Report from Planet Midnight Nalo Hopkinson, 2012-07-17 Nalo Hopkinson has been busily (and wonderfully) "subverting the genre" since her first novel, Brown Girl in the Ring, won a Locus Award for SF and Fantasy in 1999. Since then she has acquired a prestigious World Fantasy Award, a legion of adventurous and aware fans, a reputation for intellect seasoned with humor, and a place of honor in the short list of SF writers who are tearing down the walls of category and transporting readers to previously unimagined planets and realms. Never one to hold her tongue, Hopkinson takes on sexism and racism in publishing in "Report from Planet Midnight," a historic and controversial presentation to her colleagues and fans. Plus... "Message in a Bottle," a radical new twist on the time travel tale that demolishes the sentimental myth of childhood innocence; and "Shift," a tempestuous erotic adventure in which Caliban gets the girl. Or does he? And Featuring: Our Outspoken Interview, an intimate one-onone that delivers a wealth of insight, outrage, irreverence, and topsecret Caribbean spells.

Midnight on Mars Mari Glan,2017-06-30 Kari Keskiyo thought she was lucky winning a ticket to become one of the Martian colonists; Earth is on the brink of annihilation due to natural disasters. However, when she arrives on Mars, she is faced with worse predicaments, one of them being that her ex-fiance's failed cloning project has created mindless killers. Kari and Neil must put aside their spiritual and scientific differences and work together to not just save themselves, but the entire human race from extinction.

<u>The Universe at Midnight</u> Ken Croswell,2002 From the internationally acclaimed author of Magnificent Universe, Ken

Croswell, comes the definitive story of the golden age in our understanding of the universe -- the age we live in right now. The universe's origin, evolution, and fate have long fascinated humanity, but until recently these subjects resided in astronomy's never-never land. The last ten years, however, have witnessed a stunning turnabout: an avalanche of new cosmological discoveries that illuminate the greatest questions of all. The Universe at Midnight is a platform from which to observe these new deep-space landmarks. Mammoth new telescopes on Earth, such as the Keck Observatory in Hawaii, the Very Large Telescope in Chile, and Japan's Subaru Telescope, as well as the Hubble Space Telescope overhead, are probing the frontiers of the universe with stunning results. In 1996 astronomers pinpointed the center of the elusive Great Attractor, a mass of galaxies 250 million light-years away that is trying to tug our Galaxy andthousands of others across the universe. In late 1997, two teams hunting supernovae in galaxies billions of light-years away shocked their colle

<u>Predictive Astrology</u> Bernadette Brady,1999-01-15 For serious astrologers, this book is full of predictive techniques that really work, including cycles, transits, returns, progressions, eclipses, and the clearest explanation of the Saros cycles ever! Describes luminary and planetary arcs, and how to use transits to set up time maps. Brady also interprets progressed planets, waxing and waning orbs, planets changing signs, retrograde motion of transits and lunar phases and how they operate in predictive work. Appendices. Indian Antiquary ,1890 At a time when each Society had its own medium of propogation of its researches ... in the form of Transactions, Proceedings, Journals, etc., a need was strongly felt for bringing out a journal devoted exclusively to the study and advancement of Indian culture in all its aspects. [This] encouraged Jas Burgess to launch the 'Indian antiquary' in 1872. The scope ... was in his own words 'as wide as possible' incorporating manners and customs, arts, mythology, feasts, festivals and rites, antiquities and the history of India ... Another laudable aim was to present the readers abstracts of the most recent researches of scholars in India and the West ... 'Indian antiquary' also dealt with local legends, folklore, proverbs, etc. In short 'Indian antiquary' was ...entirely devoted to the study of MAN - the Indian - in all spheres ... -- introduction to facsimile volumes, published 1985.

The Magnetodiscs and Aurorae of Giant Planets Karoly Szego,Nicholas Achilleos,Chris Arridge,Sarah Badman,Peter Delamere,Denis Grodent,Margaret Galland Kivelson,Philippe Louarn,2015-10-14 Readers will find grouped together here the most recent observations, current theoretical models and present understanding of the coupled atmosphere, magnetosphere and solar wind system. The book begins with a general discussion of mass, energy and momentum transport in magnetodiscs. The physics of partially ionized plasmas of the giant planet magnetodiscs is of general interest throughout the field of space physics, heliophysics and astrophysical plasmas; therefore, understanding the basic physical processes associated with magnetodiscs has universal applications. The second chapter characterizes the solar wind interaction and auroral responses to solar wind driven dynamics. The third chapter describes the role of magnetic reconnection and the effects on plasma transport. Finally, the last chapter characterizes the spectral and spatial properties of auroral emissions, distinguishing between solar wind drivers and internal driving mechanisms. The in-depth reviews provide an excellent reference for future research in this discipline.
