Public and Community Psychiatry James G. Baker,Sarah E. Baker,2020-02-07 Physicians who choose to serve in public-sector mental healthcare settings and physicians-in-training assigned to public-sector mental health clinics may not be fully prepared for the many roles of the public and community psychiatrist. Public and Community Psychiatry is a concise guide for the resident and early-career psychiatrist called upon to serve in the roles of public-sector clinician, team member, advocate, administrator, and academician. Each chapter includes a concise description of these various roles and responsibilities and offers engaging examples of the public psychiatrist at work, as well as case-based problems typical of those faced by the public psychiatrist. Each chapter also features works of art and literature, usually from the public domain, in order to incorporate the core strengths of medical humanities into the dialogue of public-sector mental healthcare. This book aims to provide a level of support to psychiatrists that fosters their desire, individually and collectively, to serve the poor and the marginalized with grit and determination, and to broadly consider their potential to improve not only their patients' well-being, but also these patients' incorporation into their respective communities.

The Challenge of Community Mental Health and Erich Lindemann David G. Satin,2020-09-03 These volumes make new contributions to the history of psychiatry and society in three ways: First, they propose a theory of values and ideology influencing the evolution of psychiatry and society in recurring cycles, and survey the history of psychiatry in recent centuries in light of this theory. Second, they review the waxing, prominence, and waning of Community Mental Health as an example of a segment of this cyclical history of psychiatry. Third, they provide the first biography of Erich Lindemann, one of the founders of social and community psychiatry, and explore the interaction of the prominent contributor with the historical environment and the influence this has on both. We return to the issue of values and ideologies as influences on psychiatry, whether or not it is accepted as professionally proper. This is intended to stimulate self-reflection and the acceptance of the values sources of ideology, their effect on professional practice, and the effect of values-based ideology on the community in which psychiatry practices. The books will be of interest to psychiatric teachers and practitioners, health planners, and socially responsible citizens.

Medieval Illuminators and Their Methods of Work Jonathan James Graham Alexander,1992-01-01 Who were the medieval illuminators? How were their hand-produced books illustrated and decorated? In this beautiful book Jonathan Alexander presents a survey of manuscript illumination throughout Europe from the fourth to the sixteenth century. He discusses the social and historical context of the illuminators' lives, considers their methods of work, and presents a series of case studies to show the range and nature of the visual sources and the ways in which they were adapted, copied, or created anew. Alexander explains that in the early period, Christian monasteries and churches were the main centers for the copying of manuscripts, and so the majority of illuminators were monks working in and for their own monasteries. From the eleventh century, lay scribes and illuminators became increasingly numerous, and by the thirteenth century, professional illuminators dominated the field. During this later period, illuminators were able to travel in search of work and to acquire new ideas, they joined guilds with scribes or with artists in the cities, and their ranks included nuns and secular women. Work was regularly collaborative, and the craft was learned through an apprenticeship system. Alexander carefully analyzes surviving manuscripts and medieval treatises in order to explain the complex and time-consuming technical processes of illumination - its materials, methods, tools, choice of illustration, and execution. From rare surviving contracts, he deduces the preoccupation of patrons with materials and schedules. Illustrating his discussion with examples chosen from religious and secular manuscripts made all over Europe, Alexander recreates the astonishing variety and creativity of medieval illumination. His book will be a standard reference for years to come.

Making and Unmaking the Carolingians Stuart Airlie, 2020-12-24 How does power manifest itself in individuals? Why do people obey authority? And how does a family, if they are the source of such dominance, convey their superiority and maintain their command in a pre-modern world lacking speedy communications, standing armies and formalised political jurisdiction? Here, Stuart Airlie expertly uses this idea of authority as a lens through which to explore one of the most famous dynasties in medieval Europe: the Carolingians. Ruling the Frankish realm from 751 to 888, the family of Charlemagne had to be ruthless in asserting their status and adept at creating a discourse of Carolingian legitimacy in order to sustain their supremacy. Through its nuanced analysis of authority, politics and family, *Making and Unmaking the Carolingians*, 751-888 outlines the system which placed the Carolingian dynasty at the centre of the Frankish world. In doing so, Airlie sheds important new light on both the rise and fall of the Carolingian empire and the nature of power in medieval Europe more generally.

The General Joseph Hanaway, John H. Burgess, 2016-05-01 Officially founded in 1819, the Montreal General Hospital is recognized as a pioneering institution in North America for the many discoveries in medical research made there and for its early association with the Faculty of Medicine at McGill University - the first medical school in Canada. Covering nearly 200 years of history, *The General* relates the story of the hospital from its origins and founding to the transition and aftermath of its incorporation into the McGill University Health Centre in 1997. With contributions that show the perspectives of clinicians, nurses, surgeons, professors, and administrators, chapters chronicle the history of particular departments and specializations of the hospital, including cardiology, dermatology, endocrinology, neurosurgery, plastic surgery, obstetrics, emergency medicine, pathology, and radiology, as well as nursing, administration, and governance. Among the major turning points in the history of the hospital were the introduction of autopsy pathology by Sir William Osler, the debut of the electrocardiograph by Thomas Cotton in 1914, the discovery of a malignant tumour marker by Phil Gold and Samuel Freedman in 1965, its transformation from a community hospital serving anglophone Montreal to an internationally recognized academic centre during the 1950s and '60s, and changes in governance due to the 1970 Quebec Medicare Act. Both a collective reminiscence and an extensive institutional history, *The General* is an engaging account of one prominent hospital's development over nearly 200 years.

Evolution of Radiation Oncology at Massachusetts General Hospital Herman D. Suit, Jay S. Loeffler, 2011-02-04 The Massachusetts General Hospital (MGH) has a history of excellence and is internationally recognized as a world class medical center, providing quality medical care, advancing medicine through clinical and laboratory research and facilitating the education of exceptional health care professionals. The Massachusetts General Hospital Radiation Oncology Department, staff, residents and fellows, past and present, concur that MGH stands for Man's Greatest Hospital. This decidedly immodest assessment is widely viewed amongst this group as being manifestly true, and that perception is clearly reflected in a marvelous esprit de corp. Such an unequivocally positive attitude is solidly based on the judgment that the best possible care is provided to each MGH patient, i.e. the patient is, in fact, Number One. There is a deep sense of pride in the contributions made by this department to the scientific advancement of oncology, and to progressively and substantially increasing the proportion of patients who are free of tumor and of treatment related morbidity. Evolution of Radiation of Oncology at Massachusetts General Hospital is the work of the former Chair of the Department, Herman D. Suit. From 1970 - 2000, his guidance and management of this Department brought it to recognition as a world class center. Dr. Suit was key in the development and building of the Department that now includes The Northeast Proton Therapy Center at the MGH. His passion for the science of radiation therapy and its evolving growth through the years is evident in this book. He has assembled a fascinating chronicle, beginning with the creation of MGH in 1811 followed by personal experiences that culminated with his leadership of the Radiation Oncology Department.
