*Black Code* Ronald J. Deibert,2013-05-14 Cyberspace is all around us. We depend on it for everything we do. We have reengineered our business, governance, and social relations around a planetary network unlike any before it. But there are dangers looming, and malign forces are threatening to transform this extraordinary domain. In *Black Code*, Ronald J. Deibert, a leading expert on digital technology, security, and human rights, lifts the lid on cyberspace and shows what's at stake for Internet users and citizens. As cyberspace develops in unprecedented ways, powerful agents are scrambling for control. Predatory cyber criminal gangs such as Koobface have made social media their stalking ground. The discovery of Stuxnet, a computer worm reportedly developed by Israel and the United States and aimed at Iran's nuclear facilities, showed that state cyberwar is now a very real possibility. Governments and corporations are in collusion and are setting the rules of the road behind closed doors. This is not the way it was supposed to be. The Internet's original promise of a global commons of shared knowledge and communications is now under threat. Drawing on the first-hand experiences of one of the most important protagonists in the battle — the Citizen Lab and its global network of frontline researchers, who have spent more than a decade cracking cyber espionage rings and uncovering attacks on citizens and NGOs worldwide — *Black Code* takes readers on a fascinating journey into the battle for cyberspace. Thought-provoking, compelling, and sometimes frightening, it is a wakeup call to citizens who have come to take the Internet for granted. Cyberspace is ours, it is what we make of it, Deibert argues, and we need to act now before it slips through our grasp.

*EC Competition and Telecommunications Law* Andreas Bartosch,Jens-Daniel Braun,2009-01-01 This new volume updates the groundbreaking analysis of its first edition in 2002, when the EC common regulatory framework for electronic communications networks and services had just entered into force. So much has changed in the intervening years that that this new edition bears little resemblance to its predecessor, with every chapter either extensively altered or entirely new. It remains, however, the most detailed and comprehensive overview available of the application of the EC Treaty's competition rules in the markets for telecommunications and audiovisual media, and of the applicable regulatory framework. In thirteen chapters, each contributed by one or more noted legal authorities in the field, the second edition of *EC Competition and Telecommunications Law* covers the full range of EC telecommunications law across all major areas of both institutional and substantive law, both on the international and EC levels, including the following: State aid; the merger control regulation; justification for sector-specific regulation in EC competition law; network access; authorizations and privileges; and mobile telephony. Relevant EC media and communications law and relevant aspects of EC competition law are dealt with in detail. While some chapters focus on competition law, others deal primarily with sector-specific regulation. There is practical guidance throughout on procedural matters, alongside analysis of the substantive provisions. Well-known in its first edition, this thoroughly revised and updated version continue to be vital reading for practitioners, in particular those specializing in European competition law and for company and in-house lawyers who are seeking advice on how European law affects their business. As a detailed analysis of the basic legislative and regulatory framework of European telecommunications law, it will be an invaluable reference work for lawyers, judges, regulators, and policymakers in all the EC Member States, as well as for students and teachers of European law.

*Social Media in Rural China* Tom McDonald,2016-09-13 China's distinctive social media platforms have gained notable popularity among the nation's vast number of internet users, but has China's countryside been 'left behind' in this communication revolution? Tom McDonald spent 15 months living in a small rural Chinese community researching how the residents use social media in their daily lives. His ethnographic findings suggest that, far from being left behind, many rural Chinese people have already integrated social media into their everyday experience. Throughout his ground-breaking study, McDonald argues that social media allows rural people to extend and transform their social relationships by deepening already existing connections with friends known through their school, work or village, while also experimenting with completely new forms of relationships through online interactions with strangers, particularly when looking for love and romance. By juxtaposing these seemingly opposed relations, rural social media users are able to use these technologies to understand, capitalise on and challenge the notions of morality that underlie rural life.

Battles,2019-06-20 The University of Alabama (UA) is one of the most prominent universities in the US. Volume One of this series explored UA's birth, formative years, its burning by Union soldiers, and its rebirth in 1871. Volume Two noted the adolescent years of the school, rebellion by the students against the military system of government, the rise of a student culture via the admission of women, and a nascent men's sports program. This third volume explores rising enrollment and a new style of student governance. The book investigates how UA dealt with student smoking, cursing, and hazing. It covers how UA became nationally respected academically, the rise of a successful sports program, the first use of the phrase "Crimson Tide," the history of the Million Dollar Band and how "Yea, Alabama" became the school fight song, the UA/Auburn rift, and the UA response to WWI and to the women's rights movement.
