- 📖 **THE NEW TEACHER REVOLUTION** JOSH STUMPENHORST,2015-02-09 For 21st Century Educators – The New Rules Of Student Engagement Today’s classroom demands teacher innovation and rejection of outdated practices, especially when someone tells you it’s “always been done” a certain way. In this book, Josh Stumpenhorst details his methods for improving student outcomes with unorthodox thinking. Content includes: Building relationships built on trust and respect, not fear and punishment Why you need to rethink homework and letter grades, which—in their current forms—are harming learning How to leverage technology by not treating it as a “shiny toy”, but rather fully understanding their power as tools for massive progress
- 📖 **EdTech Essentials** Monica Burns,2021-08-25 An accessible, practical guide to incorporating the 10 essential EdTech skills and strategies in every learning setting. In a world awash in technology, what EdTech skills and strategies should educators focus on to ensure they are making the best use of online spaces for classroom learning? How can they navigate through the overwhelming number of options in digital tools and spaces? How can they guide students in learning best practices? EdTech consultant Monica Burns answers these and other questions in this powerful and reader-friendly guide to incorporating EdTech across all grade levels and subject areas, and in both distance-learning and face-to-face environments. Readers will gain practical advice on \* Navigating online spaces, \* Curating resources, \* Introducing opportunities for exploring the world, \* Developing collaboration structures, \* Providing time and space to create learning products, \* Assessing students, \* Creating opportunities for sharing, \* Connecting student work to relevant audiences, \* Developing transferable skills, and \* Planning for tech-rich learning experiences. Each chapter explains why the skill or strategy is essential, including supporting research, classroom examples, guiding questions for planning and reflection, and suggested websites and digital tools for classroom use. The book also includes access to downloadable forms to help you set goals, assess your progress, and build your EdTech tool belt. Timely, accessible, and informed by the author’s experience and expertise, EdTech Essentials is a must-read for educators who want proven ways to prepare their students to be productive, responsible users of technology both within and outside the classroom.

- 📖 **CONNECTING YOUR STUDENTS WITH THE WORLD** Billy Krakower,Jerry Blumengarten,2015-08-27 Make the most of today’s technology to give your students a more interactive, authentic learning experience! Connecting Your Students with the World shows you how to use web tools to get K-8 students in touch with other classrooms worldwide. This book is a valuable resource to help you find and communicate with other teachers and classrooms and even design your own collaborative online projects. You’ll find out how to: Conduct videoconferencing calls to put your students in touch with classrooms around the world; Embark on virtual field trips; Plan themed projects for every season, including fun holiday activities; And more! The book includes detailed instructions for each activity and connections to the Common Core, ISTE, and Next Generation Science Standards, so you can ensure that you are meeting your state’s requirements as you prepare your students to become engaged, informed, and global citizens. Additionally, a comprehensive list of online resources is available as a free download from the Routledge website at [www.routledge.com/9781138902961](http://www.routledge.com/9781138902961).
- 📖 **PROFESSIONALLY DRIVEN: EMPOWER EVERY EDUCATOR TO REDEFINE PD** Jarod Bormann,2017-11 Traditionally in education, the letters PD have stood for an antiquated, one-size-fits-all form of professional development inflicted upon educators. Mandated to flock to the same location at the same time, they sit and get the same thing...whether they need it or not. Just mention the words professional development, and you’ll get groans, eye rolls, and deflated educators in response. Now, educators worldwide are on a mission to foster a movement toward personalized professional development and opportunities for true adult learning. With useful educational technology and a philosophy focused on a growth mindset, intrinsic motivation, and sustainable autonomy, the momentum is growing. In Professionally Driven: Empower Every Educator to Redefine PD Jarod Bormann shows us exactly how to effectively implement personalized PD using his successful model. It’s the most extensive explanation anywhere. As a leader in the movement, Jarod lets us in on the process to redefine the letters educators traditionally dread into a true description of the best version of our educator selves—Professionally Driven. It is time to rethink adult learning and implement a model that helps create energized educators and leads to empowered student learners. Get your copy today and discover how to help yourself and your colleagues redefine PD while leading all educators to be professionally driven.

