Staying the course Great Britain: National Audit Office,2007-07-26 This report finds that, when compared internationally, England achieves a high rate of student retention. However the variation between retention rates of different institutions and the worsening of some institution's continuation rates shows that there is scope for further improvement. This will be increasingly important as access to further education is broadened, bringing in students who are likely to need more support. Amongst the recommendations are: the monitoring of retention at student, faculty and course level; the use of early-leaver surveys when problems are identified; more positive student support that emphasises ways to improve grades; identification of students eligible for Disabled Students' Allowances; the adoption of good practice from other institutions.
