Modernity and "Whiteness" Bolívar Echeverría,2019-11-11 Bolívar Echeverría was one of the leading philosophers and critical theorists in Latin America and his work on capitalism and modernity offers a distinctive account, informed by the experiences of Latin American societies, of the social and historical forces shaping the modern world. For Echeverría, capitalism and modernity do not coincide: modernity is a long-term historical phenomenon that involved a new set of relations between human beings and nature and between the individual and the collective, while capitalism is a particular form in which modernity has been realized. As Marx showed, capitalism is a mode of reproduction that involves the growing commodification of social life – everything, even human labor power itself, is turned into a commodity. Echeverría introduces the notion of *blanquitud* or “whiteness” to capture the new form of identity that is brought into being by the totalizing and homogenizing character of capitalism. While *blanquitud* includes certain ethnic features, it is not so much an ethnic category as an ethical and cultural one, referring to a type of human being, *homo capitalisticus*, which threatens to spread throughout the world, overcoming and integrating identities that might otherwise resist it. But capitalism is not the only form of modernity – there are alternative modernities. In the final part of the book Echeverría explores the baroque as a characteristic of Latin American identity and sees it as a way of theatricalizing and transforming reality that takes some distance from Eurocentric paradigms and resists the homogenizing forces of capitalism. Echeverría’s analysis of the dynamics of capitalism and modernity represents one of the most important contributions to critical theory from a Latin American perspective. It will be of great interest to students and scholars of critical theory and postcolonial theory and anyone concerned with the global impact of capitalism on social and cultural life.

The Spatial Turn Barney Warf,Santa Arias,2008-09-18 Across the disciplines, the study of space has undergone a profound and sustained transformation. Space, place, mapping, and geographical imaginations have become commonplace topics in a variety of analytical fields in part because globalization has accentuated the significance of location. While this transformation has led to a renaissance in human geography, it also has manifested itself in the humanities and other social sciences. The purpose of this book is not to announce that space is significant, which by now is well known, but to explore how space is analyzed by a variety of disciplines, to compare and contrast these approaches, identify commonalities, and explore how and why differences appear. The volume includes works by 13 scholars from a variety of geographical regions and disciplines. The chapters combine up-to-date literature reviews concerning the role of space in each discipline and several offer original empirical analyses. Some chapters are concerned with Geography while others explore the role of space in contemporary Anthropology, Sociology, Religion, Political Science, Film, and Cultural Studies. The introduction surveys the development of the spatial turn across the fields under consideration. Despite frequent reference to the spatial turn, this is the first volume to explicitly address how theory and practice concerning space, is used in a variety of fields from diverse conceptual perspectives. This book will appeal to everyone conducting conceptual and theoretical research on space, not simply in Geography,

but in related fields as well.

The Circum-Gulf of Mexico and the Caribbean Claudio Bartolini, Richard T. Buffler, Jon Frederic Blickwede, 2003 AAPG Memoir 79, The Circum-Gulf of Mexico and the Caribbean, is the first volume in more than a decade to document such a wide range of research on the geology of this vast area. Of the total 44 papers, roughly two-thirds pertain to the Gulf of Mexico, with an emphasis on the Mexican portion of the basin, and to the petroliferous areas of the southern Caribbean, including Colombia, Venezuela, Cuba, and Trinidad and Tobago. The remaining papers relate to the Antilles and Central America, as well as a series of papers that address region-wide topics such as plate tectonic evolution. A significant number of papers were contributed by authors from national oil companies and universities from within the region. --AAPG.

Men in Dual-career Families Lucia Albino Gilbert, 2014-04-04 First published in 1985. The dual-career family is emerging as the modal family form in the United States. Yet, despite its prevalence, traditional orientations and social institutions have not adapted to this pattern. This volume reports the results of a pioneering investigation of men in dual-career families and considers interventions at the societal and individual level that will ease the difficulties associated with the transition to this new family form.

