Working Remotely Teresa Douglas,Holly Gordon,Mike Webber,2020-04-07 The world is now your office! You can work from home, from a coffee shop, or even from the gym—but how do you keep on task and stay motivated when you're alone. In Working Remotely, authors Mike, Holly, and Teresa discuss how to ward off toxic levels of loneliness, how to get what you need from colleagues spread across the world, and how to network and grow in your career when you are sitting in an office of one, plus many other topics that will help you survive and thrive as a remote worker. Mike, Holly, and Teresa use their different paths through Kaplan to help the remote worker figure out how to set up the right headspace for them. “Working Remotely paints a very real picture of what it's like to be a remote worker in an organisation... In contrast to most books on remote work which have been written with managers, business owners or freelancers in mind, Secrets of the Remote Workforce speaks directly to employees, guiding them through their day to day.” -Pilar Orti Director of Virtual not Distant “Working Remotely is a terrific map for helping employees who work remotely take charge of their own career. The authors have all survived and thrived as remote employees... While other resources focus on how to manage remote employees, this book

highlights the power that employees have to drive success for themselves.” -Susan Cates, Strategic Advisor

The Comfort Crisis Michael Easter, 2021-05-11 “If you’ve been looking for something different to level up your health, fitness, and personal growth, this is it.”—Melissa Urban, Whole30 CEO and New York Times bestselling author of *The Book of Boundaries* “Michael Easter’s genius is that he puts data around the edges of what we intuitively believe. His work has inspired many to change their lives for the better.”—Dr. Peter Attia, #1 New York

Times bestselling author of *Outlive* Discover the evolutionary mind and body benefits of living at the edges of your comfort zone and reconnecting with the wild—from the author of *Scarcity Brain*, coming in September! In many ways, we're more comfortable than ever before. But could our sheltered, temperature-controlled, overfed, underchallenged lives actually be the leading cause of many of our most urgent physical and mental health issues? In this gripping investigation, award-winning journalist Michael Easter seeks out off-the-grid visionaries, disruptive genius researchers, and mind-body conditioning trailblazers who are unlocking the life-enhancing secrets of a counterintuitive solution: discomfort. Easter's journey to understand our evolutionary need to be challenged takes him to meet the NBA's top exercise scientist, who uses an ancient Japanese practice to build championship athletes; to the mystical country of Bhutan, where an Oxford economist and Buddhist leader are showing the world what death can teach us about happiness; to the outdoor lab of a young neuroscientist who's found that nature tests our physical and mental endurance in ways that expand creativity while taming burnout and anxiety; to the remote Alaskan backcountry on a demanding thirty-three-day hunting expedition to experience the rewilding secrets of one of the last rugged places on Earth; and more. Along the way, Easter uncovers a blueprint for leveraging the power of discomfort that will dramatically improve our health and happiness, and perhaps even help us understand what it means to be human. *The Comfort Crisis* is a bold call to break out of your comfort zone and explore the wild within yourself.

Hyperspectral Remote Sensing Michael Theodore Eismann, 2012 Hyperspectral remote sensing is an emerging, multidisciplinary field with diverse applications that builds on the principles of material spectroscopy, radiative transfer, imaging spectrometry, and hyperspectral data processing. While there are many resources that suitably cover these areas individually and focus on specific aspects of the hyperspectral remote sensing field, this book provides a holistic treatment that captures its multidisciplinary nature. The content is oriented toward the physical principles of hyperspectral remote sensing as opposed to applications of hyperspectral technology. Readers can expect to finish the book armed with the required knowledge to understand the immense literature available in this technology area and apply their knowledge to the understanding of material spectral properties, the design of hyperspectral systems, the analysis of hyperspectral imagery, and the application of the technology to specific problems.

Super 8 Filmmaker, 1980

Lights! Camera! Action! Gregory G. Sarno, 2005 Action, action, yet more action. No action film worthy of genre would be caught dead without its fair

share of red-hot lead and no-holds-barred fisticuffs, high-octane pursuits and gravity-defying gymnastics. Then again, nonstop action soon wears thin absent a rooting interest in Last Man Standing First Woman to Cross Finish Line. Rooting interest inheres not in overt action, no matter how artfully choreographed or breathtakingly executed. Rather, rooting interest comes from empathy for the protagonist and, more precisely, from the dramatic action embodied by the protagonist's struggle to accomplish a worthy goal opposed by a formidable foe. Action is a double-edged blade, overt action being a necessary but insufficient condition to sustain viewer interest, which soars and ebbs to extent that dramatic action intersects with-injects meaningfulness into-gunplay and fistfest, acrobatics and pyrotechnics. Lights! Camera! Action! spotlights the essential elements of action comedy, action romance, and action adventure. It underscores the crucial distinction between overt and dramatic action, which a screenwriter must weave together in order for an action script to hum and shimmer, pulsate and zing.
