**Forging the Star** David S. Turk,2016-08-15 What do diverse events such as the integration of the University of Mississippi, the federal trials of Teamsters President Jimmy Hoffa, the confrontation at Ruby Ridge, and the aftermath of Hurricane Katrina have in common? The U.S. Marshals were instrumental in all of them. Whether pursuing dangerous felons in each of the 94 judicial districts or extraditing them from other countries; protecting federal judges, prosecutors, and witnesses from threats; transporting and maintaining prisoners and detainees; or administering the sale of assets obtained from criminal activity, the U.S. Marshals Service has adapted and overcome a mountain of barriers since their founding (on September 24, 1789) as the oldest federal law enforcement organization. In *Forging the Star*, historian David S. Turk lifts the fog around the agency's complex modern period. From the inside, he allows a look within the storied organization. The research and writing of this singular account took over a decade, drawn from fresh primary source material with interviews from active or retired management, deputy U.S. marshals who witnessed major events, and the administrative personnel who supported them. *Forging the Star* is a comprehensive official history that will answer many questions about this legendary agency.

Frequency, Forms and Functions of Cleft Constructions in Romance and Germanic Anna-Maria De Cesare, 2014-11-10 The volume describes the frequency, the forms and the functions of different cleft construction types across two language families: the Romance languages (with discussion of Italian, French and Spanish data) and the Germanic languages (with focus on English, German, Swiss German and Danish).

*Email, SMS, MMS* Carmen Frehner, 2008 Are email and SMS forms of writing or speech? This question cannot be answered easily because their registers are hybrid; they make use of both orality and literacy. This book offers an accurate placement of emails and text messages along the written/spoken continuum. Emails and text messages are also compared to letters and phone calls while a closer comparison of SMS and telegrams shows how far text messaging can be regarded as a renaissance of telegrams. Attention is further paid to multimedia messaging and questions concerning the proportion of image to text, picture categories as well as MMS dialogues are approached. The book finally comments on linguistic changes and deals with the German language community's concern with regard to the increasing use of Anglicisms.
