Patriotic Education in a Global Age Randall Curren,Charles Dorn,2018-04-30 Should schools attempt to cultivate patriotism? If so, why? And what conception of patriotism should drive those efforts? Is patriotism essential to preserving national unity, sustaining vigorous commitment to just institutions, or motivating national service? Are the hazards of patriotism so great as to overshadow its potential benefits? Is there a genuinely virtuous form of patriotism that societies and schools should strive to cultivate? In *Patriotic Education in a Global Age*, philosopher Randall Curren and historian Charles Dorn address these questions as they seek to understand what role patriotism might legitimately play in schools as an aspect of civic education. They

trace the aims and rationales that have guided the inculcation of patriotism in American schools over the years, the methods by which schools have sought to cultivate patriotism, and the conceptions of patriotism at work in those aims, rationales, and methods. They then examine what those conceptions mean for justice, education, and human flourishing. Though the history of attempts to cultivate patriotism in schools offers both positive and cautionary lessons, Curren and Dorn ultimately argue that a civic education organized around three components of civic virtue—intelligence, friendship, and competence—and an inclusive and enabling school community can contribute to the development of a virtuous form of patriotism that is compatible with equal citizenship, reasoned dissent, global justice, and devotion to the health of democratic institutions and the natural environment. *Patriotic Education in a Global Age* mounts a spirited defense of democratic institutions as it situates an understanding of patriotism in the context of nationalist, populist, and authoritarian movements in the United States and Europe, and will be of interest to anyone concerned about polarization in public life and the future of democracy.

The Theory and Practice of Virtue Education Tom

Harrison, David Ian Walker, 2018-01-03 The Theory and Practice of Virtue Education offers the reader a comprehensive and authoritative account of both the theoretical and practical complexities of cultivating virtue in education and beyond. The book moves beyond the usual philosophical literature that merely discusses virtue in the abstract, and offers scholarly, research-informed suggestions for practice. Drawn from a highly successful international conference organised by the Jubilee Centre for Character and Virtues, the chapters in this volume offer a unique insight into the varieties of approaches that leading scholars have identified for putting the learning and nurturing of virtues into practice. Featured are chapters from internationally acclaimed scholars primarily in the fields of philosophy, psychology and education, which are categorised under three headings: philosophical and theoretical foundations for cultivating virtues; developing virtues in practice; and nurturing specific virtues. Beginning with chapters that examine differing theoretical complexities of virtue education, the book then moves on to explore different approaches to nurturing virtue in the classroom and beyond. This practical approach is further evidenced in the

final section, where individual virtues are discussed. The Theory and Practice of Virtue Education highlights the theoretical complexity of putting virtue education into practice and, as a result, is of real use to researchers, academics and postgraduates in the fields of education, philosophy, psychology, sociology and theology. It should also be essential reading for educators in character and virtue.
