A Fly Fishing Log Western Affiliates,2020-08-16 This Fly Fishing Log is a MUST HAVE for the serious fly fisherman or woman. Keeping a fly fishing log helps to record the memories, and track the patterns that work on each of your fishing trips. A fly fishing log makes for a great gift anytime of the year! Record information such as: - Weather - Rod Used - Water Levels - Flies Used - Technique - Fishing Partners - Best Spot in the Reach - and other important information A Fly Fishing Log can also be used as a Fly Fishing Journal, however the information collected is more geared towards the data, not the story or experience. We left some extra room for notes. This Fly Fishing Log is conveniently sized at 5 x 8 inches, to fit in a fishing vest pocket, or a fishing hip pack, backpack, or tackle box. Keep it with you, and keep those memories logged! There are 60 generous pages for tracking your fishing journeys. Works for salt water or fresh water, warm or cold species. Want a spot to leave some notes on the fly rod you used? Well we made TWO, because the chances are you're fishing with two rods per session! Go ahead and track how that line worked with that 7wt rod. Oh, and you busted out the 5wt? Track that too. Fishing is great alone, but better with friends. We made a line item to track your fishing partner(s) of the day, which helps bring those memories rushing back! A Fly Fishing Log is a great way to improve your game, track the seasonal change on your local water body, track the health of a fishery if you visit it regularly, makes a great gift, and is sized and priced just right so you have no excuse not to grab one today!

Turn Down the Heat A Report for the World Bank by the Potsdam Institute for Climate Impact Research and

Analytics.,2013-06-19 This report focuses on the risks of climate change to development in Sub-Saharan Africa, South East Asia and South Asia. Building on the 2012 report, Turn Down the Heat: Why a 4°C Warmer World Must be Avoided, this new scientific analysis examines the likely impacts of present day, 2°C and 4°C warming on agricultural production, water resources, and coastal vulnerability. It finds many significant climate and development impacts are already being felt in some regions, and that as warming increases from present day (0.8°C) to 2°C and 4°C, multiple threats of increasing extreme heat waves, sea-level rise, more severe storms, droughts and floods are expected to have further severe negative implications for the poorest and most vulnerable. The report finds that agricultural yields will be affected across the three regions, with repercussions for food security, economic growth, and poverty reduction. In addition, urban areas have been identified as new clusters of vulnerability with urban dwellers, particularly the urban poor, facing significant vulnerability to climate change. In Sub-Saharan Africa, under 3°C global warming, savannas are projected to decrease from their current levels to approximately one-seventh of total land area and threaten pastoral livelihoods. Under 4°C warming, total hyper-arid and arid areas are projected to expand by 10 percent. In South East Asia, under 2°C warming, heat extremes that are virtually absent today would cover nearly 60-70 percent of total land area in northern-hemisphere summer, adversely impacting ecosystems. Under 4°C warming, rural populations would face mounting pressures from sea-level rise, increased tropical cyclone intensity, storm surges, saltwater intrusions, and loss of marine ecosystem services. In South Asia, the potential sudden onset of disturbances to the monsoon system and rising peak temperatures would put water and food resources at severe risk. Well before 2°C warming occurs, substantial reductions in the frequency of low snow years is projected to cause substantial reductions in dry season flow, threatening agriculture. Many of

the worst climate impacts could still be avoided by holding warming below 2°C, but the window for action is closing rapidly. Urgent action is also needed to build resilience to a rapidly warming world that will pose significant risks to agriculture, water resources, coastal infrastructure, and human health.

Families Caring for an Aging America National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Family Caregiving for Older Adults, 2016-11-08 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Government Finance Statistics Manual Sage De Clerck, Tobias Wickens, 2015-03-10 *The Government Finance Statistics Manual 2014 (GFSM 2014)*—describes a specialized macroeconomic statistical framework—the government finance statistics (GFS) framework—designed to support fiscal analysis. The manual provides the economic and statistical reporting principles to be used in compiling the statistics; describes guidelines for presenting fiscal statistics within an analytic framework that includes appropriate balancing items; and is harmonized with other macroeconomic statistical guidelines.

