Voyage of the Southern Sun Michael Smith, 2017-10-30 In 2015, Michael Smith set out on a remarkable mission and became the first person to fly solo around the world in an amphibious plane. This is the often funny, occasionally terrifying and always inspiring story of that trip, and how it came about. With limited flying experience, no support team and only basic instruments in his tiny flying boat, the Southern Sun, Michael risked his life to make modern aviation history. His adventures include an unexpected greeting by Special Branch on his arrival in the UK, a near-death experience while leaving Greenland, and a wondrous journey up the Mississippi. Showing a very Australian ingenuity and openness to experience, Michael worked his way around the globe. In seven months he made eighty stops in twenty-five countries, visiting many unusual places and, more often than not, encountering the kindness of strangers. 'Great Aussie spirit in a good old-fashioned, seat-of-the-pants adventure' —Dick Smith 'The blue-sky dreaming of Walter Mitty, the resourcefulness of Phileas Fogg and – dare I say it? – the over-confidence and geniality of Mr Toad in a flying machine. Surely these literary figures were the inspiration for such an adventure. A marvellous exploit and wonderfully told.' —A.J. Mackinnon, author *The Unlikely Voyage of Jack de Crow* Michael Smith was named Australian Geographic's Adventurer of the Year in 2016. He is also one of Australia's last independent metropolitan cinema operators, after he restored and re-opened the beloved Sun Theatre in Yarraville, Melbourne.

Atmosphere and Weather Terry J. Jennings, 2005 Weather and Climate is a brand new series that explores what causes our weather - why the world's weather is constantly changing, why different countries have different weather patterns, how meteorologists forecast weather and the effect the weather has on our lives. *Atmosphere and Weather* looks at the importance of weather in everyday life. It explains the role of the Sun in the Earth's weather, where wind comes from, how the water cycle works, what makes clouds and rain and why the way we live may affect the weather.

Isaak Levitan Averil King, 2004-01-02 This is the first western study of the renowned Russian nineteenth-century landscape painter, Isaak Levitan (1860-1900). Published to coincide with the recent opening of the 'Russian Landscape Painting' exhibition in Groningen, Netherlands. Born into a poor Jewish family in Lithuania, Levitan was able to enrol at the Moscow School of Painting when aged only thirteen and made rapid progress, the great merchant collector, Pavel Tretyakov buying one of his early paintings. In 1876 he sketched in the Crimea and during the summers of 1887 and 1890 he painted in the Volga region. These years saw the development of his long friendship with the future playwright Anton Chekhov and the creation of his first 'mood landscapes'. Levitan travelled extensively, if briefly, in Europe, visiting Berlin, Paris, north Italy, Switzerland, Munich and Vienna and was thus, unlike most of his Russian contemporaries, well aware of the artistic trends in the west. His experience of European painting added considerably to the breadth of his vision in depicting the Russian terrain. In doing this Levitan sought simple but well-loved motifs of the countryside, portraying them in an increasingly laconic and intelligent way. Levitan's scenes of fields and forests at twilight achieve an

extraordinary atmospheric veracity, while his joyful evocations of the Russian spring are noted for their expressive lyricism. His work was greatly admired by Diaghilev, the legendary theatre manager Stanislavsky, and the world-famous opera singer Chaliapin. Towards the end of his short life Levitan exhibited regularly with the Itinerants (the Russian association for travelling exhibitions) and with the Munich Secession and was responsible for revitalising the teaching of landscape painting in Moscow.

Virtually Human Martine Rothblatt, PhD,2014-09-09 Virtually Human explores what the not-too-distant future will look like when cyberconsciousness—simulation of the human brain via software and computer technology—becomes part of our daily lives. Meet Bina48, the world's most sentient robot, commissioned by Martine Rothblatt and created by Hanson Robotics. Bina48 is a nascent Mindclone of Martine's wife that can engage in conversation, answer questions, and even have spontaneous thoughts that are derived from multimedia data in a Mindfile created by the real Bina. If you're active on Twitter or Facebook, share photos through Instagram, or blogging regularly, you're already on your way to creating a Mindfile—a digital database of your thoughts, memories, feelings, and opinions that is essentially a back-up copy of your mind. Soon, this Mindfile can be made conscious with special software—Mindware—that mimics the way human brains organize information, create emotions and achieve self-awareness. This may sound like science-fiction A.I. (artificial intelligence), but the nascent technology already exists. Thousands of software engineers across the globe are working to create cyberconsciousness based on human consciousness and the Obama administration recently announced plans to invest in a decade-long Brain Activity Map project. Virtually Human is the only book to examine the ethical issues relating to cyberconsciousness and Rothblatt, with a Ph.D. in medical ethics, is uniquely qualified to lead the dialogue.