- 📖 **EMPOWERING NETWORKS** Michael Waggoner,1992
- 📖 **HOW EDUCATION TECHNOLOGY LEADS TO IMPROVED STUDENT ACHIEVEMENT** Heather Grinager,2006-01-01
- 📖 **EDUCATION REIMAGINED** Helen Crompton,2022-08-29 This guide provides district and school leaders an on-ramp for using the ISTE standards to facilitate and implement change in their education systems. Education leaders play a central role in developing a culture of change and providing the conditions for innovation in schools, and that role varies by job title. District leaders make changes across multiple schools, principals lead change across their schools and teacher leaders guide change within and across grade levels. But no matter the role, a framework that identifies the knowledge and behaviors required for leaders to make student learning possible and for teachers to be empowered is a necessity. The ISTE standards for education leaders offer a concrete framework to help leaders set goals and provide a vision for transformative systems change within educational institutions. The ISTE standards for educators and the ISTE standards for students are also used by leaders to provide holistic change with a shared vision and direction for all. Education Reimagined provides aspiring and established leaders an on-ramp for using the ISTE standards to guide change in their educational systems. This booklet contains: • Examples showing how those in specific leadership roles can use the ISTE standards in their work. • Reflection questions applicable to all leadership roles. • Vignettes demonstrating how a variety of leaders in a diverse range of schools have embraced the ISTE standards for education leaders. • Explanation of other frameworks and standards that connect with and complement the ISTE standards for education leaders. • A crosswalk between the ISTE essential conditions and the ISTE standards for education leaders. Strong leaders use the ISTE standards for educators and the ISTE standards for students in tandem with the ISTE standards for education leaders to bring about holistic change with a shared vision and direction for all. Each set of standards is relevant to the education leader and is addressed throughout this booklet.

 **FAILURE TO CONNECT** JANE M. HEALY, 1999-07-13 In this comprehensive, practical, and unsettling look at computers in children’s lives, Jane M. Healy, Ph.D., questions whether computers are really helping or harming children’s development. Once a bedazzled enthusiast of educational computing but now a troubled skeptic, Dr. Healy examines the advantages and drawbacks of computer use for kids at home and school, exploring its effects on children’s health, creativity, brain development, and social and emotional growth. Today, the federal government allocates scarce educational funding to wire every classroom to the Internet, software companies churn out educational computer programs even for preschoolers, and school administrators cut funding and space for books, the arts, and physical education to make room for new computer hardware. It is past the time to address these issues. Many parents and even some educators have been sold on the idea that computer literacy is as important as reading and math. Those who haven’t hopped on the techno bandwagon are left wondering whether they are shortchanging their children’s education or their students’ futures. Few people stop to consider that computers, used incorrectly, may do far more harm than good. New technologies can be valuable educational tools when used in age-appropriate ways by properly trained teachers. But too often schools budget insufficiently for teacher training and technical support. Likewise, studies suggest that few parents know how to properly assist children’s computer learning; much computer time at home may be wasted time, drawing children away from other developmentally important activities such as reading, hobbies, or creative play. Moreover, Dr. Healy finds that much so-called learning software is more edutainment than educational, teaching students more about impulsively pointing and clicking for some trivial goal than about how to think, to communicate, to imagine, or to solve problems. Some software, used without careful supervision, may also have the potential to interrupt a child’s internal motivation to learn. Failure to Connect is the first book to link children’s technology use to important new findings about stages of child development and brain maturation, which are clearly explained throughout. It illustrates, through dozens of concrete examples and guidelines, how computers can be used successfully with children of different age groups as supplements to classroom curricula, as research tools, or in family projects. Dr. Healy issues strong warnings, however, against too early computer use, recommending little or no exposure before age seven, when the brain is primed to take on more abstract challenges. She also lists resources for reliable reviews of child-oriented software, suggests questions parents should ask when their children are using computers in school, and discusses when and how to manage computer use at home. Finally, she offers a thoughtful look at the question of which skills today’s children will really need for success in a technological future -- and how they may best acquire them. Based on years of research into learning and hundreds of hours of interviews and observations with school administrators, teachers, parents, and students, Failure to Connect is a timely and eye-opening examination of the central questions we must confront as technology increasingly influences the way we educate our children.
