Migrations Charlotte McConaghy, 2020-08-04 * INSTANT NATIONAL BESTSELLER * Amazon Editors' Pick for Best Book of the Year in Fiction Visceral and haunting (New York Times Book Review) · Hopeful (Washington Post) · Powerful (Los Angeles Times) · Thrilling (TIME) · Tantalizingly beautiful (Elle) · Suspenseful, atmospheric (Vogue) · Aching and poignant (Guardian) · Gripping (The Economist) Franny Stone has always been the kind of woman who is able to love but unable to stay. Leaving behind everything but her research gear, she arrives in Greenland with a singular purpose: to follow the last Arctic terns in the world on what might be their final migration to Antarctica. Franny talks her way onto a fishing boat, and she and the crew set sail, traveling ever further from shore and safety. But as Franny's history begins to unspool—a passionate love affair, an absent family, a devastating crime—it becomes clear that she is chasing more than just the birds. When Franny's dark secrets catch up with her, how much is she willing to risk for one more chance at redemption? Epic and intimate, heartbreaking and galvanizing, Charlotte McConaghy's *Migrations* is an ode to a disappearing world and a breathtaking page-turner about the possibility of hope against all odds.

Repositioning North American Migration History Marc S. Rodriguez, 2004 An in-depth look at trends in North American internal migration. This volume gathers established and new scholars working on North American immigration, transmigration, internal migration, and citizenship whose work analyzes the development of migrant and state-level institutions as well as migrant networks. With contemporary migration research most often focused on the development of transnational communities and the ways international migrants maintain relationships with their sending region that sustain the circular flow of people, ideas, and traditions across national boundaries it is useful to compare these to similar patterns evident within the terrain of internal

migration. To date, however, international and internal migration studies have unfolded in relative isolation from one another with each operating within these distinct fields of expertise rather than across them. Although there has been some important linking, there has not been a recent major consideration of human migration that works across and within the various borders of the North American continent. Thus, the volume presents a variety of chapters that seek to consider human migration in comparative perspective across the internal/international divide. Marc S. Rodriguez is Assistant Professor of History at Princeton University; Donna R. Gabbaccia is the Mellon Professor of History at the University of Pittsburgh; James R. Grossman is the Vice President of Research and Education at the Newberry Library, Chicago. Contributors: Josef Barton, Wallace Best, Donna Gabbaccia, James Gregory, Tobias Higbie, Mae Ngai, Walter Nugent, Annelise Orleck, Kunal Parker, Kimberly Phillips, Bruno Ramirez, Marc Rodriguez. *Repositioning North American Migration History* is a volume in *Studies in Comparative History*, sponsored by Princeton University's Shelby Cullom Davis Center for Historical Studies.

On the Move Filiz Garip, 2016-11-01 Why do Mexicans migrate to the United States? Is there a typical Mexican migrant? Beginning in the 1970s, survey data indicated that the average migrant was a young, unmarried man who was poor, undereducated, and in search of better employment opportunities. This is the general view that most Americans still hold of immigrants from Mexico. *On the Move* argues that not only does this view of Mexican migrants reinforce the stereotype of their undesirability, but it also fails to capture the true diversity of migrants from Mexico and their evolving migration patterns over time. Using survey data from over 145,000 Mexicans and in-depth interviews with nearly 140 Mexicans, Filiz Garip reveals a more accurate picture of Mexico-U.S migration. In the last fifty years there have been four primary waves: a male-dominated migration from rural areas in the 1960s and '70s, a second migration of

young men from socioeconomically more well-off families during the 1980s, a migration of women joining spouses already in the United States in the late 1980s and '90s, and a generation of more educated, urban migrants in the late 1990s and early 2000s. For each of these four stages, Garip examines the changing variety of reasons for why people migrate and migrants' perceptions of their opportunities in Mexico and the United States. Looking at Mexico-U.S. migration during the last half century, *On the Move* uncovers the vast mechanisms underlying the flow of people moving between nations.

Landscape of Migration Ben Nobbs-Thiessen, 2020-03-19 In the wake of a 1952 revolution, leaders of Bolivia's National Revolutionary Movement (MNR) embarked on a program of internal colonization known as the March to the East. In an impoverished country dependent on highland mining, the MNR sought to convert the nation's vast undeveloped Amazonian frontier into farmland, hoping to achieve food security, territorial integrity, and demographic balance. To do so, they encouraged hundreds of thousands of Indigenous Bolivians to relocate from the overcrowded Andes to the tropical lowlands, but also welcomed surprising transnational migrant streams, including horse-and-buggy Mennonites from Mexico and displaced Okinawans from across the Pacific. Ben Nobbs-Thiessen details the multifaceted results of these migrations on the environment of the South American interior. As he reveals, one of the migrants with the greatest impact was the soybean, which Bolivia embraced as a profitable cash crop while eschewing earlier goals of food security, creating a new model for extractive export agriculture. Half a century of colonization would transform the small regional capital of Santa Cruz de la Sierra into Bolivia's largest city, and the diverging stories of Andean, Mennonite, and Okinawan migrants complicate our understandings of tradition, modernity, foreignness, and belonging in the heart of a rising agro-industrial empire.

