Pioneering with Taconite Edward W. Davis, 2004-03 With humor and insight, E. W. Davis tells the story that begins with the discovery of then-valueless taconite on Minnesota's Mesabi Iron Range in 1870 and several decades of attempts to process taconite commercially. Davis details the ups and downs of the exciting, decades-long research effort that resulted in a workable extraction method, followed by frustrating attempts to form the concentrate into small pellets. Finally, Davis describes building the first successful commercial processing plant at Silver Bay in the 1950s and the contributions by various companies to the birth of the industry. Along the way insider Davis recounts the founding of the three new northern Minnesota taconite towns, Babbitt, Silver Bay, and Hoyt Lakes.

Taconite Dreams Jeffrey T. Manuel, 2015 Winner of the Midwestern History Association's 2016 Hamlin Garland Prize The Iron Range earned its name honestly: it was once among the world's richest iron ore mining districts. The Iron Range propelled the U.S. steel industry in the late nineteenth century, and iron mining sustained generations in the region with work and a strong economy. But long before most other parts of the country faced the realities of industrial decline, Minnesota's Iron Range was already striving to maintain its core industry. In *Taconite Dreams: The Struggle to Sustain Mining on Minnesota's Iron Range, 1915-2000*, Jeffrey T. Manuel examines how the region fought the dislocation that came with economic changes, technological advances, and global shifts in industrial production. On the Iron Range, efforts included the development of taconite mining as a technological fix for the drop in hematite mining. Manuel describes the Iron Range's modern history and how the downturn was opposed by individuals, civic groups, and commercial interests. The first book dedicated to thoroughly exploring this era on the Iron Range, *Taconite Dreams* demonstrates how the area fit into a larger story of regions wrestling with deindustrialization in the twentieth century. The 1964 taconite amendment to Minnesota's constitution, the bruising federal pollution lawsuit that closed a taconite plant, and the Iron Range Resources and Rehabilitation Board's economic development policy are all discussed. Ultimately, the resistance against economic decline is also a battle over mining's memory and legacy, one that continues today. Manuel's history sheds much-needed light on this important yet widely overlooked mining region as well as the impact of the past century's struggles on the people who call it home.
