*Interactions between the mammalian main and accessory olfactory systems* Jorge A Larriva-Sahd, Micheal Baum, 2015-01-05 The functional cross-talk and structural interaction between the main and accessory olfactory bulb is a central problem in mammalian sensory neurobiology. The early supposition that volatile substances and pheromones, most of them hydrosoluble molecules, are exclusively sensed and decoded by the main (MOS) and accessory olfactory systems (AOS), respectively, needs to be revised. In fact, a large number of structural and functional evidences accumulated during the last few decades, suggests that rather than separated entities, the MOS and AOS act synergically, bringing about physiological and behavioural responses. The goal of the present Research Topic will be to gather original research studies and revision papers, performed by the most authoritative research groups that have recently contributed to the broad area of sensory neurobiology. Special attention should be given to contributions addressed to the MOB and AOB cross-talk, involving current neuroanatomical techniques.

Scarred Dionne Bunsha, 2006-01-01 Did it really start with the burning of a train? *Scarred: Experiments with Violence in Gujarat* asserts the existence of a much larger politics of violence, and tells the story of a disaster in Hindutva's laboratory which etched deep faults in Gujarat's social landscape. While capturing the predicament of the Sabarmati Express survivors, *Scarred* is an intense, moving portrait of refugees whose lives have been changed forever by the violence that followed. It tells the story of people fighting for justice amidst fear and turmoil, unable to return home. It is also an insightful look into the minds of the perpetrators of this violence, and the world they seek to construct—a world where the ghettoization and socio-economic boycott of Muslims have become the norm. What exactly happened in Gujarat in February 2002? Why did the country's political leaders fiddle while Gandhi's Gujarat burned? In this honest and thought-provoking book, Dionne Bunsha tries to answer these and many of the questions that we are still left with.

**How the West Was Lost** Alexander Boot, 2006-06-30 What made the West 'western'? And has Western civilisation found modernity but lost itself? This provocative and stimulating polemic argues that western culture and civilisation have been destroyed not only in, but indeed by, modernity. *How the West Was Lost* argues that all modern upheavals — the Reformation, the English, American, French and Russian Revolutions, the Napoleonic Wars, the American Civil War, both World Wars — can only be understood if seen as resulting in an assault on the core values of the West. At its heart lies the belief that the central conflict of our time is cultural and that traditional culture and civilised society have been under attack ever since the Enlightenment. The author traces the development of Western civilisation from its origins — paradoxically in the East — and examines what he sees as its inexorable decline in all forms of art and all walks of life. He asks uncomfortable questions about politics, philosophy, psychology and religion and suggests answers which are provocative and unorthodox. This book is a bold and challenging attempt to present a new concept of modern history for our complacent times. The results are often unexpected but always original and invigorating.

*Seeing New York* Hope Cooke, 2011-12-12 An off-the-beaten bath tour of New York that transcends the usual guide book.

**Mr. Wrigley's Ball Club** Roberts Ehr Gott, 2013-04-01 Chicago in the Roaring Twenties was a city of immigrants, mobsters, and flappers with one shared passion: the Chicago Cubs. It all began when the chewing-gum tycoon William Wrigley decided to build the world's greatest ball club in the nation's Second City. In this Jazz Age center, the maverick Wrigley exploited the revolutionary technology of broadcasting to attract eager throngs of women to his renovated ballpark. *Mr. Wrigley's Ball Club* transports us to this heady era of baseball history and introduces the team at its crazy heart—an amalgam of rakes, pranksters, schemers, and choirboys who take center stage in memorable successes, equally memorable disasters, and shadowy intrigue. Readers take front-row seats to meet Grover Cleveland Alexander, Rogers Hornsby, Joe McCarthy, Lewis "Hack" Wilson, Gabby Hartnett. The cast of characters also includes their colorful if less-extolled teammates and the

Cubs' nemesis, Babe Ruth, who terminates the ambitions of Mr. Wrigley's ball club with one emphatic swing.

**Scarface Nation** Ken Tucker,2008-11-11 Don't get high on your own supply. Brian de Palma's brash, bloody version of Scarface was trashed by critics when it came out twenty-five years ago and didn't do well at the box office, but has become a spectacular fan favorite and enduring pop culture classic since. Never underestimate the greed of the other guy. What makes millions of people obsess over this movie? Why has Al Pacino's Tony Montana become the drug kingpin whose pugnacity and philosophy are revered in boardrooms and bedrooms across America? Who were the people that made the movie, influencing hip-hop style and swagger to this day? The world is yours. Scarface Nation is Ken Tucker's homage to all things Scarface—from the stars that acted in it to the influence it's had on all of us, from facts, figures and stories about the making of the movie to a witty and comprehensive look at Scarface's traces in today's pop and political culture. Say hello to my li'l fren! You know you love the line. You know you've seen the movie more than once. Now dive into the ultimate book of Scarface—mounded as high as the pile of cocaine on Tony's desk with delicious details and stimulating observations. You know what capitalism is? F--- you!

Design Principles and Practices: An International Journal is a site of discussion exploring the meaning and purpose of 'design', as well as speaking in grounded ways about the task of design and the use of designed artefacts. The resulting conversations weave between the theoretical and the empirical, research and application, market pragmatics and social idealism. In professional and disciplinary terms, the journal traverses a broad sweep to construct a transdisciplinary dialogue which encompasses the perspectives and practices of: anthropology, architecture, art, artificial intelligence, business, cognitive science, communication studies, computer science, cultural studies, design studies, education, e-learning, engineering, ergonomics, fashion, graphic design, history, information systems, industrial design, industrial engineering, instructional design, interior design, interaction design, interface design, journalism, landscape architecture, law, linguistics and semiotics, management, media and entertainment, psychology, sociology, software engineering, technical communication, telecommunications, urban planning and visual design. The journal is relevant for academics in the design and applied sciences, professions, social sciences and humanities, research students, design practitioners, industry-based designers, professionals and managers, public administrators and trainers and industry consultants. Design Principles and Practices: An International Journal is peer-reviewed, supported by rigorous processes of criterion-referenced article ranking and qualitative commentary, ensuring that only intellectual work of the greatest substance and highest significance is published.

This document sets out the Home Office's approach to tackling cyber crime, showing how to tackle such crimes directly through the provision of a law enforcement response, and indirectly through cross-Government working and through the development of relationships with industry, charities and other groups, as well as

**Human Development and the Catholic Social Tradition** Séverine Deneulin, 2021-05-20 This book brings development theory and practice into dialogue with a religious tradition in order to construct a new, transdisciplinary vision of development with integral ecology at its heart. It focuses on the Catholic social tradition and its conception of integral human development, on the one hand, and on the works of economist and philosopher Amartya Sen which underpin the human development approach, on the other. The book discusses how these two perspectives can mutually enrich each other around three areas: their views on the concept and meaning of development and progress; their understanding of what it is to be human – that is, their anthropological vision; and their analysis of transformational pathways for addressing social and environmental degradation. It also examines how both human development and the Catholic social tradition can function as complementary analytical lenses and mobilizing frames for embarking on the journey of structural and personal transformation to bring all life systems, human and non-human, back into balance. This book is written for researchers and students in development studies, theology, and religious studies, as well as professional audiences in development organizations.
