Rich Ling

**The Mobile Connection** Rich Ling, 2004-06-25 Has the cell phone forever changed the way people communicate? The mobile phone is used for “real time coordination while on the run, adolescents use it to manage their freedom, and teens “text to each other day and night. The mobile phone is more than a simple technical innovation or social fad, more than just an intrusion on polite society. This book, based on world-wide research involving tens of thousands of interviews and contextual observations, looks into the impact of the phone on our daily lives. The mobile phone has fundamentally affected our accessibility, safety and security, coordination of social and business activities, and use of public places. Based on research conducted in dozens of countries, this insightful and entertaining book examines the once unexpected interaction between humans and cell phones, and between humans, period. The compelling discussion and projections about the future of the telephone should give designers everywhere a more informed practice and process, and provide researchers with new ideas to last years. \*Rich Ling (an American working in Norway) is a prominent researcher, interviewed in the new technology article in the November 9 issue of the New York Times Magazine. \*A particularly good read, this book will be important to the designers, information designers, social psychologists, and others who will have an impact on the development of the new third generation of mobile telephones. \*Carefully and wittily written by a senior research scientist at Telenor, Norway's largest telecommunications company, and developer of the first mobile telephone system that allowed for international roaming.

*Bringing E-money to the Poor* Thyra A. Riley, Anoma Kulathunga, 2017-09-11 Moving toward universal access to financial services is within reach, thanks to new technologies, transformative business models, and ambitious reforms. Instruments such as e-money accounts and mobile accounts, along with debit cards and low-cost traditional bank accounts, can significantly increase financial access for those who are excluded. *Bringing e-Money to the Poor: Successes and Failures* examines the lessons of success from four country case studies of “gazelle”†•Kenya, South Africa, Sri Lanka, and Thailand†•that leapt from limitation to innovation by successfully enabling the deployment of e-money technology. These countries have thereby transformed the landscape of financial access to their poor. In addition, two country case studies (Maldives and the Philippines) yield lessons learned from constraints that stalled e-money deployments. Because technology is not a silver bullet, the case studies also explore other strategic elements that need to be in place for a country to expand access to financial services through digital technology.

**Strong Connections** Rosa Wang, 2022-02-01 Rosa Wang's remarkable book takes readers to the last frontier of the mobile/digital revolution. While much has been written about breakthrough technologies and early adopters who live where roads are good and smart phones are affordable, this book explores the largely undocumented journey of how digital technologies are entering the lives of those in extreme poverty—people, often women, often illiterate—who live without electricity or running water. With powerful stories, Wang brings you to the front lines of the revolution—to join meetings with small-holder farmers in raucous town halls in remote parts of Tanzania, and to sit on dirt floors alongside non-literate women in rural India. The book chronicles the exponential trajectory of the mobile phone through the arc of the author's own journey, an Asian-American woman from Mississippi navigating male-dominated environments and cultures, while changing the digital world without a background in technology. Readers will learn of the challenges that come with life on less than two dollars a day, and in that world, the transformative power of digital technologies: to give identity, improve finances, and to bring some degree of empowerment. Along the way, the author introduces memorable individuals and guides them on their journey across the digital divide to join the mobile generation. These people, poor in monetary

resources and literacy, are rich in social connections, warmth, and wisdom. Their day-to-day lives seem implausibly hard, and their resilience humbles at every turn. This book is about them. At its heart, this is their story.

*Travel Connections* Jennie Germann Molz, 2012-08-06  
Living in a world that is increasingly 'on the move' means that many of us now rely on mobile devices, social media, and networking technologies to coordinate togetherness with our social networks even when we are apart. Nowhere is this phenomenon more evident than in the emerging practices of 'interactive travel'. Today's travellers are more likely than ever to pack a laptop or a mobile phone and to use these devices to stay in touch with friends and family members - as well as to connect with strangers and other travellers - while they are on the road. New practices such

as location-aware navigating, travel blogging, flashpacking and Couchsurfing now shape the way travellers engage with each other, with their social networks, and with the world around them. *Travel Connections* prompts a rethinking of the key paradigms in tourism studies in the digital age. Interactive travel calls into question longstanding tourism concepts such as landscape, the tourist gaze, hospitality, authenticity and escape. The book proposes a range of new concepts to describe the way tourists inhabit the world and engage with their social networks in the twenty-first century: smart tourism, the mediated gaze, mobile conviviality, re-enchantment and embrace. Based on intensive fieldwork with interactive travellers, *Travel Connections* offers a detailed account of this emerging phenomenon and uncovers the new forms of mediated and face-to-face togetherness that become possible in a mobile world. This book will be of interest to students and scholars of sociology, tourism and hospitality, new media, cosmopolitanism studies, mobility studies and cultural studies.

Turban,2017-10-12 This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject.
