowboys, was born and raised in southern Ohio. Some even say creatures not of this planet are drawn to the area, which has had numerous UFO sightings. In the same region, an unassuming university professor got away with murder, an eccentric built his version of a European castle using nearby river rocks, and a headless

motorcycle ghost roams a rural roadway. Ride along with author James A. Willis as he ventures into Southern Ohio in search of all things strange and spooky.

Her friends are divided and scattered, and the Black Swan wants Sophie to focus on their projects. But her instincts are leading her somewhere else. Stellarlune—and the mysterious Elysian—might be the key to everything. But finding truth in the Lost Cities always requires sacrifice. And as the Neverseen's plans sharpen into terrifying focus, it appears that everyone has miscalculated. The Lost Cities' greatest lie could destroy everything. And in the battle that follows, only one thing is certain: nothing will ever be the same.

College in the Crosshairs Brian O. Hemphill, Brandi Hephner LaBanc, 2023-07-03 Gun violence – whether rampage shootings, homicides or suicides – is a potential reality all campuses have to face. This book provides leaders in higher education – and particularly those in student affairs – with data about past incidents, an analysis of trends, and background on the national debate about gun policies and how they impact colleges, state by state. It importantly raises issues about student psychological development, mental health, and the prevalence of alcohol and substance abuse on campus, to better inform discussion about allowing guns on campus and concealed carry. It concludes by sharing strategies for averting gun-related tragedies, and offering models for responding when they occur, based on lessons learned and best practices. The book addresses concealed carry legislation and its impact on campus policies by state, examining the concerns of administrators as they discharge their duty of care to students and comply with legal and regulatory frameworks. Asking “Are our students developmentally ready to make a morally sophisticated, life-changing decision to use firearms in response to a real or perceived threat?”, it offers important perspectives and scientific data, so far absent from the debate, to shape the ongoing conversation with lawmakers and the public about what it takes to keep college communities safe. In addressing risk and prevention, contributors cover the relationship between violence and mental health, and the need to establish comprehensive strategic plans and a preventative framework that promotes help-seeking for those in need before they reach the point of crisis, as well as a campus-wide risk assessment team, stressing the importance of cultivating a community-wide approach to campus safety by empowering members to report suspicious behavior. They also offer guidance on improving effective behavior intervention and case management processes. The book concludes by outlining best practices, and providing guidance on developing an emergency plan, practicing and testing systems, and creating a robust communications strategy. Individual chapters focus on how small colleges with limited resources can develop effective plans into by partnering with local agencies; as well as on the steps that community colleges – who generally lack resident advisors and residential staff, and whose students are far more

dispersed - can take to diminish risk and respond promptly and professionally to a crisis. This is an essential guide for all higher education leaders concerned about preventing violence on our campuses, and a call to action.