Maternal Employment and Children's Development Adele Eskeles Gottfried, Allen W. Gottfried, 2013-11-21 In a review written in 1979, I noted that there was a paucity of research examining the effects of maternal employment on the infant and young child and also that longitudinal studies of the effects of maternal employment were needed (Hoffman, 1979). In the last 10 years, there has been a flurry of research activity focused on the mother's employment during the child's early years, and much of this work has been longitudinal. All of the studies reported in this volume are at least short-term longitudinal studies, and most of them examine the effects of maternal employment during the early years. The increased focus on maternal employment during infancy is not a response to the mandate of that review but rather reflects the new employment patterns in the United States. In March 1985, the Bureau of Labor Statistics reported that 49.4% of married women with children less than a year old were employed outside the home (Hayghe, 1986). This figure is up from 39% in 1980 and more than double the rate in 1970. By now, most mothers of children under 3 are in the labor force.

Act One James Lapine, from the autobiography by Moss Hart, 2016-05-16 THE STORY: Growing up in an impoverished family in the Bronx, Moss Hart dreamed of being part of the glamorous world of the theatre. Forced to drop out of school at age thirteen, Hart's famous memoir Act One is a classic Hortatio Alger story that plots Hart's unlikely collaboration with the legendary playwright George S. Kaufman. Tony Award-winning writer and director James Lapine has adapted Act One for the stage, creating a funny, heartbreaking, and suspenseful play that celebrates the making of a playwright and his play Once in a Lifetime. ACT ONE offers great fun to a director to utilize over fifty roles, which can be played by a cast as few as twelve, and in a production that can be done as simply or elaborately as desired.

Rough Song Blanca Varela, 2020-10-15 Poetry. Latinx Studies. Women's Studies. Translated by Carlos Lara. It's hard to believe that the books of Blanca Varela (1926-2009), considered one of Peru's greatest poets, as well as the first woman to win the Federico García Lorca International Poetry Prize, have not been translated into English until now. Originally published in Spanish in 1978, this new publication of ROUGH SONG, heralds the long

overdue introduction of a major Latin American poet to English-language readers. Born into a family known for advancing art in Latin America, Varela lived briefly in Paris in the late '40s and '50s where she quickly became friends with Andre Breton, Jean-Paul Sartre, Henri Michaux, Simone de Beauvoir, Alberto Giacometti, and in particular, Octavio Paz, who called Varela the most secret, timid and natural of them all. Returning to Lima in the '60s, she established herself as one of Peru's key literary intelligentsia. The poems in *ROUGH SONG*, these flowers for the ear, range wildly in form, from two lines to seven pages long, and each presents a world of intense precision in language, fully conscious of reality and its metaphysical limits--yes / the dark matter / animated by your hand / it's me. Varela's deceptively simple poems hold a mysteriously delicate weight far beyond their length. A formidable voice in Latin American literature, Blanca Varela is destined to inspire awe and summon new readers for years to come. These haunting songs unfold with the mysterious precision of fractals, bending their interiors into pliant, living forms. As I get to know Blanca Varela's work, in Carlos Lara's beautiful translation from the Spanish, my ear becomes attuned to the smallest moving gradations, the spider that 'doesn't dare descend one / more millimeter toward the ground,' a surrealism I associate with Alejandra Pizarnik, Henri Michaux, and I'm so grateful to have come to it.--Alexis Almeida What a surprise to find in the work of this mid-century Peruvian poet a mind and style that so resonate with my own. Varela's poems are almost violent in their suddenness, their brevity. Unsentimental and often bleak, they are always surprising. Discovering her enlarges my picture of the world.--Rae Armantrout In *ROUGH SONG*, Blanca Varela uses language to create 'on the empty plate' and cuts reality open. Originally written in the '70s, this work remains both unpredictable and surprising. In these pages she condenses and transmutes the world into text and texture so that what emerges is legible and sharp. Here 'the word / slithering / will be your footprint.' Let us follow.--Gabriela Jauregui
