MindField John Egbert,2006-11-22 What would happen if most of the people in America became deaf almost overnight? Chaos? Financial collapse? Anarchy? None of the above? MindField is a thrill ride with a message; a premise torn right out of today's headlines. A terrorist cell ignites an aerosol dispersion of what is thought to be deadly bacteria-spinal meningitis. It quickly spreads from a small town in Montana to nearly 30 states, eventually affecting more than three million people-an epidemic of nation-threatening proportions. However, the problem isn't death-it's deaf. The physical symptoms of the disease disappear after three weeks, the only remaining tragedy is all those who are stricken become permanently deaf-a common side effect of spinal meningitis. The United States is turned inside out, now a country where millions of the inhabitants can't hear. An underground government is formed deep beneath the NORAD facilities in Colorado. A catastrophe of unimaginable proportions-or is it? MindField is a fast paced, plot driven suspense novel with a pleasant surprising, and incredibly potent message about the way we might live our lives if we all had to listen with our eyes and hearts, and how the world might be a much better place for it.

**Understanding Our Mind (EasyRead Super Large 20pt Edition) ,**

The Infinite Mindfield Anthony Peake,2013-10-03 Using information from the cutting edge of modern science, Peake presents startling evidence that the inner worlds of our mystics and shamans are as real, or possibly even more real, than the reality we experience in waking life. As his starting point, Peake examines the widespread historical belief that the mid-brain's pine-cone shaped pineal gland activates the third eye described by mystics and seers. Through careful analysis of ancient religious texts and artifacts, he gives evidence that the spiritual properties of the pineal gland have been embedded in myths and cultures across the globe. (Why else would the Buddha so often be found wearing a pine cone hat?) Peake then shows that it is through this small organ that we experience lucid dreaming, out-of-body experiences, hypnagogic imagery, near-death experiences, astral travel and the kundalini experience. The book ends with the mind-blowing conclusion that all living beings are one unitary consciousness experiencing itself subjectively.

**A Clown in a Grave** Michael Skau,1999 Skau covers the complete works of Corso, one of the four major Beat Generation writers (with Jack Kerouac, Allen Ginsberg, and William S. Burroughs) who attempted to provide an alternative to what they saw as the academic forms of literature dominating American writing through the 1940s and 1950s.--BOOK JACKET.

**The Mind-Brain Matrix** Kerry P. Gillespie,2017-08-23 This is a self-help book centered on a nonscientific approach to the various roles the mind and the brain play in our lives. The basis for the approach is the authors research and experience working with patients related to stress management. It is a common-sense text that deals with stress and mindfulness and offers a new way of looking at how we live our lives. In between each chapter, suggestions are included on how to be more present in the moment, more mindful, which are designed to supplement the chapter material.

*Mindfield* John F. Egbert,2006 After a terrorist cell ignites an aerosol dispersion of bacterial spinal meningitis, more than three million Americans are left deaf. They must learn to communicate and work to put together their country's civilization.

Wheels of Light Rosalyn Bruyere,1994-04-12 A leading figure in the field of healing and mind/body research presents an intriguing, multidisciplinary, and multicultural study of the human energy field. A most impressive blend of extensive research and expert personal observation.--Meditation magazine. Photos; drawings.