Preserving Pat Crocker, 2011-08-23 In the new economic climate, many people will return to simpler, more affordable home cooking; it's a trend that has come around again and again. Home canning and preserving is a time-honoured practice that many people will be trying for the first time in the months to come, preserving both for the pleasure of it, and for its inherent economy. With the plethora of farmers' markets, too, home cooks will have a bonanza of produce to buy inexpensively, and they will want to know precisely what to do with it. Pat Crocker's *Preserving: A Resource Cookbook for Home Canning and Freezing* has all the information anyone needs to get started, and to keep going! This cookbook is practical, focusing on simple but effective concepts. It will follow the seasons, providing easy-to-follow, accurate and thorough information on preserving everything from asparagus to winter squashes. Canning, jamming and freezing techniques will be covered, from the most basic hot-packed fruit recipes to gorgeous, internationally flavoured chutneys and relishes. Providing both safe and detailed instructions, as well as step-by-step photography and over 200 recipes, this cookbook will be the new home-preserving bible.

Knowing the Salween River: Resource Politics of a Contested Transboundary River Carl Middleton, Vanessa Lamb, 2019-08-12 This open access book focuses on the Salween River, shared by China, Myanmar, and Thailand, that is increasingly at the heart of pressing regional development debates. The basin supports the livelihoods of over 10 million people, and within it there is great socio-economic, cultural and political diversity. The basin is witnessing intensifying dynamics of resource extraction, alongside large dam construction, conservation and development intervention, that is unfolding within a complex terrain of local, national and transnational governance. With a focus on the contested politics of water and associated resources in the Salween basin, this book offers a collection of empirical case

studies that highlights local knowledge and perspectives. Given the paucity of grounded social science studies in this contested basin, this book provides conceptual insights at the intersection of resource governance, development, and politics of knowledge relevant to researchers, policy-makers and practitioners at a time when rapid change is underway. - Fills a significant knowledge gap on a major river in Southeast Asia, with empirical and conceptual contributions - Inter-disciplinary perspective and by a range of writers, including academics, policy-makers and civil society researchers, the majority from within Southeast Asia - New policy insights on a river at the cross-roads of a major political and development transition

The United Nations world water development report

2020 UNESCO World Water Assessment Programme, 2020-03-23
The 2020 edition of the WWDR, titled 'Water and Climate Change' illustrates the critical linkages between water and climate change in the context of the broader sustainable development agenda. Supported by examples from across the world, it describes both the challenges and opportunities created by climate change, and provides potential responses - in terms of adaptation, mitigation and improved resilience - that can be undertaken by enhancing water resources management, attenuating water-related risks, and improving access to water supply and sanitation services for all in a sustainable manner. It addresses the interrelations between water, people, environment and economics in a changing climate, demonstrating how climate change can be a positive catalyst for improved water management, governance and financing to achieve a sustainable and prosperous world for all. The report provides a fact-based, water-focused contribution to the knowledge base on climate change. It is complementary to existing scientific assessments and designed to support international political frameworks, with the goals of helping the water community tackle the challenges of climate change, and informing the climate change community about the opportunities that improved water management offers in terms of adaptation

and mitigation.

The Stiglitz Report Joseph E. Stiglitz, United Nations, 2010
The fact that the global economy is broken may be widely accepted, but what precisely needs to be fixed has become the subject of enormous controversy. In 2008, the President of the United Nations General Assembly convened an international panel, chaired by Nobel Prize-winning economist Joseph Stiglitz and including 20 leading experts on the international monetary system, to address this crucial issue. This report controversially establishes a bold agenda for policy change, both broad in scope and profound in its ambitions.

