Advertising, Promotion, and New Media Marla R. Stafford,Ronald J. Faber,2015-03-26 Today, new media enter our lives faster than ever before. This volume provides a complete, state-of-the-art overview of the newest media technologies and how they can be used in marketing communications - essential information for any organization that wants to maintain an effective advertising program, as well as for experts and students in the fields of advertising and mass communications. *Advertising, Promotion, and New Media* offers crucial insights on the use of cutting-edge techniques including 3-D advertising, mobile advertising, advergames, interactivity, and netvertising images, as well as more familiar Internet advertising formats such as banner ads and pop-ups. It also discusses such important topics as how to select online affiliates, and how to assess the effectiveness of new media advertising and compare it with traditional formats. Throughout the book, the chapter authors offer up-to-date information and thought provoking

ideas on emerging technology and how it can be used effectively for advertising and promotion in the future.

Springer Handbook of Geographic Information Wolfgang Kresse,David M. Danko,2011-10-31 Computer science provides a powerful tool that was virtually unknown three generations ago. Some of the classical fields of knowledge are

geodesy (surveying), cartography, and geography. Electronics have revolutionized geodetic methods. Cartography has faced the dominance of the computer that results in simplified cartographic products. All three fields make use of basic components such as the Internet and databases. The Springer Handbook of Geographic Information is organized in three parts, Basics, Geographic Information and Applications. Some parts of the basics belong to the larger field of computer science. However, the reader gets a comprehensive view on geographic information because the topics selected from computer science have a close relation to geographic information. The Springer Handbook of Geographic Information is written for scientists at universities and industry as well as advanced and PhD students.
