**Painting a Map of Sixteenth-century Mexico City** Mary Ellen Miller, Barbara E. Mundy, 2012 In 1975 the Beinecke Rare Book and Manuscript Library of Yale University acquired an exceptional mid-sixteenth-century map of Mexico City, which, until 1521, had been the capital of the Aztecs, the Nahuatl-speaking peoples who dominated the Valley of Mexico. This extraordinary six-by-three-foot document, showing landholdings and indigenous rulers, has yielded a wealth of information about the artistic, linguistic, and material culture of the Nahuatl after the Spanish invasion. *Painting a Map of Sixteenth-Century Mexico City*, edited and with contributions by Mary E. Miller and Barbara E. Mundy, is the first publication of both the complete map and the multidisciplinary research that it spurred. A distinguished team of specialists in history, art history, linguistics, and conservation science has worked together for nearly a decade. The result of all their work, this book focuses not only on the map, but also explores the situation of the indigenous people of Mexico City and their interactions with Europeans at the time the map was made. The scientific analysis of the map's pigments and paper carried out by Diana Magaloni Kerpel, Richard Newman, and Michele Derrick in 2007 marks the most thorough examination of a pictorial document from early colonial Mexico to date.--Book Jacket.

Mexico Megacity James B Pick, 2018-02-23 This book describes and analyzes a wealth of data

about Mexico City's growth, change, and spatial patterns. Applying modern techniques of geographic information systems and cluster analysis, the authors reveal many previously unknown or unrecognized trends and patterns. The authors provide historical background, analyze key findings and relationships, and tie their results to the literature on Mexico City and other giant cities. The United Nations predicts the emergence of many more giant cities worldwide over the next quarter century, most of which will appear in the developing world. Mexico Megacity may be a milestone from a comparative perspective in increasing knowledge about one developing world megacity and offering analytical tools to study others. With a population of 15 million persons in 1990, Mexico City is one of the world's largest cities. It is a famous center of civilizations and culture and one of the economic capitals of the Americas, but it also has serious social and economic problems, including large impoverished zones, severe environmental degradation, crime, and overpopulation. This book describes and analyzes growth, change, and spatial patterns in Mexico City, looking at urbanization, population, marriage and fertility, health and mortality, migration, environment and housing, social characteristics, the economy, labor force, and corporate structure. Applying modern techniques of geographic information systems and spatial analysis, the authors reveal many previously unknown or unrecognized trends and patterns. In a capstone chapter, they summarize the spatial patterns in a series of cluster analyses that identify distinctive zones within the metropolis: a prosperous core, surrounding complex ring patterns, an impoverished zone, and semi-rural arms. They also compare the pattern of Mexico City's cluster zones to the classical and developmental literature on cities. In closing, the authors suggest government policies that would foster optimal future development of an even larger metropolis. This book addresses a topic of growing importance. The United Nations predicts the emergence of many more giant cities worldwide over the next quarter century, most of

which will appear in the developing world. Mexico Megacity is a milestone work that increases our knowledge about one developing world megacity while offering analytical tools for studying others.