Securing sustainable small-scale fisheries: sharing good practices from around the world Food and Agriculture Organization of the United Nations, 2019-02-26 This document includes eight studies showcasing good practices in support of sustainable small-scale fisheries. FAO commissioned these studies aiming to share experiences and promote the implementation of the Voluntary Guidelines for Securing Sustainable Small-Scale Fisheries in the Context of Food Security and Poverty Eradication (SSF Guidelines). The case studies were also intended to promote participatory approaches - in line with the SSF Guidelines principles - and to promote increased interaction between

research and fishing communities, including the use of traditional knowledge and participatory research. It is hoped that the case studies will inform policy and policy processes and, in this way, promote sustainable small-scale fisheries according to the SSF Guidelines and the human rights-based approach to development (HRBA). The case studies constitute a rich selection of experiences and are diverse, not only with regard to their geographical setting but also in scope and approach. They span from looking at one specific tool for sharing experiences (the fisheries learning exchanges methodology in Madagascar and Mozambique) or examining the enabling environment in a specific thematic area (disaster risks in Bangladesh), to regional policy formulation on small-scale fisheries (the SSF Guidelines protocol for Caribbean policies) and reflection on how to use the SSF Guidelines in participatory processes (the Myanmar step-by-step approach to discussions with small-scale fisheries communities). A few of the papers look at co-management, in some cases combining fisheries management and social development (Senegal, Uruguay and Nepal), with one focusing on the role of small-scale fisheries and community organizations (India). Generally, the case studies refer to HRBA but, perhaps because many of the activities have taken place in the past, it seems that HRBA has rarely been consciously and explicitly implemented. Still, the case studies bear witness to a number of experiences and practices that are clearly steps in the right direction. Key good practices emerging from the studies refer to, among other things, holistic approaches to co-management and social responsibility; broad engagement, inclusiveness and partnerships; the power of communication; and gender equality and the role of women. As more experience is gained, our knowledge of how to go about implementing the SSF Guidelines will improve and nurture new and continued initiatives. For the present and the future, efforts should be made to apply HRBA, while continuing to share experiences and good practices showing how to do so when

implementing the SSF Guidelines.

Government Finance Statistics Manual 2001 International Monetary Fund, 2001-12-19 This Manual, which updates the first edition published in 1986, is a major advance in the standards for compilation and presentation of fiscal statistics. It is intended as a reference volume for compilers of government finance statistics, fiscal analysts, and other users of fiscal data. The Manual introduces accrual accounting, balance sheets, and complete coverage of government economic and financial activities. It covers concepts, definitions, classifications, and accounting rules, and provides a comprehensive framework for analysis, planning, and policy determination. To the extent possible, the Manual has been harmonized with the System of National Accounts 1993.

Climate change: Unpacking the burden on food safety Food and Agriculture Organization of the United Nations , 2020-03-01 Climate change is causing unprecedented damage to our ecosystem. Increasing temperatures, ocean warming and acidification, severe droughts, wildfires, altered precipitation patterns, melting glaciers, rising sea levels and amplification of extreme weather events have direct implications for our food systems. While the impacts of such environmental factors on food security are well known, the effects on food safety receive less attention. The purpose of *Climate change: Unpacking the burden on food safety* is to identify and attempt to quantify some current and anticipated food safety issues that are associated with climate change. The food safety hazards considered in the publication are foodborne pathogens and parasites, harmful algal blooms, pesticides, mycotoxins and heavy metals with emphasis on methylmercury. There is also, a dedicated section on the benefits of forward-looking approaches such as horizon scanning and foresight, which will not only aid in anticipating future challenges in a shifting global food safety landscape, but also help build resilient food systems that can be continually updated as more knowledge is assimilated. By building a more widespread and

better understanding of the consequences climate change has on food safety, it is hoped that this document will aid in fostering stronger international cooperation in making our food safer by reducing the global burden of these concerns.
