*Child Support Guidelines* Laura W. Morgan,2011-09-28 *Child Support Guidelines*, Second Edition is the only comprehensive guidebook for determining child support awards that takes

practitioners step-by-step through the interpretation and application of the guidelines and their worksheets in both the normal and exceptional child support case. This unique publication thoroughly covers each state's version of one of the three basic models for determining child support: the percentage of income model, the income shares model, and the Melson formula. Important issues affecting calculations are clearly explained, including: Definition of "income" under the guidelines The impact of divided custody, shared custody, split custody, and extended visitation Second household expenses, other dependents, subsequent children, and stepchildren Impact of a private contract on the court's decision to apply the guideline amount Deviation from the guidelines for a high income parent Deviation from the guidelines to pay for medical expenses, private school, and child care expenses Imputed income Modification of prior awards And more.

**Making Fathers Pay** David L. Chambers,1979-09 A couple with children divorce. A court orders the father to pay child support, but the father fails to pay. This pattern repeats itself thousands of times every year in nearly every American state. *Making Fathers Pay* is David L. Chambers's study of the child-support collection process in Michigan, the state most successful in inducing fathers to pay. He begins by reporting the perilous financial problems of divorced mothers with children, problems faced even by mothers who work full time and receive child support. The study then examines the characteristics of fathers who do and do not pay support and the characteristics of collections systems that work. Chambers's findings are based largely on records of fathers' support payments in twenty-eight Michigan counties, some of which jail hundreds of men for nonpayment every year. Chambers finds that in places well organized to collect support, jailing nonpayers seems to produce higher payments from men jailed and from men not jailed, but only at a high social cost. He also raises grave doubts about the fairness of the judicial process that leads to jail. While

Chambers's total sample includes 12,000 men, he interweaves through his text moving interviews with members of one family caught in the painful predicaments that men, women, and children face upon separation. To increase support for children at lower social costs, Chambers advocates a national system of compulsory deductions from the wages of non-custodial parents who earn more than enough for their own subsistence.

*Calculating Child Support* Chenwei Zhang, 2023 Under Ohio law, both parents are responsible for supporting their children financially. When a child's parents terminate their marriage or legally separate, a court must issue an order that provides for the child's support. A court or child support enforcement agency (CSEA) also may issue a support order when the child's parents

are unmarried. A child support obligation amount is calculated using: (1) the basic child support schedule that takes into account the parents' combined annual income and the number of children subject to the order and (2) worksheets, which are established and updated by the Department of Job and Family Services (JFS) based on statutory requirements. The calculation also incorporates a self-sufficiency reserve, which provides for the obligor's adequate subsistence. One of two worksheets must be used to calculate a child support obligation. One worksheet is used for sole custody and shared parenting arrangements, and the other is used for split parenting arrangements. These worksheets, in conjunction with the schedule, determine a parent's support amount by calculating each parent's income (including deductions to the income), each parent's income share percentage and basic support obligation amount, adjustments to the support obligation for special circumstances, and each parent's share of child care expenses. A court may deviate from the calculated child support amount in certain circumstances.
