Do you want to know the tips and tricks of treasure hunting? Then Read on... The use of metal detectors to find treasure is something quite recent thanks to improved technologies. Our ancestors prospected for gold or precious metals using picks, stoves, and then a rattle. Although the pan and pan are the traditional tools for prospecting that have the best price/performance ratio, technological developments offer the treasure miner a wide range of possibilities. It is now possible to use a metal detector. This alternative is especially intended for those who are looking for something new and a fun way to find treasure.If you walk on the seaside beaches early in the morning before they are taken over by tourists, you should see people accompanied by their beach finder pacing up and down the beach. Some people live exclusively from finding and selling gold lost by others. On tourist beaches, you can find rings,

bracelets, necklaces, earrings, or watches that have lost their owner and have fled into the sand. But metal detectors aren't just for that.
