**D-Day Cover Up at Pointe du Hoc** Gary Sterne,2019-03-30 A follow-up to the New York Times-bestselling *The Cover-Up at Omaha Beach*. “The second volume of the epic study breaks new ground.” –Firetrench Gary Sterne, a keen collector of militaria and co-founder of *The Armourer* and *Skirmish* magazines, has always been fascinated by the D-Day landings. In particular he was intrigued by the lack of precise information relating to the mystery of the “missing guns” of Pointe du Hoc. His research led to the finding of a map which indicated the position of an “unknown” German gun position buried in the village of Maisy. The rediscovery of the Maisy Batteries made headline news around the world and his bestselling book *The Cover-Up at Omaha Beach* subsequently changed the history of the Omaha sector and made many start to question the Rangers’ Pointe du Hoc mission. The Maisy site is now one of the major Normandy D-Day attractions. For the first time ever this follow-up book now offers complete Rangers history for the seven months prior to D-Day and does so using period documents, many of which have only recently been released from TOP SECRET status in U.S. Archives. The author fills in the gaps that many have only guessed at concerning the Rangers’ real missions on D-Day, he explains why a battalion commander was removed hours before the landings, why the Rangers were not briefed on their actual D-Day missions and the extraordinary role that Lt. Col. Rudder played at Pointe du Hoc. This book is a historical game-changer that pulls no punches.

International Financial Statistics, July 2017 International Monetary Fund. Statistics Dept.,2017-07-05 This paper discusses about countries where multiple exchange rates are in effect, IMF staff estimates of weighted average exchange rates are used in many cases. A weighted average exchange rate is constructed as an average of the various exchange rates, with the weights reflecting the share of trade transacted at each rate. The notes to the country tables in the monthly issues provide information about exceptions in the choice of the consumer price index and the period average exchange rate index. For a relatively small number of countries, notes in the country tables in the monthly issues indicate where alternative price indices, such as the wholesale/producer price index or a weighted average of several price indices, are used; where data constraints have made it necessary to use weighting schemes based on aggregate bilateral non-oil trade data; and where trade in services (such as tourism) has been taken into account.
