Counting the Cost of COVID-19 on the Global Tourism Industry Godwell Nhamo, Kaitano Dube, David Chikodzi, 2020-09-19 This book profiles preliminary findings on the impact of COVID-19 on the travel, tourism and hospitality sector. Starting with a narrative relating COVID-19 to the global development agendas, the book proceeds with a focus on global tourism value chains and linkages between COVID-19 and the Sustainable Development Goals (SDGs). Other perspectives addressed in separate chapters include impacts of COVID-19 on various industries within the global tourism value chain including aviation, airports, cruise ships, car rentals as well as ride and share car services, hotels, restaurants, sporting, pilgrimage and religious tourism, gaming and entertainment, and the stock market. The book also includes chapters on corporate, philanthropic and public donations, as well as tourism economic stimulus packages. It then concludes with a chapter focusing on building back a better tourism sector post-COVID-19 that strongly draws from the Sendai Framework on Disaster Risk Reduction (2015-2030) and the disaster cycle. To this end, this book is suitable as a read for several professionals in disciplines such as tourism and hospitality studies, economics, sustainable development, development studies, environmental sciences, geography, politics, planning and public health.

The Power of Your Life Grietjie Verhoef, 2018 This book explores a century of business development of The South African Life Assurance Company, from a specific local focus to a national conglomerate expanding into global insurance markets. Established as a strategic vehicle to address Afrikaner economic marginalization and abject poverty at the beginning of the twentieth century, Sanlam has displayed both path dependence and a dynamic adaptability to complex changing contexts to become a global player. The strategic convergence of economic empowerment through the mobilization of savings into insurance products, as well as Afrikaner nationalism, assisted this growth. Sanlam has played an atypical role in the economic empowerment of an ethnic entity through extensive investments into the industrializing South African economy. This strategic diversion created operational limitations that were only resolved early in the twenty-first century. As globalization, financial deregulation, and weakened Afrikaner political and social hegemony manifested, strategic change management relied on the path dependence of empowerment strategies to address new markets with similar needs to those of the early stakeholder market of 1918. The former mutual life office demutualized operations to become a diversified financial services group of companies operating across almost the entire African continent, as well as in India, Malaysia, and the UK. This volume presents a business history of strategic management of an insurance enterprise, and its transformation from a defined cultural context into an international empowerment strategy through innovation on all levels of business operation and organization. This book is an Open Access publication, available online under a CC BY-NC-ND 4.0 license.

The Infrastructures of Security Martin Murray, 2022-08-15 Much of the South African government's response to crime—especially in Johannesburg—has been to rely increasingly on technology. This includes the widespread use of video cameras, Artificial Intelligence, machine-learning, and automated systems, effectively replacing human watchers with machine watchers. The aggregate effect of such steps is to determine who is, and isn't, allowed to be in public spaces—essentially another way to continue segregation. In *The Infrastructures of Security*, author Martin J. Murray concentrates on not only the turn toward technological solutions to managing the risk of crime through digital (and software-based) surveillance and automated information systems, but also the introduction of somewhat bizarre and fly-by-night experimental “answers” to perceived risk and danger. Digitalized surveillance is significant for two reasons: first, it enables monitoring to take place across wide geographical distances with little time delay; and second, it allows for the active sorting, identification, and tracking of bodies, behaviors, and characteristics of subject populations on a continuous, real-time basis. These new software-based surveillance technologies represent monitoring, tracking, and information gathering without walls, towers, or guards.

When Crisis Strikes Francis Herd, 2020-05-01 In the past few years, so many scandals have rocked corporate South Africa that crises seem to be the norm rather than the exception. In the glare

of the public eye, with cameras, microphones and cellphones in their face, many leaders who excel in organisations suddenly become scared, confused and can even appear shady. When *Crisis Strikes* looks at a variety of crises in the age of social media in South Africa and abroad, with examples of who got it right, who got it wrong and how they could have done better. The organisations range from schools to local companies to multinationals caught up in state capture claims and giants such as Boeing and BP. The book provides ten simple and effective rules to help manage crisis situations. The practical advice in each rule is backed up by academic research that draws from public relations, marketing, management, leadership and psychology. It combines insights from a seasoned journalist and an accomplished academic to give you the advice and tools to ward off a crisis before it strikes and, if it's too late, to resolve a situation quickly and with integrity.

The World of Work M.C. Lebitso,2012-08-30 Work has always been part of man's history and a crucial factor in social organisation. According to the traditional career development perspective, work is viewed as having many dimensions or functions. The intention of this book is to highlight challenges faced by students when they are 'ready' to enter the world of work after leaving school or after finishing tertiary education.
