*Impact of Mobile Payment Applications and Transfers on Business* Opati, Thaisaiyi Zephania, Gachukia, Martin Kang'ethe, 2019-12-20 Consumers continue to rely heavily on their phones to complete such tasks as transferring funds between banks or accounts, depositing or withdrawing funds, paying bills, and purchasing items. Mobile money users are oftentimes more financially resilient and can protect themselves better against economic and other shocks. Moreover, mobile money can increase the velocity of money in circulation because it reduces the transactions and time costs of making retail payments. As such, understanding the impact of mobile payments is imperative for businesses and the economy. *Impact of Mobile Payment Applications and Transfers on Business* is a pivotal reference source that provides vital research on mobile money transfer and its impact in social, corporate, and micro- and macro-policies concerning the aggregate economy and individual households as a whole within an economy. It covers the impact, innovations, business-to-business transformations, regulatory framework, challenges, and ethical issues surrounding mobile money transfers around the world. This book is ideally designed for economists, financial analysts, business managers, leaders, scholars, practitioners, researchers, and students in fields that include management, finance, economics, commerce, and leadership.

*TRUSTING MOBILE PAYMENT* Andrea Bauer, 2017-07-18 In this book Andrea Bauer examines the apparently simple question of the role of trust in the development and establishment of mobile payment services. The proliferation of new payment instruments was always associated with the condition of trustworthiness. Even if the form of payment has changed constantly in the past (e.g. cowrie shells, stones, coins, paper notes, plastic cards or electronic digits), the demand for trustworthiness was always an essential factor regarding its market acceptance. What trust exactly is, which functions trust has in the use of technical solutions and which aspects and determinants of trust are crucial regarding mobile payment services, Andrea Bauer will analyze in the present work.

Critical Success Factors of Mobile Payments Christian Hort, 2003-03-24 Scientific Essay from the year 2002 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: 1,0 (A), Technical University of Darmstadt (Finance and Banking Management (TUD); Institute of Information Management (HSG)), 147 entries in the bibliography, language: English, abstract: In the context of this research, payment is understood as the exchange of monetary value between participants either directly or using an intermediary.<sup>5</sup> Mobile payment (mPayment) can be understood as every payment where at least one participant applies mobile phone technology, thus, uses a mobile phone.<sup>6</sup> But due to technological progress it seems reasonable to classify other devices like a Personal Digital Assistant (PDA) or devices with embedded Radio Frequency (RF) technology as mobile payment devices.<sup>7</sup> However, mobile phones today clearly outnumber every other mobile payment device. Penetration rates<sup>8</sup> are forecasted to reach almost 80% in Europe by 2005.<sup>9</sup> The number of worldwide cellular subscribers is expected to pass one billion by 2003.<sup>10</sup> By 2005 there will be more mobile phones worldwide than TVs, fixed line phones, and Personal Computers

(PC).<sup>11</sup> Driven by the increasing penetration and resulting business opportunities, numerous mPayment solutions have been offered by payment service providers, telcos, and financial institutions. The variety of applicable technologies, the possible linkage between the financial instruments, and the mPayment device combined with different payment scenarios offer a wide landscape of mPayment solutions. Besides technology, questions dealing with consumer expectations, factors thriving or inhibiting a widespread adoption, and with its related penetration strategies for payment service providers have to be carefully researched to develop a successful mPayment.<sup>12</sup> <sup>5</sup> See Dahlberg/Mallat (2002) p. 651. <sup>6</sup> See Krueger (2001) p. 1; see IWW (2002a) p. 5; see Kreyer/Pousttchi/Turowski (2002) p. 1 f. <sup>7</sup> See Thing/Rouse (2001); cp. chapter 3.2. <sup>8</sup> Users as a percentage of the population. <sup>9</sup> See Barnett/Hodges/Wilshire (2000) p. 164. <sup>10</sup> See Barnett/Hodges/Wilshire (2000) p. 164; see Krueger (2001) p. 3; see GSM Association (2002b). <sup>11</sup> See Datta/Pasa/Schnitker (2001) p. 72. <sup>12</sup> See Dahlberg/Mallat (2002) p. 650.

User Acceptance of Mobile Notifications Tilo Westermann, 2017-03-14 This book presents an alternative approach to studying smartphone-app user notifications. It starts with insights into user acceptance of mobile notifications in order to provide tools to support users in managing these. It extends previous research by investigating factors that influence users' perception of notifications and proposes tools addressing the shortcomings of current systems. It presents a technical framework and testbed as an approach for evaluating the usage of mobile applications and notifications, and then discusses a series of studies based on this framework that investigate factors influencing users' perceptions of mobile notifications. Lastly, a set of design guidelines for the usage of mobile notifications is derived that can be employed to support users in handling notifications on smartphones.

*A Billion Little Pieces* Jordan Frith, 2024-02-06 How RFID, a ubiquitous but often invisible mobile technology, identifies tens of billions of objects as they move through the world. RFID (Radio Frequency Identification) is ubiquitous but often invisible, a mobile technology used by more people more often than any flashy smartphone app.