**The Global Mind and the Rise of Civilization** Carl Johan Calleman,2016-05-17 How the global mind drives the evolution of both consciousness and civilization • Explains how our brains receive consciousness from the global mind, which upgrades human consciousness according to a pre-set divine time frame • Reveals how the Mayan Calendar provides a blueprint for these consciousness downloads throughout history • Examines the mind shift in humans and the development of pyramids and civilization in ancient Egypt, Sumer, South America, and Asia beginning in 3115 BCE In each culture the origins of civilization can be tied to the arising of one concept in the human mind: straight lines. Straight and perpendicular lines are not found in nature, so where did they come from? What shift in consciousness occurred around the globe that triggered the start of rectangular building methods and linear organization as well as written language, pyramid construction, mathematics, and art? Offering a detailed answer to this question, Carl Calleman explores the quantum evolution of the global mind and its holographic resonance with the human mind. He examines how our brains are not thinking machines but individual receivers of consciousness from the global mind, which creates holographic downloads to adjust human consciousness to new cosmological circumstances. He explains how the Mayan Calendar provides a blueprint for these downloads throughout history and how the global mind, rather than the individual, has the power to make civilizations rise and fall. He shows how, at the beginning of the Mayan 6th Wave (Long Count) in 3115 BCE, the global mind gave human beings the capacity to conceptualize spatial relations in terms of straight and perpendicular lines, initiating the building of pyramids and megaliths around the world and leading to the rise of modern civilization. He examines the symbolism within the Great Pyramid of Giza and the pyramid at Chichén Itzá and looks at the differences between humans of the 6th Wave in ancient Egypt, Sumer, South America, and Asia and the cave painters of the 5th Wave. He reveals how the global mind is always connected to the inner core of the Earth and discusses how the two halves of the brain parallel the civilizations of the East and West. Outlining the historical, psychological, geophysical, and neurological roots of the modern human mind, Calleman shows how studying early civilizations offers a means of understanding the evolution of consciousness.

*Navigating the Mindfield* Scott O. Lilienfeld,John Ruscio,Steven J. Lynn,2008 A dizzying array of popular psychology books, articles, and promotion campaigns tout a multitude of remedies for psychological problems. If you or someone you know is seeking therapy, this excellent reference book will provide needed guidance for navigating the mental health maze.

**Dancing Naked in the Mind Field** Kary Mullis,2010-11-17 Here is a multidimensional playland of ideas from the world's most eccentric Nobel-Prize winning scientist. Kary Mullis is legendary for his invention of PCR, which redefined the world of DNA, genetics, and forensic science. He is also a surfer, a veteran of Berkeley in the sixties, and perhaps the only Nobel laureate to describe a possible encounter with aliens. A scientist of boundless curiosity, he refuses to accept any proposition based on secondhand or hearsay evidence, and always looks for the money trail when scientists make announcements. Mullis writes with passion and humor about a wide range of topics: from global warming to the O. J. Simpson trial, from poisonous spiders to HIV, from scientific method to astrology. Dancing Naked in the Mind Field challenges us to question the authority of scientific dogma even as it reveals the workings of an uncannily original scientific mind.

From Dualism to Oneness in Psychoanalysis Yorai Sella,2018-01-19 From Dualism to Oneness in Psychoanalysis: A Zen Perspective on the Mind-Body Question focuses on the shift in psychoanalytic thought, from a view of mind-

body dualism to a contemporary non-dualistic perspective. Exploring this paradigm shift, Yorai Sella examines the impact of the work of psychoanalysts and researchers, such as Winnicott, Bion, Daniel Stern and Kohut, and delineates the contributions of three major schools of psychoanalytic thought in which the non-dualistic view is exemplified: (1) intersubjective; (2) neuro-psychoanalytic; and (3) mystically inclined psychoanalysis. Reaching beyond the constraints of dualism, Sella delineates the interdisciplinary approaches leading to psychoanalysis's paradigm shift. Focusing on the unique contribution of Zen-Buddhism, the book draws on Ehei Dōgen's philosophy to substantiate the non-duality of subject and object, body and mind - ultimately leading from alienation and duality to what Bion has termed at one-ment. The way in which psychoanalytic theory and practice may develop further along these lines is demonstrated throughout the book in a variety of clinical vignettes. This book will inform the practice of all psychoanalysts, mental health professionals, psychotherapists and clinicians interested in mind-body issues in psychotherapy, in the philosophy of psychoanalysis, and in East-West dialogue.

