The Full-Length Mirror Wu Hung,2022-11-28 Beautifully illustrated, a stirring and wide-ranging reflection on art, technology, culture—and the full-length mirror. This book tells two stories about the full-length mirror. One story, through time and space, crisscrosses the globe to introduce a broad range of historical actors: kings and slaves, artists and writers, merchants and craftsmen, courtesans, and commoners. The other story explores the connections among objects, painting, and photography, the full-length mirror providing a new perspective on historical artifacts and their images in art and visual culture. The Full-Length Mirror represents a new kind of global art history in which “global” is understood in terms of both geography and visual medium, a history encompassing Europe, Asia, and North America, and spanning over two millennia from the fourth century BCE to the early twentieth century.

Astrophysical Techniques C.R. Kitchin,2020-07-27 Long used in undergraduate and introductory graduate courses, *Astrophysical Techniques*, Seventh Edition provides an accessible yet comprehensive account of the innovative instruments, detectors, and techniques employed in astronomy and astrophysics. Emphasizing the underlying unity of all astronomical observations, this popular textbook provides a coherent state-of-the-art account of the instruments and techniques used in current astronomy and astrophysics. Fully updated throughout, this seventh edition builds upon the sixth edition, covering improved techniques and cutting-edge methods in the field, as well as other exciting new developments in gravitational waves, dark matter and energy, the use of photonics, and astronomy education and outreach, in addition to further detailed discussions on the latest scientific instruments and individual detectors. The book is written in a very accessible manner, and most of the mathematics is accessible to those who have attended a mathematics course in their final years at school. Nevertheless, the treatment of the topics in general is at a sufficiently high level to be of use to those professionals seeking technical information in areas of astronomy with which they might not be completely familiar. Key Features: Details the instrumentation and theory of astronomical observations, including radio waves, gamma rays, cosmic rays, neutrinos, gravitational waves and dark matter and energy and more Presents the background theory and operating practice of state-of-the-art detectors and instruments Fully updated to contain the latest technology and research developments

Mirror, Mirror Off the Wall Kjerstin Gruys,2013-05-02 A scholar and bride-to-be spends a year without mirrors to get a better view of what really matters When Kjerstin Gruys became engaged, she was thrilled—until it was time to shop for a wedding dress. Having overcome an eating disorder years before, Gruys found herself struggling to maintain a positive self-image; so she decided to refocus her attention. *Mirror, Mirror Off the Wall* charts Gruys's awakening as she vows to give up mirrors and other reflective surfaces, relying on friends and her fiancé to help her gauge both her appearance and outlook on life. The result? A renewed focus on what truly matters, regardless of smeared makeup or messy hair. With humorous and poignant scenes from Gruys' life, *Mirror, Mirror Off the Wall* sparks important conversations about body image and reclaiming the power to define beauty.

Adaptive Optics for Industry and Medicine Gordon D Love,1999-12-13 This volume contains state-of-the-art research papers on adaptive optics used outside the usual astronomical and military applications. It is the first book to cover this new area of research. One of the main industrial applications is in the control of laser wavefronts, and the book contains papers on both intra- and extra-laser cavity correction. The measurement and control of ocular aberrations is the major medical application, and the topics are discussed by leading researchers in the field. Papers on adaptive optics components specifically for non-astronomical systems are also presented. Other topics include laser communications, microscopy and low-cost systems.