Understanding Global Migration James F. Hollifield, Neil Foley, 2022-03-01 Understanding Global Migration offers scholars a groundbreaking account of emerging migration states around the globe, especially in the Global South. Leading scholars of migration have collaborated to provide a birds-eye view of migration interdependence. Understanding Global Migration proposes a new typology of migration states, identifying multiple ideal types beyond the classical liberal type. Much of the world's migration has been to countries in Asia, Africa, the Middle East, and South America. The authors assembled here account for diverse histories of colonialism, development, and identity in shaping migration policy. This book provides a truly global look at the dilemmas of migration governance: Will migration be destabilizing, or will it lead to greater openness and human development? The answer depends on the capacity of states to manage migration, especially their willingness to respect the rights of the ever-growing portion of the world's population that is on the move.

The Promised Land Nicholas Lemann, 1992-03-31 A New York Times bestseller, the groundbreaking authoritative history of the migration of African-Americans from the rural South to the urban North. A definitive book on American history, The Promised Land is also essential reading for educators and policymakers at both national and local levels.

Irregular Migration in Europe Anna Triandafyllidou, 2016-05-06 Irregular Migration in Europe contributes to our knowledge of the scale and nature of the much discussed but under-researched phenomenon of irregular migration in Europe, whilst improving our understanding of the dynamics of irregular migration and its relation to European societies and economies. Presenting a comparative analysis of the experiences and policies of different EU member states, this book draws on an extensive range of sources, many of which have so far been absent from English-

language analyses, to offer an overall picture of irregular migration in twelve EU member states. This volume will be of interest to policy makers and researchers within the fields of migration, sociology and social anthropology, political science, European integration and European studies, political science and public administration.

Migration Past, Migration Future Klaus J. Bade, Myron

Weiner, 1997 The United States is an immigrant country. Germany is not. This volume shatters this widely held myth and reveals the remarkable similarities (as well as the differences) between the two countries. Essays by leading German and American historians and demographers describe how these two countries have become to have the largest number of immigrants among advanced industrial countries, how their conceptions of citizenship and nationality differ, and how their ethnic compositions are likely to be transformed in the next century as a consequence of migration, fertility trends, citizenship and naturalization laws, and public attitudes.

Migration Theory Caroline B. Brettell, James F.

Hollifield, 2014-08-25 During the last decade the issue of migration has increased in global prominence and has caused controversy among host countries around the world. To remedy the tendency of scholars to speak only to and from their own disciplinary perspective, this book brings together in a single volume essays dealing with central concepts and key theoretical issues in the study of international migration across the social sciences. Editors Caroline B. Brettell and James F. Hollifield have guided a thorough revision of this seminal text, with valuable insights from such fields as anthropology, demography, economics, geography, history, law, political science, and sociology. Each essay focuses on key concepts, questions, and theoretical frameworks on the topic of international migration in a particular discipline, but the volume as a whole teaches readers about similarities and differences across the boundaries between one academic field and the next. How, for example, do political scientists wrestle with the question of citizenship as compared with sociologists, and how different is this from the questions that anthropologists explore when they deal with ethnicity and identity? Are economic theories about ethnic enclaves similar to those of sociologists? What theories do historians (the essentializers) and demographers (the modelers) draw upon in their attempts to explain empirical phenomena in the

study of immigration? What are the units of analysis in each of the disciplines and do these shape different questions and diverse models and theories? Scholars and students in migration studies will find this book a powerful theoretical guide and a text that brings them up to speed quickly on the important issues and the debates. All of the social science disciplines will find that this book offers a one-stop synthesis of contemporary thought on migration.

The Age of Migration Hein de Haas, Stephen Castles, Mark J. Miller, 2019-11-21 Long established as the leading textbook on migration and used by students and scholars alike all over the world, this fully revised and updated sixth edition continues to offer an authoritative and cutting-edge account of migration flows, why they occur, and their consequences for both origin and destination societies. International migration is one of the most emotive issues of our times, reforging societies around the world and shaping debates on security, national identity and sovereignty in profound ways. The expert authors of this book provide a truly global and interdisciplinary introduction to this perennially important topic, with chapters covering all of the world's regions and spanning the nineteenth century to the present day. Exploring the significance of migration in relation to recent events and emerging trends, from the policies of the European Union to the Great Recession, this text helps to shed light on the often large gap between the rhetoric and realities of migration. For students of migration studies in disciplines as wide ranging as politics, sociology, geography, area studies, anthropology and history this is an indispensable guide, whether already familiar with the subject matter or approaching the topic for the first time. New to this Edition: - Charts the contemporary politics of migration, including the latest statistical data, summary of policy developments and shifts toward anti-immigrant politics and Islamophobia - A brand new chapter on Categories of Migration used to describe migrants and analyse migration, including a discussion on the topical issue of 'climate refugees' - Extended

