The Rise and Fall of Harland and Wolff Tom McCluskie MBE MBE,2013-03-01 Harland and Wolff, once acknowledged as the greatest and best-known shipbuilding company in the world, for many years enjoyed a mighty eminence before a gradual descent into near obscurity. This illustrated book, told from the unique perspective of someone who was there at the time, chronicles the history of the organisation from its creation to the present day, from its halcyon days to its present incarnation. Today, the company is no longer involved in shipbuilding, maintaining only a small ship repair and engineering facility and occupying a fraction of its previously vast complex. At its peak Harland and Wolff directly employed over 45,000 people, with even more in its subsidiary companies. Well-known Harland and Wolff former employee Tom McCluskie, who was a technical consultant to James Cameron on the movie Titanic, sheds light on many little-known facts about the business, delves into the human interest stories, and recounts both the mighty zenith and ignominious demise of this great enterprise.

Target Corinth Canal Platon Alexiades,2015-04-30 During the Second World War the Corinth Canal assumed an importance disproportionate to its size. It was the focus of numerous special Allied operations to prevent oil from the Black Sea reaching Italy, to delay the invasion of Crete and severing the vital German supply lines to Rommel's Army in North Africa.German airborne forces occupied the Canal to cut off the ANZAC retreat and Hitler needed the Canal kept open to maintain control of the Aegean Sea. Were this lost, he feared Turkey entering the War on the Allied side.Target Corinth Canal unearths a treasure trove of facts on the little known operations by SOE and other special force units. Heroes such as Mike Cumberlege emerge from the pages of this splendid work of military history.

Japanese Naval and Merchant Shipping Losses During World War II by All Causes United States. Joint Army-Navy Assessment Committee,1947

The Gathering Storm Geirr Haarr,2013-10-15 This is a superb survey of the fierce naval struggles, from 1939 up to the invasion of the Norway in April 1940. Beginning with the sinking of the German fleet at Scapa Flow in 1919, it then covers the rebuilding of the Kriegsmarine and parallel developments in the Royal Navy, and in the European navies. Focusing on the actions at sea after the fall of Poland, this history covers the sinking of Courageous, the German mining of the British East Coast, the Northern Patrol, the sinking of Rawalpindi, small ship operations in the North Sea and German Bight, the Altmark incident, German surface raiders and the early stages of the submarine war in the Atlantic. Researched extensively in German, British, and other archives, the work is intended to paint a balanced and detailed picture of this significant period of the war when the opposing naval forces were adapting to a form of naval warfare quite different to that experienced in WWI.

Duty Honor Sacrifice Ralph Christopher,2007-09-12 For two-thousand years, the Chinese, French, Japanese and Republic of Vietnam forces tried to pacify the Mekong Delta and failed. The United States Ninth Infantry Division, and U.S. Naval Forces of Vietnam, did it in a little over three years, but at a high cost. They fought for freedom, they fought with honor, but in the end they fought for each other.

Warships of the Soviet Fleets 1939–1945 Przemyslaw Budzbon,Jan Radziemski,Marek Twardowski,2022-12-12 Seventy-five years after the end of the Second World War the details of Soviet ships, their activities and fates remain an enigma to the West. In wartime such information was classified and after a brief period of glasnost ('openness') the Russian state has again restricted access to historical archives. Therefore, the value – and originality – of this work is difficult to exaggerate. It sees the first publication of reliable data on both the seagoing fleets and riverine flotillas of the Soviet Navy, listing over 6200 vessels from battleships to river gunboats, and mercantile conversions as well as purpose-built warships. This second part of the three-volume series includes all the remaining fighting vessels not already covered in Volume I. Beginning with the Uragan class – rated as Escort Ships and the first seagoing warships designed by the Soviet Union – the book then moves on to Submarine Hunters, both large and small, Patrol craft, Minelayers and Minesweepers, and unusual types like Floating Artillery Batteries and Anti-Aircraft Defense Ships, concluding with Landing Ships and Craft. Many of these vessels have hitherto been poorly documented but given the nature of the land-centered Soviet war against Germany their contribution should not be underestimated. The details of their service and, not least, the circumstances of their loss, constitute a major addition to Western understanding of the Soviet Navy's war effort. This is undoubtedly one of the most important naval reference works of recent years and will be welcomed by anyone with an interest in warships, the Soviet Navy or wider maritime aspects of the Second World War. Furthermore, as recent Russian actions appear to revive Soviet-era aspirations, this book offers both new insights and valuable background of contemporary relevance.

A Bridge of Ships James S. Pritchard,2011 The second World War dramatically affected Canada's shipbuilding industry. James Pritchard describes the rapidly changing circumstances and personalities that shaped government shipbuilding policy, the struggle for steel, the expansion of ancillary industries, and the cost of Canadian wartime ship production.

The Navy of World War II, 1922-1947 Paul Silverstone,2012-09-10 The Navy of World War II, 1922-1946 comprehensively covers the vessels that defined this momentous 24-year period in U.S. naval history. Beginning with the lean, pared-down navy created by the treaty at the Washington Naval Conference, and ending with the massive, awe-inspiring fleets that led the Allies to victory in the Second World War, the fourth volume in the celebrated U.S. Navy Warship series presents a detailed guide to all the warships that exhibited the might of the U.S. Navy to the fullest. Showcasing all the ships—both the famous and the often overlooked-that propelled the U.S Navy to prominence in the first half of the twentieth century, The Navy of World War II catalogues all the warships from this era, including those that did battle in the European, Mediterranean, and Pacific Theaters from 1941-1946. From the fleet attacked at Pearl Harbor, to those that fought valiantly in the Battle of the Guadalcanal, to the official surrender of the Japanese on the deck of the USS Missouri, this latest volume is the definitive guide to the warships that defined this pivotal period in U.S. naval history. Each volume in the U.S. Navy Warship series represents the most meticulous scholarship for its particular era, providing an authoritative account of every ship in the history of the U. S. Navy from its first incarnation as the Continental Navy to its present position as one of the world's most formidable naval superpowers. Featuring convenient, easy-to-read tabular lists, every book in the series includes an abundance of illustrations, some never before published, along with figures for actions fought, damages sustained, casualties suffered, prizes taken, and ships sunk, ultimately making the series an indispensable reference tool for maritime buffs and military historians alike.
