Ubiquitous Listening Anahid Kassabian, 2013-03-01 How does the constant presence of music in modern life—on iPods, in shops and elevators, on television—affect the way we listen? With so much of this sound, whether imposed or chosen, only partially present to us, is the act of listening degraded by such passive listening? In *Ubiquitous Listening*, Anahid Kassabian investigates the many sounds that surround us and argues that this ubiquity has led to different kinds of listening. Kassabian argues for a new examination of the music we do not normally hear (and by implication, that we do), one that examines the way it is used as a marketing tool and a mood modulator, and exploring the ways we engage with this music.

Awangarda Lisa Cooper Vest, 2020-12-01 In Awangarda, Lisa Cooper Vest explores how the Polish postwar musical avant-garde framed itself in contrast to its Western European counterparts. Rather than a rejection of the past, the Polish avant-garde movement emerged as a manifestation of national cultural traditions stretching back into the interwar years and even earlier into the nineteenth century. Polish composers, scholars, and political leaders wielded the promise of national progress to broker consensus across generational and ideological divides. Together, they established an avant-garde musical tradition that pushed against the limitations of strict chronological time and instrumentalized discourses of backwardness and forwardness to articulate a Polish road to modernity. This is a history that resists Cold War periodization, opening up new ways of thinking about nations and nationalism in the second half of the twentieth century.

Selling Digital Music, Formatting Culture Jeremy Wade Morris, 2015-09-01 Selling Digital Music, Formatting Culture documents the transition of recorded music on CDs to music as digital files on

computers. More than two decades after the first digital music files began circulating in online archives and playing through new software media players, we have yet to fully internalize the cultural and aesthetic consequences of these shifts. Tracing the emergence of what Jeremy Wade Morris calls the “digital music commodity,” *Selling Digital Music, Formatting Culture* considers how a conflicted assemblage of technologies, users, and industries helped reformat popular music’s meanings and uses. Through case studies of five key technologies—Winamp, metadata, Napster, iTunes, and cloud computing—this book explores how music listeners gradually came to understand computers and digital files as suitable replacements for their stereos and CD. Morris connects industrial production, popular culture, technology, and commerce in a narrative involving the aesthetics of music and computers, and the labor of producers and everyday users, as well as the value that listeners make and take from digital objects and cultural goods. Above all, *Selling Digital Music, Formatting Culture* is a sounding out of music’s encounters with the interfaces, metadata, and algorithms of digital culture and of why the shifting form of the music commodity matters for the music and other media we love.

Music after the Fall Tim Rutherford-Johnson, 2017-02-01 ...the best extant map of our sonic shadowlands, and it has changed how I listen.—Alex Ross, *The New Yorker* ...an essential survey of contemporary music.—*New York Times* ...sharp, provocative and always on the money. The listening list alone promises months of fresh discovery, the main text a fresh new way of navigating the world of sound.—*The Wire* 2017 Music Book of the Year—Alex Ross, *The New Yorker* *Music after the Fall* is the first book to survey contemporary Western art music within the transformed political, cultural, and technological environment of the post-Cold War era. In this book, Tim Rutherford-Johnson considers musical composition against this changed backdrop, placing it in the context of

globalization, digitization, and new media. Drawing connections with the other arts, in particular visual art and architecture, he expands the definition of Western art music to include forms of composition, experimental music, sound art, and crossover work from across the spectrum, inside and beyond the concert hall. Each chapter is a critical consideration of a wide range of composers, performers, works, and institutions, and develops a broad and rich picture of the new music ecosystem, from North American string quartets to Lebanese improvisers, from electroacoustic music studios in South America to ruined pianos in the Australian outback. Rutherford-Johnson puts forth a new approach to the study of contemporary music that relies less on taxonomies of style and technique than on the comparison of different responses to common themes of permission, fluidity, excess, and loss.

From 1989, or European Music and the Modernist Unconscious Seth Brodsky, 2017-01-24
What happened to musical modernism? When did it end? Did it end? In this unorthodox Lacanian account of European New Music, Seth Brodsky focuses on the unlikely year 1989, when New Music hardly takes center stage. Instead one finds Rostropovich playing Bach at Checkpoint Charlie; or Bernstein changing “Joy” to “Freedom” in Beethoven’s Ninth; or David Hasselhoff lip-synching “Looking for Freedom” to thousands on New Year’s Eve. But if such spectacles claim to master their historical moment, New Music unconsciously takes the role of analyst. In so doing, it restages earlier scenes of modernism. As world politics witnesses a turning away from the possibility of revolution, musical modernism revolves in place, performing century-old tasks of losing, failing, and beginning again, in preparation for a revolution to come.

Hearing Film Anahid Kassabian, 2002-06 This critical examination of music in the films of the 1980s and 1990s looks at the burgeoning role of compiled scores in the shaping of a film. The role of

music in films is analysed in terms of gender, race, desire and identity.

Create, Produce, Consume David Bruenger, 2019-10-08 *Create, Produce, Consume* explores the cycle of musical experience for musicians, professionals, and budding entrepreneurs looking to break into the music industry. Building on the concepts of his previous book, *Making Money, Making Music*, David Bruenger provides readers with a basic framework for understanding the relationships between the artist and audience and the producer consumer by examining the methods underlying creation-production-reception and creation-consumption-compensation. Each chapter offers a different perspective on the processes and structures that lead listeners to discover, experience, and interact with music and musical artists. Through case studies ranging from Taylor Swift's refusal to allow her music to be streamed on Spotify to the rise of artists supported through sites like Patreon, Bruenger offers highly relevant real-world examples of industry practices that shape our encounters with music. *Create, Produce, Consume* is a critical tool for giving readers the agile knowledge necessary to adapt to a rapidly changing music industry. Graphs, tables, lists for additional reading, and questions for further discussion illustrate key concepts. Online resources for instructors and students will include sample syllabi, lists for expanded reading, and more.

Victory through Harmony Christina L. Baade, 2013-09-01 To serve the British nation in World War II, the BBC charged itself with mobilizing popular music in support of Britain's war effort. Radio music, British broadcasters and administrators argued, could maintain civilian and military morale, increase industrial production, and even promote a sense of Anglo-American cooperation. Because of their widespread popularity, dance music and popular song were seen as ideal for these tasks; along with jazz, with its American associations and small but youthful audience, these genres suddenly gained new legitimacy at the traditionally more conservative BBC. In *Victory through Harmony*,

author Christina Baade both tells the fascinating story of the BBC's musical participation in wartime events and explores how popular music and jazz broadcasting helped redefine notions of war, gender, race, class, and nationality in wartime Britain. Baade looks in particular at the BBC's pioneering Listener Research Department, which tracked the tastes of select demographic groups including servicemen stationed overseas and young female factory workers in order to further the goal of entertaining, cheering, and even calming the public during wartime. The book also tells how the wartime BBC programmed popular music to an unprecedented degree with the goal of building national unity and morale, promoting new roles for women, virile representations of masculinity, Anglo-American friendship, and pride in a common British culture. In the process, though, the BBC came into uneasy contact with threats of Americanization, sentimentality, and the creativity of non-white others, which prompted it to regulate and even censor popular music and performers. Rather than provide the soundtrack for a unified People's War, Baade argues, the BBC's broadcasting efforts exposed the divergent ideologies, tastes, and perspectives of the nation. This illuminating book will interest all readers in popular music, jazz, and radio, as well as British cultural history and gender studies.