**Redirecting Ethnic Singularity** Yiorgos Anagnostou, Yiorgos D. Kalogeras, Theodora Patrona, 2022-05-03 Promotes the understanding of Italian Americans and Greek Americans through the study of their interactions and juxtapositions. *Redirecting Ethnic Singularity: Italian Americans and Greek Americans in Conversation* contributes to U.S. ethnic and immigration studies by bringing into conversation scholars working in the fields of Italian American and Greek American studies in the United States, Europe, and Australia. The work moves beyond the “single group” approach—an approach that privileges the study of ethnic singularity—to explore instead two ethnic groups in relation to each other in the broader context of the United States. The chapters bring into focus transcultural interfaces and inquire comparatively about similarities and differences in cultural representations associated with these two groups. This co-edited volume contributes to the fields of transcultural and comparative studies. The book is multi-disciplinary. It features scholarship from the perspectives of architecture, ethnomusicology, education, history, cultural and literary studies, and film studies, as well as whiteness studies. It examines the production of ethnicity in the context of American political culture as well as that of popular culture, including visual representations (documentary, film, TV series) and “low brow” crime fiction. It includes analysis of literature. It involves comparative work on religious architecture, transoceanic circulation of racialized categories, translocal interconnections in the formation of pan-Mediterranean identities, and the making of the immigrant past in documentaries from Italian and Greek filmmakers. This volume is the first of its kind in initiating a multidisciplinary transcultural and comparative study across European Americans.

**The Mind-Field of Success Or Defeat** Rad Khan, 2005-02 Mind-Field of success or defeat, explores why the mind is the greatest battlefield, and the reasons for success or defeat. This book will challenge and motivate the readers to walk in obedience to God's Word and to fulfill our purpose and destiny, according to God's design and not according to the dictates of our minds. It will provide valuable insights on how to achieve the victory that Jesus obtained for us on the cross of Calvary.

**Relational Awareness** Vasileios Korompilias,

From Minefield to Mind Field Albert Globus, M. D., 2014-11-07 What an adventure: changing one's life. My poems highlight the desire to be self-sufficient, autonomous, decisive, and creative. My essays enhance understanding. This is what happened when I did it. You can too. Often confusing, more often fun. Therapy is hope for the overwhelmed. We direct our lives by exercising the mind's eye. Section I pits our experience against what confronts us. Section II focuses on spirit and determination. We decide who we are by self-knowledge. Section III outlines the impact of those who are closest to us on our well-being and future capacity to respond to our misfortunes and opportunities.

*Towards a History of Consciousness* Vwadek P. Marciniak, 2006 Towards a History of Consciousness: Space, Time, and Death offers a cogent and compelling discussion of the neglected topic of the history of consciousness. An analysis of our postmodern ontology reveals deep but neglected roots. What are those roots and how did they grow? Is there a self without consciousness? What is the relation of the self to the individual? Does the recognition of death contribute to the growth of consciousness? As a survey of western history, this work pushes the boundaries of the understanding of consciousness in intriguing and sometimes provocative directions. This integrative study is intended for the serious, curious student and thinker.

*The Method of No-Method* Sheng Yen, 2008-11-11 Here is a spiritual practice uncomplicated enough for anyone to learn, yet rich enough to be worked with for a lifetime. The traditional Chan (Chinese Zen) practice called Silent Illumination begins with nothing more than putting aside all thoughts except the awareness of oneself “just sitting.” It’s so simple in execution that it has sometimes been called the “method of no-method”—yet simple as it is, the practice is subtle and profound, with the potential for ever subtler refinements as the practitioner moves toward mastery of it. When fully penetrated, this radical form of emptying one’s busy mind-stream leads to perception of the vast ocean of pure awareness.

Adopting the Song of Expression: An Emotional Symphony within **Mindfield 20**

In some sort of used by screens and the ceaseless chatter of instantaneous conversation, the melodic splendor and emotional symphony created by the published term usually disappear into the back ground, eclipsed by the constant sound and disturbances that permeate our lives. Nevertheless, nestled within the pages of **Mindfield 20** a stunning literary treasure full of organic emotions, lies an immersive symphony waiting to be embraced. Constructed by a masterful musician of language, this fascinating masterpiece conducts visitors on a psychological trip, skillfully unraveling the hidden songs and profound impact resonating within each cautiously crafted phrase. Within the depths with this poignant assessment, we shall examine the book's main harmonies, analyze their enthralling writing design, and submit ourselves to the profound resonance that echoes in the depths of readers' souls.
