The Referral Engine John Jantsch,2012-09-25 The small business guru behind Duct Tape Marketing shares his most valuable lesson: how to get your customers to do your best marketing for you. The power of glitzy advertising and elaborate marketing campaigns is on the wane; word- of-mouth referrals are what drive business today. People trust the recommendation of a friend, family member, colleague, or even stranger with similar tastes over anything thrust at them by a faceless company. Most business owners believe that whether customers refer them is entirely out of their hands. But science shows that people can't help recommending products and services to their

friends-it's an instinct wired deep in the brain. And smart businesses can tap into that hardwired desire. Marketing expert John Jantsch offers practical techniques for harnessing the power of referrals to ensure a steady flow of new customers. Keep those customers happy, and they will refer your business to even more customers. Some of Jantsch's strategies include: -Talk with your customers, not at them. Thanks to social networking sites, companies of any size have the opportunity to engage with their customers on their home turf as never before-but the key is listening. -The sales team is the most important part of your marketing team. Salespeople are the company's main link to customers, who are the main source of referrals. Getting them on board with your referral strategy is critical. -Educate your customers. Referrals are only helpful if they're given to the right people. Educate your customers about whom they should be talking to. The secret to generating referrals lies in understanding the Customer Referral Cycle-the way customers refer others to your company who, in turn, generate even more referrals. Businesses can ensure a healthy referral cycle by moving customers and prospects along the path of Know, Like, Trust, Try, Buy, Repeat, and Refer. If everyone in an organization keeps this sequence in mind, Jantsch argues, your business will generate referrals like a well-oiled machine. This practical, smart, and original guide is essential reading for any company looking to grow without a fat marketing budget.

  Using Technology with Classroom Instruction That Works Howard Pitler,Elizabeth R. Hubbell,Matt Kuhn,2012-08-02 Technology is ubiquitous, and its potential to transform learning is immense. The first edition of Using Technology with Classroom Instruction That Works answered some vital questions about 21st century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of Classroom Instruction That Works, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: * Setting objectives and providing feedback * Reinforcing effort and providing recognition * Cooperative learning * Cues, questions, and advance organizers * Nonlinguistic representations * Summarizing and note taking * Assigning homework and providing practice * Identifying similarities and differences * Generating and testing hypotheses Each strategy-focused chapter features examples—across grade levels and subject areas, and drawn from real-life lesson plans and projects—of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and—most of all—more effective.
