*Madison's Metronome* Greg Weiner,2019-08-02 In the wake of national crises and sharp shifts in the electorate, new members of Congress march off to Washington full of intense idealism and the desire for instant change—but often lacking in any sense of proportion or patience. This drive for instant political gratification concerned one of the key Founders, James Madison, who accepted the inevitability of majority rule but worried that an inflamed majority might not rule reasonably. Greg Weiner challenges longstanding suppositions that Madison harbored misgivings about majority rule, arguing instead that he viewed constitutional institutions as delaying mechanisms to postpone decisions until after public passions had cooled and reason took hold. In effect, Madison believed that one of the Constitution's primary functions is to act as a metronome, regulating the tempo of American politics. Weiner calls this implicit doctrine temporal republicanism to emphasize both its compatibility with and its contrast to other interpretations of the Founders' thought. Like civic republicanism, the temporal variety embodies a set of values—public-spiritedness, respect for the rights of others—broader than the technical device of majority rule. Exploring this fundamental idea of time-seasoned majority rule across the entire range of Madison's long career, Weiner shows that it did not substantially change over the course of his life. He presents Madison's understanding of internal constitutional checks and his famous extended republic argument as different and complementary mechanisms for improving majority rule by slowing it down, not blocking it. And he reveals that the changes we see in Madison's views of majority rule arise largely from his evolving beliefs about who, exactly, was behaving impulsively—whether abusive majorities in the 1780s, the Adams regime in the 1790s, the nullifiers in the 1820s. Yet there is no evidence that Madison's underlying beliefs about either majority rule or the distorting and transient nature of passions ever swayed. If patience was a fact of life in Madison's day—a time when communication and travel were slow—it surely is much harder to cultivate in the age of the Internet, 24-hour news, and politics based on instant gratification. While many of today's politicians seem to wed supreme impatience with an avowed devotion to original constitutional principles, Madison's Metronome suggests that one of our nation's great luminaries would likely view that marriage with caution.

**Modernism's Metronome** Ben Glaser,2020-11-03 Despite meter's recasting as a rigid metronome, diverse modern poet-critics refused the formal ideologies of free verse through complex engagements with traditional versification. In the twentieth century, meter became an object of disdain, reimagined as an automated metronome to be transcended by new rhythmic practices of free verse. Yet meter remained in the archives, poems, letters, and pedagogy of modern poets and critics. In *Modernism's Metronome*, Ben Glaser revisits early twentieth-century poetics to uncover a wide range of metrical practice and theory, upending our inherited story about the breaking of meter and rise of free verse.

**Making Musical Time** Guerino Mazzola,Alex Lubet,Yan Pang,Jordon Goebel,Christopher Rochester,Sangeeta Dey,2021-11-15 This book is a comprehensive examination of the conception, perception, performance, and composition of time in music across time and culture. It surveys the literature of time in mathematics, philosophy, psychology, music theory, and somatic studies (medicine and disability studies) and looks ahead through original research in performance, composition, psychology, and education. It is the first monograph solely devoted to the theory of construction of musical time since Kramer in 1988, with new insights, mathematical precision, and an expansive global and historical context. The

mathematical methods applied for the construction of musical time are totally new. They relate to category theory (projective limits) and the mathematical theory of gestures. These methods and results extend the music theory of time but also apply to the applied performative understanding of making music. In addition, it is the very first approach to a constructive theory of time, deduced from the recent theory of musical gestures and their categories. Making Musical Time is intended for a wide audience of scholars with interest in music. These include mathematicians, music theorists, (ethno)musicologists, music psychologists / educators / therapists, music performers, philosophers of music, audiologists, and acousticians.
