Bracketology Joe Lunardi,David Smale,Mark Few,2021-03-02 Lunardi delves into the early days of Bracketology, details its growth, and dispels the myths of the process The NCAA Tournament has become one of the most popular sports events in the country, consuming fans for weeks with the run to the Final Four and ultimately the crowning of the champion of college hoops.? Each March, millions of Americans fill out their bracket in the hopes of correctly predicting the future. Yet, there is no true Madness without the oft-debated question about what teams should be seeded where—from the Power-5 Blue Blood with some early season stumbles on their resume to the mid-major that rampaged through their less competitive conference season—and the inventor of Bracketology himself, Joe Lunardi, now reveals the mystery and science behind the legend. While going in depth on his ever-evolving predictive formula, Lunardi compares great teams from different eras with intriguing results, talks to the biggest names in college basketball about their perception of Bracketology (both good and bad), and looks ahead to the future of the sport and how Bracketology will help shape the conversation. This fascinating book is a must-read for college hoops fans and anyone who has aspired to win their yearly office pool.

Jesus Decides Kaye Bennett,2021-07-26 Kaye Bennett shares her story of loss, grief, reconciliation and grace. Loss came to Kaye early in life when her little brother died. She learned that grief is a lonely process. When you grieve, you grieve alone, because only God knows how you feel. When her niece was murdered by a serial killer, she experienced an anger that only family members of the victim know. She never imagined that she would be angry at God. Kaye wanted to share her story about the losses in her life and her family's survival of them. But God wasn't through with her. She also lost her nephew, the last child in her family. How do you know a loving God is still there for you when your faith has been tested not once, but three times? You ask Jesus.

Early FM Radio Gary L. Frost,2010-04-01 The commonly accepted history of FM radio is one of the twentieth century's iconic sagas of invention, heroism, and tragedy. Edwin Howard Armstrong created a system of wideband frequency-modulation radio in 1933. The Radio Corporation of America (RCA), convinced that Armstrong's system threatened its AM empire, failed to develop the new technology and refused to pay Armstrong royalties. Armstrong sued the company at great personal cost. He died despondent, exhausted, and broke. But this account, according to Gary L. Frost, ignores the contributions of scores of other individuals who were involved in the decades-long struggle to realize the potential of FM radio. The first scholar to

fully examine recently uncovered evidence from the Armstrong v. RCA lawsuit, Frost offers a thorough revision of the FM story. Frost's balanced, contextualized approach provides a much-needed corrective to previous accounts. Navigating deftly through the details of a complicated story, he examines the motivations and interactions of the three communities most intimately involved in the development of the technology—Progressive-era amateur radio operators, RCA and Westinghouse engineers, and early FM broadcasters. In the process, Frost demonstrates the tension between competition and collaboration that goes hand in hand with the emergence and refinement of new technologies. Frost's study reconsiders both the social construction of FM radio and the process of technological evolution. Historians of technology, communication, and media will welcome this important reexamination of the canonic story of early FM radio.

South Carolina's Turkish People Terri Ann Ognibene, Glen Browder, 2018-04-15 The story of misunderstood immigrants and their struggle to gain recognition and acceptance in the rural South Despite its reputation as a melting pot of ethnicities and races, the United States has a well-documented history of immigrants who have struggled through isolation, segregation, discrimination, oppression, and assimilation. South Carolina is home to one such group—known historically and derisively as the Turks—which can trace its oral history back to Joseph Benenhaley, an Ottoman refugee from Old World conflict. According to its traditional narrative, Benenhaley served with Gen. Thomas Sumter in the Revolutionary War. His dark-hued descendants lived insular lives in rural Sumter County for the next two centuries, and only in recent decades have they enjoyed the full blessings of the American experience. Early scholars ignored the Turkish tale and labeled these people tri-racial isolates and later writers disparaged them as so-called Turks. But members of the group persisted in claiming Turkish descent and living reclusively for generations. Now, in *South Carolina's Turkish People*, Terri Ann Ognibene and Glen Browder confirm the group's traditional narrative through exhaustive original research and oral interviews. In search of definitive documentation, Browder combed through a long list of primary sources, including historical reports, public records, and private papers. He also devised new evidence, such as a reconstruction of Turkish lineage of the 1800s through genealogical analysis and genetic testing. Ognibene, a descendant of the state's Turkish population, conducted personal interviews with her relatives who had been in the community since the 1900s. They talked at length and passionately about their cultural identity, their struggle for equal rights, and the mixed benefits of assimilation. Ognibene's and Browder's findings are clear. South Carolina's Turkish people finally know and can celebrate their heritage.

Best Friends, Worst Enemies Michael Thompson, PhD, Cathe O'Neill-Grace, 2001-10-24 Friends broaden our children's horizons, share their joys and secrets, and accompany them on their journeys into ever wider worlds. But friends can also gossip and betray, tease and exclude. Children can cause untold suffering, not only for their peers but for parents as well. In this wise and insightful book, psychologist Michael Thompson, Ph.D., and children's book author Catherine O'Neill Grace, illuminate the crucial and often hidden role that friendship plays in the lives of children from birth through adolescence. Drawing on fascinating new research as well as their own extensive experience in schools, Thompson and Grace demonstrate that children's friendships begin early—in infancy—and run exceptionally deep in intensity and loyalty. As children grow, their friendships become more complex and layered but also more emotionally fraught, marked by both extraordinary intimacy and bewildering cruelty. As parents, we watch, and often live through vicariously, the tumult that our children experience as they encounter the “cool” crowd, shifting alliances, bullies, and disloyal best friends. *Best Friends, Worst Enemies* brings to life the drama of childhood relationships, guiding parents to a deeper understanding of the motives and meanings of social behavior. Here you will find penetrating discussions of the difference between friendship and popularity, how boys and girls deal in unique ways with intimacy and commitment, whether all kids need a best friend, why cliques form and what you can do about them. Filled with anecdotes that ring amazingly true to life, *Best Friends, Worst Enemies* probes the magic and the heartbreak that all children experience with their friends. Parents, teachers, counselors—indeed anyone who cares about children—will find this an eye-opening and wonderfully affirming book.

Nervous Energy Chloe Carmichael, 2022-03-22 Many people reach success by deliberately being their own worst critic and obsessively double-checking their work; or by pushing their feelings aside. The somewhat OCD tendencies we pride ourselves on can become mismanaged, and lead us down a rabbit hole of excessive self-criticism, anxiety, and pessimism. Carmichael outlines nine tools with step-by-step instructions that can help you harness your nervous energy in order to live a more productive and fulfilling life. -- adapted from jacket

Evil Next Door Amanda Lamb, 2010-04-06 A brutal murder. An abundance of DNA evidence. A three-and-a-half year search for a killer who was always so close-yet untouchable. After the rape and murder of Raleigh, North Carolina, resident Stephanie Bennett, police had ample DNA evidence. They also had a suspect: the man next door. But for more than three years, he eluded them by refusing to hand over a DNA sample, wiping down anything he touched and even planting decoy samples. This is the gripping story of how a team of detectives finally tripped him up-and brought closure to an innocent young woman's family.