RFID systems use radio waves to communicate identifying information, transmitting data from a tag that carries data to a reader that accesses the data. RFID tags can be found in credit cards, passports, key fobs, car windshields, subway passes, consumer electronics, tunnel walls, and even human and animal bodies—identifying tens of billions of objects as they move through the world. In this book, Jordan Frith looks at RFID technology and its social impact, bringing into focus a technology that was designed not to be noticed. RFID, with its ability to collect unique information about almost any material object, has been hyped as the most important identification technology since the bar code, the linchpin of the Internet of Things—and also seen (by some evangelical Christians) as a harbinger of the end times. Frith views RFID as an infrastructure of identification that simultaneously functions as an infrastructure of communication. He uses RFID to examine such larger issues as big data, privacy, and surveillance, giving specificity to debates about societal trends. Frith describes how RFID can monitor hand washing in hospitals, change supply chain logistics, communicate wine vintages, and identify rescued pets. He offers an accessible explanation of the technology, looks at privacy concerns, and pushes back against alarmist accounts that exaggerate RFID's capabilities. The increasingly granular practices of identification enabled by RFID and other identification technologies, Frith argues, have become essential to the working of contemporary networks, reshaping the ways we use information.

*Model Rules of Professional Conduct* American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

**The Role of Financial Inclusion for Reaching Sustainable Development Goals** Jungo, João, Madaleno, Mara, Botelho, Anabela, Dogan, Eyup, 2024-02-12 In today's world, financial inclusion has emerged as a critical tool for fostering

inclusive economic growth and achieving sustainable development goals. The Role of Financial Inclusion for Reaching Sustainable Development Goals presents a comprehensive exploration of the subject, offering a vital resource for anyone seeking to grasp the intricacies of this dynamic and evolving field. This book assembles a collection of cutting-edge research on financial inclusion, featuring contributions from diverse contributing authors with expertise in various aspects of finance and economics. The volume is structured to examine the main trends and challenges surrounding financial inclusion, while shedding light on its implications for different economies and societies. From the determinants of financial inclusion to its effects on economic agents, financial institutions, and entire economies, each chapter delves into crucial questions, exploring both the theoretical and empirical aspects of the topic. By examining the challenges and implications of financial inclusion in an international context, this book emerges as a relevant and timely reference for policymakers, academics, and financial professionals alike. This book emphasizes the broader social and political impact of financial inclusion, discussing its correlation with issues such as gender inequality, education expenses, health expenses, access to water and sanitation, environmental inequality, and energy needs.

Acceptance and Success Factors for NFC-Mobile-Payment in South Korea. In Comparison to Austria and Taiwan Jakob Harb, 2016-12-28 Master's Thesis from the year 2016 in the subject Information Management, grade: 1, University of Graz (Department of Information Science and Information Systems, University of Graz, Austria / Department of Management Information Systems, Chungbuk National University, Republic of Korea), language: English, abstract: NFC-Mobile-Payment describes contactless payment transactions using near-field-communication-technology. This payment technology is currently used in bank- and credit cards, as well as in mobile phones. This thesis focuses on NFC-Mobile-Payment using mobile phones. Aim of this work was, to identify the drivers of the customer adoption of NFC-Mobile-Payment in South Korea and compare them to previous findings from Austria and Taiwan. The drivers have been analyzed using the model of Pham and Ho that bases on the Technology-Acceptance Model (TAM). The countries have been compared to each other taking in account cultural, technological, and sociological differences and similarities. An empirical inquiry has been processed and data has been collected through an online survey. The found data was analyzed using the Maximum-Likelihood-Method. In South Korea, the users' trust in the involved companies and people, the absorptive capacity, the compatibility with the lifestyle and the tasks of the users the trialability, the personal innovativeness the attractiveness of available alternatives and the perceived usefulness were identified as influential drivers on the adoption of NFC-Mobile-Payment. The findings from South Korea differed significantly from those in the other two countries. Significant differences between Korea and the other two countries were found in all observed drivers except the users' trust in the involved companies and people and the attractiveness of available alternatives. Another important finding is that in some aspects, the two Asian countries share more similarities with each other than both do with Austria, but in other aspects, Austria

Wireless and Mobile Networking Zoubir Mammeri,2010-08-24 Research and development in wireless and mobile networks and services areas have been going on for some time, reaching the stage of products. Graceful evolution of networks, new access schemes, flexible protocols, increased variety of services and applications, networks reliability and availability, security, are some of the present and future challenges that have to be met. MWCN (Mobile and Wireless Communications Networks) and PWC (Personal Wireless Communications) are two conferences sponsored by IFIP WG 6.8 that provide forum for discussion between researchers, practitioners and students interested in new developments in mobile and wireless networks, services, applications and computing. In 2008, MWCN and PWC were held in Toulouse, France, from September 30 to October 2, 2008. MWNC'2008 and PWC'2008 were coupled to form the first edition of IFIP Wireless and Mobile Networking Conference (WMNC'2008). MWCN and PWC topics were revisited in order to make them complementary and covering together the main hot issues in wireless and mobile networks, services, applications, computing, and technologies.