World Migration Report 2020 United Nations, 2019-11-27

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

Continental Divides: International Migration in the Americas Katharine M. Donato, Jonathan Hiskey, Jorge

Durand, 2010-08-10 Since Mexico-U.S. migration represents the largest sustained migratory flow between two nations worldwide, much of the theoretical and empirical work on migration has focused on this single case. In the last few decades, however,

migration has emerged as a critical issue across all nations in Latin America and the Caribbean, with the region seeing its position changed from a net migrant-receiving region to one that now stands as one of the foremost sending areas of the world. In this latest volume of the ANNALS, leading migration scholars seek to redress the imbalance offered when only studying a single case with the first systematic assessment of Latin American migration patterns using ongoing research on the Mexican case as a basis for comparison. Each chapter examines specific propositions or findings derived from the Mexican case that have not yet been tested for other Latin American or Caribbean nations. Using a common framework of data, methods, and theories, they offer a new perspective on the causes and consequences of migration in the Western Hemisphere.

Key Concepts in Migration David Bartram, Maritsa V

Poros, Pierre Monforte, 2014-06-19 Demonstrates that the study of international migration has really come of age. From acculturation to undocumented immigration, the authors consider more than three dozen concepts at the heart of migration studies. Clearly written in a highly readable style, the book is a valuable resource for students and scholars alike. - Nancy Foner, City University of New York This very useful and authoritative compendium explicates thirty-eight concepts central to analysis of international migration. It is accessible to undergraduate students and even can enrich graduate courses. It nicely complements books like *The Age of Migration* or *Exceptional People*. Concision is a virtue! - Mark J. Miller, University of Delaware This book provides lucid and intuitive explanations of the most important migration concepts as used in classrooms, among policymakers, and in popular and academic discourse. Arguing that there is a clear need for a better public understanding of migration, it sets out to clarify the field by exploring relevant concepts in a direct and engaging way. Each concept: Includes an easy to understand definition Provides real-world examples Gives suggestions for further reading Is carefully

cross-referenced to other related concepts It is an ideal resource for undergraduate and post-graduate students studying migration in sociology, politics, development and throughout the social sciences, as well as scholars in the field and practitioners in governmental and non-governmental organizations.

Migration Control in the North Atlantic World Andreas Fahrmeir, Olivier Faron, Patrick Weil, 2005 The migration movements of the 20th century have led to an increased interest in similarly dramatic population changes in the preceding century. The contributors to this volume - legal scholars, sociologists, political scientist and historians - focus on migration control in the 19th century, concentrating on three areas in particular: the impact of the French Revolution on the development of modern citizenship laws and on the development of new forms of migration control in France and elsewhere; the theory and practice of migration control in various European states is examined, focusing on the control of paupers, emigrants and ordinary travelers as well as on the interrelationship between the different administrative levels - local, regional and national - at which migration control was exercised. Finally, on the development of migration control in two countries of immigration: the United States and France. Taken altogether, these essays demonstrate conclusively that the image of the 19th century as a liberal era during which migration was unaffected by state intervention is untenable and in serious need of revision.

Irregular Migration from the Former Soviet Union to the United States Saltanat Liebert, 2009-09-10 This book is the first in English to examine irregular migration from post-Soviet states, focusing in particular on migration to the United States. Due to globalization and the end of the Cold War, citizens of the former Soviet Union are on the move as never before. The political, economic, and social changes that followed the collapse of the Soviet Union resulted in widespread poverty and unemployment and also created a large pool of potential migrants. Thousands of

individuals from poor post-Soviet countries migrate to the West in search of better-paid work in an effort to provide for themselves and their families both through legal channels, and in their absence, illegally. In recent years immigration has become a topic of heated debate in many Western countries: the estimated number of undocumented immigrants in the United States has reached 11 million, precipitating a new legislative focus on reforming the immigration system, culminating in the highly controversial Border Protection, Antiterrorism, and Illegal Immigration Control Act passed by the House of Representatives in 2005 but eventually killed in the Senate. This book examines all these issues, discussing the reasons for migration, the profile of the migrants, how the process of migration works and how the migrants obtain their U.S. visas, where they work once in the United States and their intentions with regards to their possible return home. This book explores the reality of post-Soviet migration where the mostly well-educated former professionals end up in low-wage unskilled jobs as domestic workers, child care givers, and construction workers, sometimes in exploitative labor situations. Overall, this book provides a detailed account of post-Soviet illegal migration to the United States, focusing in particular on Central Asian and Georgian migrants, and will be of interest to scholars of US politics as well as Russia, Central Asia, and the Caucasus specialists.

Migration Michael H. Fisher, 2014-01 Fisher explores the process of migration chronologically and at levels varying from the migration of an individual community, to larger patterns of the collective movements of major ethnic groups, to the more abstract study of emigration, migration, and immigration.
